RE: Proposed Cease and Desist Orders Against Individual Properties in the Los Osos/Baywood Park Prohibition Zone-Presentation of Prosecution's Case

Dear Mr. Thomas:

This letter represents our response to a request to submit briefs regarding a number of procedural items stemming from the replacement of Lori Okun on the Prosecution Team in the above referenced action.

We believe that the Regional Water Quality Control Board prosecution of the individual citizens in Los Osos and Baywood Park must be stopped and restarted from the very beginning. We understand that the reason for Ms. Okun's removal is to remove the conflict of interest created by her both advising the RWQCB and prosecuting the individuals. This conflict cannot be fully removed unless the prosecutions are cancelled and re-started from the beginning. For this reason, we believe the entire hearing must begin again, with new presentations by the Prosecution and the Los Osos Community Services District. In addition, a new opportunity should be given to individuals to speak regarding procedural issues. All parties should be allowed to supplement their cases with new materials.

Sincerely,

(signed)

William and Maryella Dannenbring
