- 7. Panel discussion on questions presented to the panel and formulation of recommendations**
- 8. Adjournment**

Background

Chapter 1 of the Second Extraordinary Session of 2008 (SBX2 1, Perata), required the State Water Resources Control Board (State Water Board) to develop pilot projects focusing on nitrate in groundwater in the Tulare Lake Basin and Salinas Valley, and to submit a report to the Legislature on the scope and findings of the pilot projects, including recommendations. The State Water Board made 15 recommendations in 4 key areas to address the issues associated with nitrate contaminated groundwater. The key areas to address these issues are:

1. Providing safe drinking water.
2. Monitoring, notification, and assessment.
3. Nitrogen tracking and reporting.
4. Protecting groundwater.

Expert Panel

Recommendation 14 of the State Water Board's report to the Legislature was to convene a panel of experts to assess existing agricultural nitrate control programs and develop recommendations, as needed, to ensure that ongoing efforts are protective of groundwater supply quality. The State Water Board has contracted with the Irrigation Training and Research Center (ITRC), a center established within the BioResource and Agricultural Engineering Department of the California Polytechnic State University, San Luis Obispo to assemble the expert panel of 8 persons. The Expert Panel members have been selected and presented with questions for their consideration. Information about the panel members and their charge is available on the ITRC website at <http://www.itrc.org/001/swrcb.htm>.

Schedule (some dates may be changed at a later date and all changes will be noticed).

Date	Event	Location
Completed	Advisory Committee Kickoff Meeting	Cal/EPA Building Sierra Hearing Room, Sacramento
Completed	Expert Panel Public Meeting #1	San Luis Obispo Day 1: Irrigation Training and Research Center Day 2: Monday Club
