

STATE WATER RESOURCES CONTROL BOARD
RESOLUTION NO. 79-2

AUTHORIZING REVISIONS TO STANDARD
AGREEMENT W6-047-32, AND EXTENSION
OF COMPLETION DATE TO APRIL 30, 1979

WHEREAS:

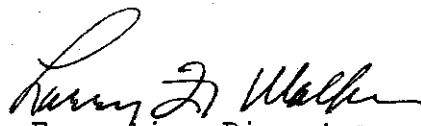

1. The Board entered into Standard Agreement W6-047-32 with the Regents of the University of California at San Diego for the purpose of obtaining information on the initial dilution performance of ocean discharges and coastal mixing processes.
2. Task 3, which required a comprehensive data review of large scale mixing processes, an analysis of "worst case" mixing conditions, and development of a 10 kilometer computer model, was not addressed in the final report submitted February 22, 1978.
3. It has been determined that the development of a coastal dispersion model for Southern California coastal water with 10 kilometer resolution is infeasible.
4. The University has proposed revisions to Task 3 which would provide the Board with useful information on the degree of interference between adjacent ocean outfalls, and requested a time extension to complete the work.

THEREFORE BE IT RESOLVED:

That the Board authorizes the Executive Director to amend Standard Agreement W6-047-32 to revise original Task 3 in accordance with the description set forth in Exhibit A (attached) and to extend the date for completion to April 30, 1979.

CERTIFICATION

The undersigned, Executive Director of the State Water Resources Control Board, does hereby certify that the foregoing is a full, true, and correct copy of a resolution duly and regularly adopted at a meeting of the State Water Resources Control Board held on January 25, 1979.

Executive Director
(Larry F. Walker)
