10-7-2011

Dear Sir

I have written you two letters about "OWTS". If these septic tanks (system's) aren't any good, why did they have us put them in the ground? So you can put another fee (tax)? The "OWTS" waste water is meant to go in the ground which purify the water waste. The ground has to perk before you can put a house on the property. The County inspected it & said it was fine!

If it was harmful to the underground water system, why did they have us put it here? You are just making it up, to get money

Sincerely,

John P Morgan
