Subject: Emergency Regulation for Statewide Urban Water Conservation.
Date: Tuesday, January 31, 2017 11:33:54 AM

State Water Board
Sacramento, CA

I would like to share my opinion with the Board that they make the decision to continue with the above referenced
Emergency Regulation for Statewide Urban Water Conservation and other conservation efforts around the state.

The fact that California has been the beneficiary of recent rains and snow should not deter the continuation of water conservation efforts across the state.
Water requirements and availability for the state will continue to be an issue that requires much strategic planning and conservation efforts for decades to come.

Please do not remove conservation requirements when the current regulations expire.

Thank you for allowing me to share my thoughts with you.

Sincerely,

James C. Colby
