Subject: TUCO Condition 1(D)iii

EXTERNAL:

In accordance with Condition 1(D)iii of the June 1, 2021 Order Conditionally Approving a Petition for Temporary Urgency Changes, the following is a projection of State and federal exports beginning the week of June 7th, the purposes and considerations for those exports, and an explanation of why it is in the public interest to export that water when D-1641 requirements are not being met.

Beginning June 7th	SWP	CVP
Planned exports	300 cfs	800 cfs (one unit)
Purpose, Considerations, and Public Interest	This rate allows the SWP to supply water to Byron Bethany Irrigation District, who diverts from Clifton Court Forebay, and also to the SWP South Bay Public Water Agencies who are not directly connected to San Luis Reservoir and who rely on direct diversions from the Delta to meet their municipal and industrial demands due to limited or exhausted local storage and a lack of sufficient alternative supplies.	This rate allows the CVP the ability to maintain a one-unit operation, and minimizes the need to start and stop the unit in a 24-hour period (i.e. cycling) which could result in catastrophic damage to the pumping units. Water exported at Jones Pumping Plant is primarily diverted for planning for and meeting municipal and industrial (M&I) public health and safety demands, wildlife refuge demands as required under CVPIA and senior water right holders.
