RE: Shaky Science behind Costly Permit Recommendations

Dear Kathleen,

I am very concern with the costly Water Discharge Permit recommendations that could cost the Sacramento region up to \$2 Billion Dollars, (\$ 2,000,000,000.00).

This could cause small businesses in the Sacramento area to close or relocate. Everyone strives to keep the waterways clean and healthy, but this Draft Discharge Permit would not help anything. The current Federal and State requirements are already being met and our water is clean & safe.

The Regional Water Quality Control Board needs to be responsible representatives and spend our money wisely. In this recession or anytime, wasting the tax payer's money should not happen.

I strongly disagree with the Draft Discharge Permit that the Regional Water Quality Control Board is proposing. Please reconsider your justification and burden on the Sacramento people and businesses.

Sincerely,

Ken Barnett
