**Subject:** 2/2/16 BOARD MEETING (Conservation Extended Emergency Regulation)

To Whom it May Concern,

The IVCSD would like to express our concern about the extension of the emergency water regulations. We would support regulations to be continued in areas that are still in a "drought" situation. Northeastern California has experienced near normal rainfall over the past two rainy seasons. We have not seen the same drought conditions as most other areas of California. Reasonable restrictions for areas having water issues are justifiable, but continued restrictions on areas experiencing normal or above average rainfall seems excessive. Thanks for your consideration.
