

Resolution Amending Waste Discharge Requirements General Order R5-2004-0061 for United States Army Corps of Engineers and Port of Stockton, Stockton Deep Water Ship Channel Maintenance Dredging Activities Channel Mile 0.0 to 41.0, Contra Costa, Sacramento and San Joaquin County

The proposed amendment clarifies the existing General Order R5-2004-0061 (Order) to authorize the direct reuse of inert dredge material from maintenance dredging operations in the Stockton Deep Water Ship Channel at sites approved by the Central Valley Regional Water Quality Control Board.

The existing Order authorizes reuse of dredged material at any approved site after initial placement.

Discharge Specification C.1 of the Order authorizes both initial placement of dredged material at sites identified in the Order, as well as placement to any DMD sites “approved for accepting dredge material.” The proposed amendment clarifies the language in the Order to be consistent with this discharge specification.

All agencies and the dischargers concur or have offered no comments.
