CC: Ambrose McCready; Rosenbaum, Steve

Marty, I just finished my letter and sent to Steve for review. The main concern I had was the thickness of the proposed cover. The Plan did not indicate how the thickness was derived to meet the intent of T27, 21090 and whether the underlying waste was going to be used as a foundation layer. If it is, then you will need to provide the appropriate testing results that support it has the proper engineering properties to support the final cover. The 3% grade and proposed drainage controls are appropriate. I would like Steve to review the comment letter before we talk. If no major changes, I have asked for the additional information be provided by 15 October. Hang tight, I will discuss with Steve on Monday.

Todd:

We are ready to proceed with completing the Dellar Closure Construction Plans, but are waiting for any comments from the Water Board before proceeding. We want to complete the construction plans this fall so we can start working in the Bid Package as shown on the schedule.

Have you finished your review and do you have any comments we need to discuss?

Marty
