I am a resident of Los Osos and want to voice my objection with the mandatory pumping of septic tanks every other month.

I am a single resident of my home and should not be considered in the same catagory as a family of six. Even so I do not condone the compulsory pumping of any septic tank.

If it has to be done, there should be individual tests made to show where polution exists and also to prove that water quality would be improved.

I strongly urge you to withdraw from your "prosecution" method and start working with the local community to solve the real problem - building an affordable facility out of town, and one that will accommodate the whole of Los Osos, not just a core of residents.

Thank you for your consideration.

Yours Truly,

Eleanor S. Flood
