PLEASE HELP!

Our small community in Bear Valley CA is being faced with spending millions of dollars on a tertiary treatment plant that makes very little sense.

In times like this when many of us are trying desperately to hang on to the few things we have left this may be the last straw. I believe that studies and common sense make this an inadvisable and unnecessary expense.

We can do nothing but ask for your serious consideration.

Thank you

Mike McCoy

President and CFO

Pearson & Co.
