Subject: SubBase Water Discharge Permit

SUPPORTING DOCUMENT 12.

Dear Regional Board,

I am writing you to express my concerns about water quality in San Diego Bay. The Bay has been recognized as a jeopardized water body for many years. The water discharge permitting process is an essential means for preventing further degradation of our bay. Furthermore, all dischargers to the bay should be held to the same standards to insure bay protection.

Therefore, I urge you to require that the SubBase Water Discharge permit have standards that are at least as protective as the current permits issued to commercial shipyards. The permit should also include a provision that requires a diversion of the most toxic stormwater flows.

Thank you for considering my comments.

Sincerely,

M. Dan McKirnan
