April 28, 2009 GeoSym '09 Webinar Announcement

## Global Climate Change Impacts on California's Hydrology

Welcome, we are glad you will be joining us for our 2009 kickoff webinar organized and attended by State geologists!

Decisions involving geotechnical and environmental investigations depend on data collected under the oversight and review of geologists in California State service. In an effort to improve consistency, State geologists welcome you to our webinars to promote inter-agency cooperation, information and resource sharing and professional networking. The April 28 webinar will focus on **The Impact of Climate Change on Water Resources**.

**Join us** for our first Webinar on the afternoon of April 28, 2009 at 1330 PDT. Note the webinar will start at 1330 sharp, you will be able to log into the Webex interface starting at 1300.

Speakers include:

- ➔ John Andrew (DWR) presenting "Adapt, Flee, or Perish; Responses to Climate Change for California's Water Sector."
- ➔ Dr. Graham Fogg (UC Davis) presenting "Subsurface Storage and Recovery: Perspective on Climate Change and Sustainability of Groundwater Quantity and Quality in California."

To encourage interaction and networking between colleagues at different agencies and to cut down on web access, we welcome you to attend the webinar at a satellite meeting location, such as DTSC's office in Cypress or Chatsworth, or the Water Board's office in Oakland. We may open a location at the Cal EPA headquarters in Sacramento depending on demand. Let us know if you are interested in attending at this Capital City location.

Subsequent webinar topics include: abandoned mines, database tools and geo-technological updates.

Vision: Promote sharing, inter-agency cooperation & collaboration

# Register Now

GeoSym '09 webinars are entirely free to attend. They will be broadcast on the popular Webex virtual meeting platform. Register today at: <http://www.waterboards.ca.gov/academy/> Click on schedule. Choose the April 28<sup>th</sup> GeoSym '09 webinar class and register by entering your account information. You are in! We will shortly acknowledge your registration by sending you a Webex invitation. Watch your inbox for that important message. We look forward to having you join us.

If you can't attend this webinar, stay tuned. We are planning webinar #2 scheduled for June 2009. This virtual meeting will focus on the challenges encountered in environmental cleanups at abandoned mine sites in California. We will also brush up on the availability of database tools maintained by State agencies for use by geologists. Our third and final '09 webinar installment is scheduled for late September. This time we will bring in the private sector for a geo-technological update on topics such as: sampling equipment, software, data management and remedial technologies.

If you have a topic you would like to see, a topic you would like to present to your peers, or if you are interested in helping plan this effort, please contact one of the following individuals by **30 days prior to the start of the webinar**:

Scott Warren  
Sr. Eng. Geologist  
DTSC Cypress  
(714) 484-5462
