October 1, 2009 Webinar

Cool Geo-Tools Available for Your Use Today!

Dear *GeoSym09* Participant:

GeoSym09 is being presented as a series of Webex seminars (Webinars). We did this to reduce our impact on the environment and on California's economy. When conditions allow, we hope to resume the conference format.

We scheduled three webinars for 2009. Our first, (April 28th, 2009) focused on *The Impact of Climate Change on Water Resources*. Webinar 2 (September 3, 2009) focused on *The Impact of Abandoned Mines on California's Hydrology*.

Our third Webinar will focus on some very Cool Geo-Tools

The current list of speakers includes:

Loren Turner, Caltrans – ShakeCast and ARS Online,

Mark Kram, Groundswell Tech. – Automated Environmental Monitoring and Data Visualization,

Claudio Avila, DWR, Delta Levee Evaluation

Join us for Webinar 3 from 9:30 AM to 1200, October 1st, 2009.

To encourage interaction and networking and to cut down on web access, we encourage you to attend the webinar at a satellite meeting location, such as DTSC's office in Cypress, Chatsworth, Sacramento or Berkeley, or the Water Board's office in Oakland and Sacramento. Brief Abstract summaries will follow. You may register today at: <http://www.waterboards.ca.gov/academy>
