The Honorable Governor Schwarzenegger,
Governor of California
State Capitol
Sacramento, CA 95814

Dear Governor Schwarzenegger,

Scientific evidence supports a perchlorate drinking water standard of 1 part per billion will adequately protect public health. Please ensure that the office of Environmental Health Hazard considers the most recent research from the Centers of Disease Control as they reevaluate California's public health goal this year.

Sincerely,

Lupe Sandia

P.S. My address is 1503 Curtis St,
Berkeley, CA 94702
