April 13, 2010 Webinar Announcement

Geo-Databases Updates

Dear GeoSym'10 Participant:

For GeoSym'10, we are scheduling three free webinars. Our first Webinar will focus on **Geo-Databases Updates**.

JOIN US for our first Webinar on the morning of April 13, 2010 at 0930 -1200 PDT. The first presentation will be on the integration of GAMA (Groundwater Ambient Monitoring & Assessment Program) into GeoTracker. We'll then shift gears for an Envirositor synopsis. DWR will follow this with an update on the work from the Integrated Water Analysis Branch. We'll close off the webinar with a presentation on the Water Portal recently unveiled by the State Water Resources Control Board

To encourage interaction and networking between colleagues at different agencies and to cut down on web access, we welcome you to attend the webinar at a satellite meeting location, such as DTSC's office in Cypress or Chatsworth, or the Water Board's office in Oakland.

Subsequent webinar topics we are considering include: Geographic Information Systems and Emergency Response to Geological Events. Are you interested in giving a presentation on any of these future topics? Let Scott Warren know: SWarren@dtsc.ca.gov

REGISTER NOW at <http://www.waterboards.ca.gov/academy/>

Click on schedule. Choose the April 13 GeoSym '10 webinar class and register by entering your account information. You are in! We will post updates on the Water Board Academy webpage on registration, satellite office locations, schedule and program soon. We will forward a finalized schedule and your Webex registration/ access information by April 8, 2010. Watch your inbox for that important message. We look forward to having you join us.
