

STATE WATER RESOURCES CONTROL BOARD
RESOLUTION NO. 79-105

AUTHORIZING THE EXECUTIVE DIRECTOR TO NEGOTIATE
AND EXECUTE A CONTRACT FOR DEMONSTRATION OF A
SMALL DIAMETER GRAVITY SEWER SYSTEM

WHEREAS:

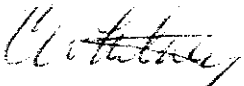

1. The small diameter gravity sewer concept has the potential for providing a less expensive method of wastewater collection and transport than conventional gravity collection systems for some rural unsewered areas.
2. Engineering consultants will be reluctant to seriously consider these systems for rural unsewered communities until more detailed data are available in California on the construction, operation, and maintenance aspects and overall reliability of small diameter gravity sewer systems.
3. The Board actively supports the concept of demonstrating alternative wastewater technology and the opportunity is available to demonstrate a small diameter gravity sewer system that will be planned, designed, and constructed under the state and federal Clean Water Grants Program.

THEREFORE BE IT RESOLVED:

That the State Board authorizes the Executive Director to negotiate and execute a contract for the demonstration of a small diameter gravity sewer system for a duration not greater than two and one-half years and an amount not to exceed \$100,000, subject to the availability of funds in the budgets for F. Y. 1981-82 and 1982-83.

CERTIFICATION

The undersigned, Executive Director of the State Water Resources Control Board, does hereby certify that the foregoing is a full, true, and correct copy of a resolution duly and regularly adopted at a meeting of the State Water Resources Control Board held on December 20, 1979.

Clint Whitney
Executive Director
