Subject: Bear Valley Water Dis. NPDES permit renewal

Dear Mr. Marshall:

My husband, George Stone, and I are homeowners and Water Districts ratepayers in Bear Valley. We became aware of the permit draft renewal and my letter is to express my and our support for the our NPDES permit draft requiring the secondary treatment.

We are a very unique area with challenges to surface water and when there are extreme conditions our whole area can be affected. With our current conditions, it is stated policy of our District to discharge only in emergencies, and there has been no discharge in over 10 years.

We support the secondary treatment as the basis for issuing the current NPDES permit.

Regards, Gay Callan
