RESCISSION OF CLEANUP AND ABATEMENT ORDER R5-2008-0707, MARTIN OPERATING PARTNERSHIP AND THE PORT OF STOCKTON, SAN JOAQUIN COUNTY

Martin Operating Partnership and the Port of Stockton (together the Discharger) are regulated under Cleanup and Abatement Order (CAO) R5-2008-0707 for impacts to groundwater and surface water. Under the CAO, the Discharger was directed to complete certain tasks, and to submit documentation that the tasks were completed. The Discharger submitted the required documentation.

Based on the Central Valley Water Board staff's review and a site inspection, the Discharger has satisfied the requirements of Items 2-4 (pages 6-8) of the CAO. The Central Valley Water Board approves the following submittals:

1. A scaled Comprehensive Site Map;
2. A 12-month water balance;
3. An Operations and Maintenance Plan;
4. Certification that a new wall to match the existing east wall has been installed on the east side of the stockpile area;
5. Certification that the leachate sumps and leachate conveyance system have passed leak detection tests;
6. Verification that poles and windscreens have been installed around the entire perimeter of the prill storage area;
7. Certification that stockpiles do not, and will not at any time in the future, extend above the upper limits of the windscreens;
8. Documentation that the 481,000-gallon concrete AST is in continuous and uninterrupted operation; and
9. Documentation that the two Hypalon storage ponds have been removed from service.

The Discharger has fully complied with the requirements of the CAO, and therefore the CAO is hereby rescinded.

Please note that Monitoring and Reporting Program Order R5-2008-0825 remains in effect.

Staff looks forward to working with the Discharger on this project. Should you have questions, please contact Mary Boyd at mboyd@waterboards.ca.gov or (916) 464-4676.
