4/6/06

Mr. Roger Briggs
Water Quality Control Board

Dear Sir:

I am an "Interested Party" living in the Prohibition zone submitting the following points:

1. The Board has unconstitutionally accused me of polluting without ever having tested my septic tank.
2. As a senior citizen, 85 years old, on Social Security, as is my wife, we are finding the hostility and rancor coming from your Board being more than we can bear, physically, mentally, emotionally and financially.
3. Our present CSD are trying valiantly to solve our sewer dilemma. They have in the past 6 months in office worked tirelessly, on our behalf and we can see progress. We are not stalling. That is absolute nonsense.
4. The Board should be working with the CSD rather than putting road blocks at every turn costing many dollars that could be used for building a long-term solution.
5. What the Board is doing by issuing CDO's is punitive rather than constructive to the residents of Los Osos.
6. All our compost goes into the garden not into the garbage disposal. Dishes are done by hand, water is being conserved by about 1/3. We are doing our utmost to protect our water basin.
7. Please help us to achieve our goal of an affordable efficient sewer system for our community.
8. There is so much more that I hope to be able to address the Board at the hearing on April 28, 06.

Yours truly

D. Braverman
