NOTICE OF QUARTZ MINING LOCATION

(Amended)

Notice is hereby given that the undersigned corporation of the United States, by its duly authorized representative, having complied with the requirements of Chapter Six of Title Thirty two of the Revised Statutes of the United States and regulations thereunder, and with the local customs, laws and regulations, has located and hereby claims under the name of

TWO POUNDER LODE

Fifteen Hundred linear feet of this ledge, commencing at this notice, posted at the Point of Discovery and running 11.9 feet in a Southerly direction and 1486.15 feet in a northerly direction together with 300 feet of surface ground on each side of said lode line.

The said location is situated in no organized Mining District, Indian Township, Plumas County, State of California, on surveyed land of the United States and is particularly described as follows, to wit:

Beginning at the Discovery Monument:- Thence Southerly 11.9 feet to the South End Center Stake Thence Southwesterly 315.73 feet to the S. W. corner. Identical with Cor. Nos. 4-2 Sur. No. 5582A Piute No. 1 and Digger Lodes, Thence Northerly 1498.05 feet to the N. W. corner, identical with Cor. No. 1 Sur. No. 5582A Piute No. 1 lode. Thence Northeasterly 315.73 feet to the North End Center Stake Thence Northeasterly 315.48 feet to the N. E. Corner. An iron pipe, 1.25 inches in diam., painted red, set in the ground in cement. Thence Southerly 1498.05 feet to the S. E.

by....DEPUTY RECORDER

Feet

Mineral Survey No.6137 was made with a Buff and Berger Transit No.2369, with horizontal limb 5.00 ins. diam., having two double opposite verniers, and full vertical circle 5.00 ins. diam., having one double vernier; the verniers read to one minute of arc. The instrument was in good condition at the time of the survey and all adjustments were in good order. A.M. and p.m. altitude observations of the sun for azimuth were made each day when conditions permitted, the details of two of which observations are shown in the calculation sheets herewith submitted for examination. All azimuths in this record are referred to the true meridians thus determined, by the method of deflection angles and calculated courses.

The lines were measured with a steel tape 500 feet in length, graduated every foot, with the first and last foot graduated to tenths and hundredths; a steel tape 100 feet in length and a steel tape 50 feet in length, each graduated to feet, tenths and hundredths; all tapes have been checked, and found correct.

All lines and connections of this survey were run by traverse methods, to avoid cutting valuable timber, as shown by the calculation sheets herewith submitted.

The magnetic variation is given at each corner of the survey.

RED BIRD No.1 LODE

Beginning at Cor. No.1 of the Red Bird No.1 Lode, which is identical with Cor. No.1 of Sur. No.4865 Rob Extension lode, claimant herein, and with Cor. Nos.1-1 of Sur. No.5582 A, Digger and Panama No.1 lodes, claimant herein.

Total area, Red Bird No. 13 lode.....	20.584
Total area, Panama No. 6 lode.....	20.157

LOCATION.

This survey is located in the NW¼ and SW¼ sec. 29, NE¼ and SE¼ sec. 30, and NW¼ sec. 32, T.25 N., R.12 E., M. D. M.

The survey of the several lodes as stated herein is identical with the respective amended location as marked on the ground.

EXPENDITURE OF $500.

I certify that the value of the labor and improvements made upon or for the benefit of each of the locations embraced in said mining claim by the claimant or its grantors is not less than $500, and that said improvements consist of:

No. 1. The discovery point of the Red Bird No. 1 lode, which is on the lode line 10.8 ft. from a point on line 2-3, 315.73 ft. from Cor. No. 2.
No value.

No. 1. The discovery point of the Two Pounder lode, which is on the lode line 11.9 ft. from a point on line 1-2, 315.48 ft. from Cor. No. 1.
No value.

No. 1. The discovery point of the Three Pounder lode, which is on the lode line 10.32 ft. from the middle of line 1-2.
No value.

No. 1. The discovery point of the Red Bird No. 13 lode, which is on the lode line 13.93 ft. from the middle of line 2-3.
No value.

No. 1. The discovery point of the Panama No. 6 lode, which is on the lode line 17.7 ft. from a point on line 3-4, 315.73 ft. from Cor. No. 3.
No value.

An interest in a common improvement described as follows:

Anaconda Geological Documents Collection, American Heritage Center, University of Wyoming. This material may be protected by copyright law (Title 17, U.S. Code). For our full copyright policy, please contact the AHC by mail or email.

A tunnel 4x6 ft. in size, the portal of which bears N.39°33'W., 639.1 ft. from Cor. No. 2 Two Pounder lode running S.88°48'E., 98.6 ft. to pt. A; thence N.88°21' E., 44.9 ft. to pt. B at face. At pt. B is a two compartment, timbered incline shaft 7x11 ft. in size, running on a dip of 45°, N.88°15'E., 100.7 ft. to pt. C; thence N.89°36'E., 175.7 ft. to pt. D; thence N.89° 37'E., 202.8 ft. to point E on the 7th level. At pt. E, a drift 8x10 ft. in size, runs N.11°14'W., 95.2 ft. to pt. F; thence S.11°25'W., 68 ft. to pt. G; thence S.12°38'W., 20 ft. to pt. H; thence S.0°54'W., 50.06 ft. to pt. I.

Value of incline shaft and drift, $19.365.

The incline shaft and drift in this improvement were constructed for the development of the five lodes of this survey, all of which being within range of benefit of said improvement.

The surface rises rapidly to the east, and more gradually to the southeast, from the portal of the tunnel which, with the incline shaft, drift and laterals, form an integral part of the main operating and ventilating system of the claimant's contiguous property; and through, and by means of, that system is afforded the most practical and economical means of developing each of said lodes at depth. The geological structure is that of schist, cut by fissures running northerly and southerly, and dipping easterly. The ore bodies throughout the mine are in this schist and, except where outcrops occur, the schist is covered with a lava flow.

From the foot of the incline shaft, a winze extends from the 7th level to the 10th level, approximately 500 ft. lower, with many feet of lateral drifts and crosscuts. The mine assay and development maps, and the monthly progress reports, show that these drifts and crosscuts extend nearly to the east side line of the Red Bird No. 13 lode of this survey, thence southerly several hundred feet, into said lode; the assay values being such as to warrant the claimant in continuing that method of developing the locations embraced in this survey. At the time of this survey, owing to the temporary closure of the mine, this winze and its laterals were filled with water to the 7th level.

Five hundred dollars or over has been expended in the incline shaft and drift in such a manner as tends to the development of each lode of this survey subsequent to its location and to the time since which common ownership and contiguity have prevailed.

The tunnel, valued at $1500, was credited to Sur. No. 5582A Piute lode, and therefore is not included in the valuation of the common improvement.

The incline shaft was driven as a raise from the 7th level, or main haulage level, of the claimant's contiguous property, which latter is partially described hereinafter under "Other Improvements".

The first, or lower, 130.5 ft. of the raise, valued at $4567.50, were driven in May and June, 1928, for the purpose of developing the Red Bird No. 1 lode of this survey, to which its value is credited.

The remaining 348.7 ft. of said raise, valued at $12,197.50, were driven between July 1 and December 1, 1928, for the purpose of developing the Red Bird No. 1, Two Pounder and Three Pounder lodes of this survey, and an undivided one-third interest is therefore credited to each.

The last 130 ft. of the drift, valued at $2600, were driven during July and August, 1930, for the benefit of

Anaconda Geological Documents Collection, American Heritage Center, University of Wyoming. This material may be protected by copyright law (Title 17, U.S. Code). For our full copyright policy, please contact the AHC by mail or email.

the Two Pounder, Three Pounder, Red Bird No. 1, Red Bird No.13, and Panama No.6 lodes of this survey, and therefore an undivided one-fifth interest is credited to each.

Except as above stated, no portion of or interest in this improvement has been credited heretofore as patent expenditure to any lode claim.

OTHER IMPROVEMENTS.

A drift which runs from pt. I of the above described common improvement, S.4°01'W., 82.13 ft., thence S.10° E., 25.95 ft., thence South 188.5 ft., thence S.24°49'W. 22.58 ft., thence South 310.9 ft., thence southerly on the 7th or main haulage level to portal.

Claimant herein.

A drift which runs from pt. E of the above described common improvement, N.83°45'E., 27.0 ft. to Sta. 1, thence N.0°42'E., 80.96 ft., thence N.0°24'E., 99.18 ft., thence N.31°59'W., 34 ft., thence N.2°15'W., 75.82 ft., thence N.7°15'E., 52.99 ft., thence N.22°58'E.,56.22 ft., thence N.15°E., 43.2 ft. to face.

Claimant herein.

A drift which runs from Sta. 1 in the preceding improvement, S.16°36'E.,63.4 ft., thence S.2°34'E.,102.6 ft., thence S.25°42'E., 24.16 ft., thence S.13°10'E., 48.37 ft., thence S.23°12'W., 31.11 ft., thence S.28°19' E.,48.43 ft., thence S.14°W.,70.83 ft., thence S.8°09'W. 64.24 ft., thence S.43°15'E., 55.07 ft., thence S.35°41' E., 19.19 ft., thence S.22°03'E., 34.61 ft. to face.

Claimant herein.

OTHER CORNER DESCRIPTIONS.

Sur. No. 5582A Panama No.1 lode: Cor. No.2 is a spruce post, 4x5 ins., 24 ins. above ground, mkd. 2-PM1-5582A, badly rotted at the ground line and very unstable, I replaced it with the iron pipe previously described, with the original post alongside. Line 1-2 was found to be N.56°56'E.,631.21 ft., instead of N.57°23'E.,632.57 ft. as approved. Line 2-3 was found to be S.14°11'42"E., 1469.43 ft., instead of S.14°09'E.,1467.9 ft. as approved.

Sur. No. 5582A Digger lode: Line 1-2 was found to be N.14°18'15"W.,1499.59 ft., instead of N.14°12'W.,1499.6 ft. as approved.

Sur. No. 5582A Piute No.1 lode: Line 4-1 was found to be N.14°54'W.,1498.05 ft., instead of N.14°09'W., 1500 ft. as approved.

Sur. No. 5948 September Morn No.1 lode: Cor. No.1 is a galvanized iron pipe, 1¼ ins. diam., 18 ins. above ground and in a mound of stone, with brass cap mkd. SM1-1-5948. Cor. No.2 is a galvanized iron pipe, 1¼ ins. diam., 18 ins. above ground, and in a mound of stone, with brass cap mkd. SM1-2-5948. Cor. No.4 is a galvanized iron pipe 1¼ ins. diam., 18 ins. above ground, and in a mound of stone, with brass cap mkd. SM1-4-5948. I find line 1-2 to be N.7°26'E.,1506.96 ft., instead of N.7°E.,1500 ft. as approved. I find line 4-1 to be N.56°56'E.,775.76 ft. instead of N.57°E.,783.2 ft. as approved.

The section line between the SW¼ sec.29 and SE¼ sec.30, T.25 N.,R.12 E., M.D.M., was found to be N.0°05'30"E., 2653.64 ft., instead of North 2640 ft. as approved.

Note: The disagreements between these field notes and the amended location certificates are due to errors in the latter.

FINAL OATHS FOR SURVEYS

LIST OF NAMES

A list of the names of the individuals employed by James A. Ingols United States Mineral Surveyor, to assist in running, measuring, and marking the lines, corners, and boundaries described in the foregoing field notes of the survey of the mining claim of Walker Mining Company known as the TWO POUNDER, THREE POUNDER, RED BIRD No.1, RED BIRD No.13 and PANAMA No.6 LODES and showing the respective capacities in which they acted.

Hans Morstang, *Chainman.*

Howard Morstang, *Chainman.*

_____, *Axman.*

_____, *Flagman.*

FINAL OATHS OF ASSISTANTS

We, Hans Morstang and Howard Morstang, do solemnly swear that we assisted James A. Ingols, United States Mineral Surveyor, in marking the corners and surveying the boundaries of the mining claim of Walker Mining Company known as the TWO POUNDER, THREE POUNDER, RED BIRD No.1, RED BIRD No.13 and PANAMA No.6 LODES represented in the foregoing field notes as having been surveyed by said mineral surveyor and under his direction; and that said survey has been in all respects, to the best of our knowledge and belief, faithfully and correctly executed, and the corner and boundary monuments established according to law and the instructions furnished by the Office Cadastral Engineer, at Glendale, California.

Hans Morstang, *Chainman.*

Howard Morstang, *Chainman.*

_____, *Axman.*

_____, *Flagman*

Subscribed and sworn to by the above-named persons before me this 4th day of November, 1932.

Alfred N. Waite

Notary Public

My commission expires March 27, 1934.

DEPARTMENT OF THE INTERIOR
GENERAL LAND OFFICE

FINAL OATH OF U. S. MINERAL SURVEYOR

I, James A. Ingols, U. S. Mineral Surveyor, do solemnly swear that, in pursuance of instructions received from the Office Cadastral Engineer, at Glendale, California, dated September 22, 1932, I have, in strict conformity to the laws of the United States, the official regulations and instructions thereunder, and the instructions of said Office Cadastral Engineer, faithfully and correctly executed the survey of the mining claim of Walker Mining Company, known as the TWO POUNDER, THREE POUNDER, RED BIRD No.1, RED BIRD No.13 and PANAMA No.6 LODES situate in No organized Mining District, Plumas County, California, in Sections 29, 30 and 32, Township No. 25 N., Range No. 12 E. of the M.D.M. and designated as Survey No. 6137, as represented in the foregoing field notes, which accurately show the boundaries of said mining claim as distinctly marked by monuments on the ground, and described in the attached copies the location certificates, which was received by me from the Office Cadastral Engineer with said instructions, and that all corners of said survey have been established and perpetuated in strict accordance with the law, official regulations and instructions thereunder; and I do further solemnly swear that the foregoing are the true and original field notes of said survey and my report therein, and that the labor expended and improvements made upon said mining claim by claimant or its grantors are as therein fully stated, and that the character, extent, location, and itemized value thereof are specified therein with particularity and full detail, and that no portion of said labor or improvements so credited to this claim has been included in the estimate of expenditures upon any other claim.

James A. Ingols

(U. S. Mineral Surveyor.)

Subscribed and sworn to by the said James A. Ingols U. S. Mineral Surveyor, before me Alfred N. Waite a Notary Public this Fourth day of November, 1932.

Alfred N. Waite

CERTIFICATE OF APPROVAL OF FIELD NOTES AND SURVEY OF MINING CLAIM

DEPARTMENT OF THE INTERIOR
PUBLIC SURVEY OFFICE

At Glendale, California,

December 31, 1932., 192

I, Office Cadastral Engineer at Glendale, California,

do hereby certify that the foregoing and hereto attached Field Notes and Return of the Survey of the Mining Claim of Walker Mining Company

, known as the TWO POUNDER, THREE POUNDER, RED BIRD No.1, RED BIRD No.13 and PANAMA No.6 LODES

situate in No organized mining district,

Plumas County, California,

in Sections 29, 30 and 32, Township No. 25 North, Range No. 12 East

M. D. M., designated as Survey No. 6137

executed by James A. Ingols, U. S. Mineral Surveyor, October 10-26, 1932, under my instructions dated September 22, 1932, have been critically examined and the necessary corrections and explanations made, and the said Field Notes and Return, and the Survey they describe, are hereby approved. The certified copy of the location certificate filed by the applicant for survey is on file in this office and a true copy of said certified copy of said location certificate is included and made a part of the transcript of the field notes.

John D. Adams
Office Cadastral Engineer.

OFFICE CADASTRAL ENGINEER'S FINAL CERTIFICATE ON FIELD NOTES

Department of the Interior

PUBLIC SURVEY OFFICE

Glendale, California,

December 31, 1932.

I, Office Cadastral Engineer Glendale, California,

do hereby certify that the foregoing transcript of the Field Notes, return and approval of the survey of the mining claim of Walker Mining Company known as the TWO POUNDER, THREE POUNDER, RED BIRD No.1, RED BIRD No.13 and PANAMA No.6 LODES situate in No organized Mining District Plumas County California in Sections 29, 30, 32 Township No. 25 North, Range No. 12 East, M.D.M., and designated as Survey No. 6137, has been correctly copied from the originals on file in this office; that said Field Notes furnish such an accurate description of said mining claim as will, if incorporated into a patent, serve fully to identify the premises, and that such reference is made therein to natural objects or permanent monuments as will perpetuate and fix the *locus* thereof.

I further certify that Five Hundred Dollars worth of labor has been expended or improvements made upon, or for the benefit of, each location embraced in said mining claim by claimant ---- or its grantors, and that said improvements consist of an incline shaft and drift; Value, $19,365.00

and that no portion of said labor or improvements has been included in the estimate of expenditures upon any other claim.

I further certify that the plat thereof, filed in the U. S. Land Office at Sacramento, California, is correct and in conformity with the foregoing Field Notes.

John D. Adams
Office Cadastral Engineer.

Sacramento 022990 4—1043.

The United States of America,

To all to whom these presents shall come, Greeting:

Walker Patents

WHEREAS, the Walker Mining Company, being the owner of a certain tract of land situated and included within the limits of the Plumas National Forest, California, has, under the provisions of the Act approved March 20, 1922 (42 Stat. 465), entitled "An Act To consolidate national forest lands", reconveyed and relinquished the said tract to the United States and has, under the provisions of said Act, selected in lieu thereof the following described tracts of land:

"The Lot six, the southwest quarter of the northwest quarter of the northwest quarter of the northwest quarter, the northwest quarter of the southwest quarter of the northwest quarter of the northwest quarter, and the southwest quarter of the southwest quarter of the northwest quarter of the northwest quarter of Section five, the southeast quarter of the southeast quarter of the northeast quarter of the northeast quarter of Section six, the northeast quarter of the northeast quarter of the northeast quarter of the northeast quarter, the south half of the northeast quarter of the northeast quarter of the northeast quarter, the south half of the northwest quarter of the northeast quarter of the northeast quarter, the southeast quarter of the northeast quarter of the northwest quarter of the northeast quarter, the east half of the southeast quarter of the northwest quarter of the northeast quarter, the east half of the northeast quarter of the southwest quarter of the northeast quarter, the southwest quarter of the northeast quarter of the northeast quarter, the northwest quarter of the southeast quarter of the northeast quarter, the southeast quarter of the northeast quarter of the northeast quarter, and the northeast quarter of the southeast quarter of the northeast quarter of Section seven, the northwest quarter of the northwest quarter of the northwest quarter of the northwest quarter, the south half of the northwest quarter of the northwest quarter, the southwest quarter

6—2160 GOVERNMENT PRINTING OFFICE

of the northwest quarter of the northwest quarter, and the north half of the northwest quarter of the southwest quarter of the northwest quarter of Section eight in Township twenty-four north and the south half of the southwest quarter of the southwest quarter of the southwest quarter of Section thirty-two in Township twenty-five north all in Range twelve east of the Mount Diablo Meridian, California, containing one hundred eight acres and twenty-two hundredths of an acre, according to the Official Plat of the Survey of the said Land, on file in the General Land Office:

NOW KNOW YE, That the UNITED STATES OF AMERICA, in consideration of the premises, HAS GIVEN AND GRANTED, and by these presents DOES GIVE AND GRANT, unto the said Walker Mining Company, and to its successors, the tracts above described; TO HAVE AND TO HOLD the same, together with all the rights, privileges, immunities, and appurtenances, of whatsoever nature thereunto belonging, unto the said Walker Mining Company and to its successors and assigns forever; subject to any vested and accrued water rights for mining, agricultural, manufacturing, or other purposes, and rights to ditches and reservoirs used in connection with such water rights as may be recognized and acknowledged by the local customs, laws, and decisions of courts; and there is reserved from the lands hereby granted, a right of way thereon for ditches or canals constructed by the authority of the United States. Reserving unto the United States, its permittee or licensee, the right to enter upon, occupy and use, any part or all of the southeast quarter of the southeast quarter of the northeast quarter of the northeast quarter of said Section six and the northeast quarter of the northeast quarter of the northeast quarter of said Section seven, for the purposes provided in the Act of June 10, 1920 (41 Stat. 1063), and subject to the conditions and limitations of Section 24 of said Act.

IN TESTIMONY WHEREOF, I, Herbert Hoover,

President of the United States of America, have caused these letters to be made Patent, and the Seal of the General Land Office to be hereunto affixed.

GIVEN under my hand, at the City of Washington, the EIGHTH day of APRIL in the year of our Lord one thousand nine hundred and TWENTY-NINE and of the Independence of the United States the one hundred and FIFTY-THIRD

By the President: Herbert Hoover

By Viola D Pugh, Secretary.

M. P. LeRoy

Recorder of the General Land Office.

RECORDED: Patent Number 1025718

SERIAL NO.

IN THE MATTER OF THE APPLICATION FOR PATENT OF THE RELIABLE EXTENSION, STANDARD, PACIFIC NO. 1, PACIFIC NO. 2, PACIFIC NO. 4, PACIFIC NO. 5, PACIFIC NO. 6, PACIFIC NO. 7, PACIFIC NO. 8, PANAMA NO. 1, PANAMA NO. 2, PANAMA NO. 3, PANAMA NO. 4, PANAMA NO. 5, DIGGER, PIUTE NO. 1, PIUTE NO. 2 AND PIUTE NO. 3 LODE MINING CLAIMS, MINERAL SURVEY NO. 5582A; AND SIOUX LODE MINING CLAIM, MINERAL SURVEY NO. 5953; CONSOLIDATED.	) AFFIDAVIT AS TO MINERAL CHARACTER OF CLAIMS

STATE OF California)
COUNTY OF Plumas,) SS.

H. A. GEISENDORFER, being first duly sworn, deposes and says:

That he is a citizen of the United States, over the age of twenty-one years, and resides in Berkeley, California; that he is a mining engineer by profession and has followed that occupation for many years; that he is now and since about the middle of the year 1926 has been Manager of the Walker Mining Company's mine in Plumas County, California, and in charge of the operation thereof; that prior to becoming such Manager he was employed by said mining company for several years as Mine Foreman and that he is well acquainted with the topographical, geological and mining conditions in the vicinity of said Walker mine where all of the above named mining claims are situated and that he is well acquainted with the mining claims named in the caption hereof and also hereinafter named, Mineral Surveys Nos. 5582A and 5953, all of which claims are located in Sec. 5, T. 22 N., R. 12 E. and Secs. 29, 30, 31 and 32, T. 25 N., R. 12 E., M.D.M., in an unorganized mining district, Plumas County, California.

All of said nineteen named mining claims are situated at an elevation of about 7000 feet on rocky slopes, and the land has

Anaconda Geological Documents Collection, American Heritage Center, University of Wyoming. This material may be protected by copyright law (Title 17, U.S. Code). For our full copyright policy, please contact the AHC by mail or email.

no value for agriculture. All of said land is mainly valuable for its mineral content.

The following is a statement as to the mineral character, the water courses and springs, if any, and the timber located on each of said claims.

RELIABLE EXTENSION: This claim is located on the Walker Mine Vein System and adjoins the Copper Center Extention Claim on its north end line, and the Standard Claim on its east side line, both Walker Mining Company Claims, the former a patented claim, Survey No. 4865. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district, and though the entire surface of the claim is covered by a recent lava flow, the mineralized Robinson Schist has been exposed in its northern portion by the mine workings.

The main adit tunnel of the Walker Mine connecting with the 7th level, bearing approximately N. 16° E., extends diagonally across the northern portion of the claim and penetrates a slightly mineralized granite before reaching the schist.

A small amount of ore from this claim carrying values in copper, gold and silver has been extracted and milled.

There are no springs or water courses on this claim.

This claim is poor timber land and has been cut over but contains some standing fir and cedar of poor quality.

STANDARD: This claim is located on the Walker Mine Vein System and adjoins the Bullion, a patented claim of the Walker Mining Company, Survey No. 4865, on its north end line. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district, and though the entire surface of this claim is covered by a recent lava flow, the mineralized Robinson Schist has been exposed by the underground workings of the Walker Mine in the northern end of this claim from a depth of 800 feet to a depth of 1300 feet vertically below the surface as exposed in 700 A

winze and its workings.

These workings have opened up wide veins of quartz in the mineralized Robinson Schist from which ore to the extent of many thousands of tons has been extracted and milled, carrying values in copper, gold and silver. Some drifts driving south from these workings have exposed a slightly mineralized granite.

There are no springs or water courses on this claim.

This claim is poor timber land and has been cut over but contains some standing timber, mostly fir of poor quality.

PACIFIC NO. 1: This claim is located on a belt of mineralized Robinson Schist paralleling the Walker Mine Vein System on the west. It adjoins the Copper Center, a patented claim of the Walker Mining Company, Survey No. 4865, on its east side line. The Robinson Schist, in which this vein system is located, is the mineral bearing rock of the district.

The entire surface of this claim is covered either with outcrops of the mineralized Robinson Schist, or with float of the same material, and quartz.

No ore has been extracted from this claim.

There are no springs or water courses on this claim.

There is considerable underbrush on this claim and some scattering fir and pine.

PACIFIC NO. 2: This claim is located on a belt of mineralized Robinson Schist paralleling the Walker Mine Vein System on the west. It adjoins the Copper Center Extention, a patented claim of the Walker Mining Company, Survey No. 4865, on its east side. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district.

South of Ward Creek this claim is covered by a recent lava flow, but north of Ward Creek the mineralized Robinson Schist is exposed as outcrops and float carrying considerable quartz.

No ore has been extracted from this claim.

There are no springs on this claim. Ward Creek flows across the claim but is often dry in late summer and fall.

The timber is not valuable. North of Ward Creek there is some scattering pine but to the south it is mostly fir of poor quality.

PACIFIC NO. 4: This claim is located on a belt of mineralized Robinson Schist paralleling the Walker Mine Vein System on the west. It adjoins the Pacific No. 1 Claim of the Walker Mining Company on its east side line. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district.

The entire surface of this claim is covered either with outcrops of the mineralized Robinson Schist, or with float of the same material, and quartz.

No ore has been extracted from this claim.

There are no springs or water courses on this claim.

There is considerable underbrush on this claim and some scattering fir and pine.

PACIFIC NO. 5: This claim is located on a belt of mineralized Robinson Schist paralleling the Walker Mine Vein System on the west. It adjoins the Valley View Extention, a patented claim of the Walker Mining Company, Survey No. 4865, on its east side line. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district.

The entire surface of this claim is covered either with outcrops of the mineralized Robinson Schist or with float of the same material and quartz.

No ore has been extracted from this claim.

There are nosprings or water courses on this claim.

There is considerable underbrush on this claim and some scattering fir and pine.

PACIFIC NO. 6: This claim is located on a belt of mineralized Robinson Schist paralleling the Walker Mine Vein System on the west. It adjoins the Pacific No. 5 Claim of the Walker Mining Company on its east side line. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district.

The entire surface of the claim is covered either with outcrops of the mineralized Robinson Schist or with float of the same material and quartz.

No ore has been extracted from this claim.

There are no springs or water courses on this claim.

There is considerable underbrush on this claim and some scattering fir and pine.

PACIFIC NO. 7: This claim is located on a belt of mineralized Robinson Schist paralleling the Walker Mine Vein System on the west. It adjoins the Valley View Claim, a patented claim of the Walker Mining Company, Survey No. 4865, on its east side line. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district.

The entire surface of this claim is covered either with outcrops of the mineralized Robinson Schist or with float of the same material and some quartz.

No ore has been extracted from this claim.

There are no springs or water courses on this claim.

There is considerable underbrush on this claim and some scattering fir and pine.

PACIFIC NO. 8: This claim is located on a belt of mineralized Robinson Schist paralleling the Walker Mine Vein System on the west. It adjoins the Pacific No. 7 Claim of the Walker Mining Company on its east side line. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district.

The entire surface of this claim is covered either with outcrops of the mineralized Robinson Schist, or with float of the same material, and some quartz.

No ore has been extracted from this claim.

There are no springs or water courses on this claim.

There is considerable underbrush on this claim and some scattering fir and pine.

PANAMA NO. 1: This claim is located on the Walker Mine Vein System and adjoins the Rob Extension, a patented claim of the Walker Mining Company, Survey No. 4865, on its west side line. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district and this schist is exposed over the greater portion of this claim.

The workings on the 10th level of the Walker Mine in Panama No. 2 Claim have penetrated to within 200 feet of the south end line of this claim and are in valuable veins carrying commercial values in copper, gold and silver. These veins are trending directly into this claim and will cross its south end line about 1400 feet beneath the surface and 200 feet east of the downward projection of its southwest corner. Also diamond drill holes Nos. 11 and 12, flat holes from the 6th level of the Walker Mine workings, the one 400 feet north of its south end line and nearly parallel with it, and the other 700 feet north of its south end line and nearly parallel with it, have penetrated this claim for a distance of 450 feet and 270 feet respectively, exposing the Robinson Schist with quartz and mineralization.

No ore has been extracted from this claim.

There are no springs or water courses on this claim.

Most of this claim is covered with a fair stand of a poor grade of fir.

PANAMA NO. 2: This claim is located on the Walker Mine

Vein System and adjoins the Rob, a patented claim of the Walker Mining Company, Survey No. 4865, on its west side line. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district. This schist is exposed on the northwestern portion of the claim, the remainder of the claim being covered by a recent lava flow.

The workings of the Walker Mine on the 9th and 10th levels have penetrated within the boundaries of this claim and have opened up wide veins of quartz in the Robinson Schist carrying commercial values in copper, gold and silver. Several thousand tons of ore from these workings has been extracted and milled.

There are no springs or water courses on this claim.

The timber on this claim is sparse. There is a little Tamarack pine and fir on each end of the claim, the central portion being open, flat, country.

PANAMA NO. 3: This claim is located on the Walker Mine Vein System and adjoins the Sioux Claim of the Walker Mining Company on its west side line. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district, and though the surface of this claim is covered with a recent lava flow, there is very good evidence that the Robinson Schist is the formation beneath the lava, for the following reasons. The schist is exposed on the northern portion of the Panama No. 2 Claim where it is not covered with lava, and this claim adjoins the Panama No. 3 on the north; though the Sioux Claim is entirely covered with lava, the underground workings of the mine have proved the schist to extend the full length of the Sioux Claim, which adjoins the Panama No. 3 on its west side line; also a diamond drill hole "D", starting from the face of 646 sublevel crosscut east, at a depth of 800 feet below the surface, extends N. 72° 30' E. horizontally, entirely across Panama No. 4 and Panama No. 5 Claims and exposes the mineralized schist below the lava, which covers the surface of

both of these claims. This drill hole crosses the center line of Panama No. 4 Claim approximately 150 feet south of the center of the south end line of the Sioux Claim, exposing mineralized schist, and crosses the center line of Panama No. 5 Claim approximately 335 feet south of the center of the south end line of Panama No. 3 Claim, exposing mineralized schist; so that with mineralized Robinson Schist exposed on three sides of Panama No. 3 Claim, it is evident that the mineralized Robinson Schist extends beneath the lava that covers this claim. It is possible the lava is but 100 to 200 feet deep, varying, however, with the contour of the old land surface on which it was outpoured.

No ore has been extracted from this claim.

There are no springs or water courses on this claim.

This claim is poor timber land and has been cut over but contains some standing timber, mostly fir of poor quality.

PANAMA NO. 4: This claim is located on the Walker Mine Vein System and adjoins the Standard Claim on its west side line and the Sioux Claim on its north end line, both Walker Mine claims. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district, and though the entire surface of the claim is covered by a recent lava flow, the mineralized Robinson Schist has been exposed for the entire width of the claim by diamond drill hole "D", except for certain dykes of granite.

Diamond drill hole "D" starts from the face of 646 sublevel crosscut east, at a vertical depth of 800 feet below the surface, extends N. 72° 30' E. horizontally across Panama No. 4 Claim and intersects the downward projection of its center line at a point approximately 150 feet south of the center of its north end line and about 800 feet deep. The schist carries quartz and values in copper, gold and silver.

No ore has been extracted from this claim.

There are no springs or water courses on this claim.

This claim is poor timber land and has been cut over but contains some standing timber, mostly fir of poor quality.

PANAMA NO. 5: This claim is located on the Walker Mine Vein System and adjoins the Panama No. 4 on its west side line and the Panama No. 3 on its north end line, both Walker Mine Claims. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district, and though the entire surface of the claim is covered by a recent lava flow, the mineralized Robinson Schist has been proved for the entire width of the claim by diamond drill hole "D".

Diamond drill hole "D" starts from the face of 646 sub-level crosscut east, at a depth of 800 feet below the surface, and extends N. 72° 30' E. horizontally across Panama No. 4 Claim and entirely across Panama No. 5 Claim, and pierces the downward projection of the center line of this claim approximately 335 feet south of its north center end and about 900 feet below the surface. The schist carries quartz and values in copper, gold and silver.

No ore has been extracted from this claim.

There are no springs or water courses on this claim.

This claim is poor timber land and has been cut over but contains some standing timber, mostly fir of poor quality.

DIGGER: This claim is located on the Walker Mine Vein System and adjoins the Rob Extension on its south end line and the Walker Extention on its west side line, both patented claims of the Walker Mining Company, Survey No. 4865. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district, and this schist is exposed over the entire surface of this claim, in which veins of quartz carrying values in copper, gold andsilver occur.

The workings of the Walker Mine have penetrated beneath

the boundaries of this claim and near its center ore to the extent of many thousand tons has been extracted and milled. The ore so far mined occurs from 400 feet to 800 feet vertically below the surface.

There are no springs or water courses on this claim.

A poor grade of fir timber covers most of the claim.

PIUTE NO. 1: This claim is located to the north on the Walker Mine vein system and adjoins the Digger, a Walker Mine claim, on its north end line. The Robinson Schist, in which this vein system is located, is the mineral bearing rock of the district.

The workings of the Walker Mine have penetrated beneath the boundaries of this claim, and a shaft, starting near the center of the claim, has connected with these workings. The 5th level from this shaft has been developed for a length of 1100 feet within the boundaries of this claim, showing a wide mineralized zone within the mineralized Robinson Schist, carrying commercial values in copper, gold and silver.

Commercial ore, to the extent of many thousand tons, has been extracted and milled.

On the surface the extreme north end of the claim is covered with a recent lava flow under which the veins extend. On the remainder of the claim the mineralized Robinson Schist is exposed.

There are several small springs on this claim near Piute Creek which crosses this claim. Both creek and springs go dry during the late summer and fall.

This claim is covered with a scattering growth of pine and fir.

PIUTE NO. 2: This claim is located to the north on the Walker Mine vein system and adjoins the Piute No. 1 Claim on its east side line and the Walker Extention Claim on its south end line, both Walker Mine claims, the latter a patented claim, Survey

No. 4865. The Robinson Schist, in which this vein system is located, is the mineral bearing rock of the district. The Walker Mining Company has blocked out many thousand tons of valuable ore in Piute No. 1 claim.

On the surface the Robinson Schist is exposed over the entire surface of the claim.

From the face of 601 sublevel crosscut west, 30 feet above the main seventh or adit level of the mine and at a point about 600 feet nearly vertically beneath Corner No. 4, Piute No. 1 Claim, drill hole No. 19 was driven west for a distance of 909 feet on a dip of plus 0° 31'. This hole penetrated to the center of Piute No. 2 Claim, exposing Robinson Schist the entire distance in which were zones carrying values in copper, gold and silver.

No ore has been extracted from this claim.

Piute Creek crosses this claim and there are several springs adjacent to the creek. Both creek and springs go dry during the late summer and fall.

This claim is covered with underbrush and a considerable growth of timber - a little pine but mostly fir of small dimensions.

PIUTE NO. 3: This claim is located to the north on the Walker Mine vein system, 900 feet westerly from an area on which the Walker Mining Company has developed a valuable deposit of commercial ore in the Robinson Schist. It adjoins the Valley View Claim, a patented claim of the Walker Mining Company, Survey No. 4865, on its south end line.

The mineralized Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district, and this schist is exposed over the entire surface of this claim, either as outcrops or as float with some quartz.

No ore has been extracted from this claim.

There are no springs or water courses on this claim.

This claim is covered with a thick growth of underbrush and considerable fir of small dimensions on its northern portion and with a scattering growth of pine and fir on its southern and higher portion. The ground slopes steeply to the north.

SIOUX: This claim is located on the Walker Mine Vein System and adjoins the Rob on its north end line and the Bullion on its west side line, both patented claims of the Walker Mining Company, Survey No. 4365. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district, and though the surface of the claim is covered with a recent flow of lava, the Robinson Schist is exposed for the whole length of the claim by the underground workings of the Walker Mine.

These underground workings down to the 10th level have opened up wide veins of quartz in the Robinson Schist from which ore to the extent of many thousands of tons has been extracted and milled.

There are no springs or water courses on this claim.

This claim is poor timber land and has been cut over but contains some standing timber, mostly fir of poor quality.

no value for agriculture. All of said land is mainly valuable for its mineral content.

The following is a statement as to the mineral character, the water courses and springs, if any, and the timber located on each of said claims.

RELIABLE EXTENSION: This claim is located on the Walker Mine Vein System and adjoins the Copper Center Extention Claim on its north end line, and the Standard Claim on its east side line, both Walker Mining Company Claims, the former a patented claim, Survey No. 4865. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district, and though the entire surface of the claim is covered by a recent lava flow, the mineralized Robinson Schist has been exposed in its northern portion by the mine workings.

The main adit tunnel of the Walker Mine connecting with the 7th level, bearing approximately N. 16° E., extends diagonally across the northern portion of the claim and penetrates a slightly mineralized granite before reaching the schist.

A small amount of ore from this claim carrying values in copper, gold and silver has been extracted and milled.

There are no springs or water courses on this claim.

This claim is poor timber land and has been cut over but contains some standing fir and cedar of poor quality.

STANDARD: This claim is located on the Walker Mine Vein System and adjoins the Bullion, a patented claim of the Walker Mining Company, Survey No. 4865, on its north end line. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district, and though the entire surface of this claim is covered by a recent lava flow, the mineralized Robinson Schist has been exposed by the underground workings of the Walker Mine in the northern end of this claim from a depth of 800 feet to a depth of 1300 feet vertically below the surface as exposed in 700 A

winze and its workings.

These workings have opened up wide veins of quartz in the mineralized Robinson Schist from which ore to the extent of many thousands of tons has been extracted and milled, carrying values in copper, gold and silver. Some drifts driving south from these workings have exposed a slightly mineralized granite.

There are no springs or water courses on this claim.

This claim is poor timber land and has been cut over but contains some standing timber, mostly fir of poor quality.

PACIFIC NO. 1: This claim is located on a belt of mineralized Robinson Schist paralleling the Walker Mine Vein System on the west. It adjoins the Copper Center, a patented claim of the Walker Mining Company, Survey No. 4865, on its east side line. The Robinson Schist, in which this vein system is located, is the mineral bearing rock of the district.

The entire surface of this claim is covered either with outcrops of the mineralized Robinson Schist, or with float of the same material, and quartz.

No ore has been extracted from this claim.

There are no springs or water courses on this claim.

There is considerable underbrush on this claim and some scattering fir and pine.

PACIFIC NO. 2: This claim is located on a belt of mineralized Robinson Schist paralleling the Walker Mine Vein System on the west. It adjoins the Copper Center Extention, a patented claim of the Walker Mining Company, Survey No. 4865, on its east side. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district.

South of Ward Creek this claim is covered by a recent lava flow, but north of Ward Creek the mineralized Robinson Schist is exposed as outcrops and float carrying considerable quartz.

No ore has been extracted from this claim.

There are no springs on this claim. Ward Creek flows across the claim but is often dry in late summer and fall.

The timber is not valuable. North of Ward Creek there is some scattering pine but to the south it is mostly fir of poor quality.

PACIFIC NO. 4: This claim is located on a belt of mineralized Robinson Schist paralleling the Walker Mine Vein System on the west. It adjoins the Pacific No. 1 Claim of the Walker Mining Company on its east side line. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district.

The entire surface of this claim is covered either with outcrops of the mineralized Robinson Schist, or with float of the same material, and quartz.

No ore has been extracted from this claim.

There are no springs or water courses on this claim.

There is considerable underbrush on this claim and some scattering fir and pine.

PACIFIC NO. 5: This claim is located on a belt of mineralized Robinson Schist paralleling the Walker Mine Vein System on the west. It adjoins the Valley View Extention, a patented claim of the Walker Mining Company, Survey No. 4865, on its east side line. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district.

The entire surface of this claim is covered either with outcrops of the mineralized Robinson Schist or with float of the same material and quartz.

No ore has been extracted from this claim.

There are nosprings or water courses on this claim.

There is considerable underbrush on this claim and some scattering fir and pine.

PACIFIC NO. 6: This claim is located on a belt of mineralized Robinson Schist paralleling the Walker Mine Vein System on the west. It adjoins the Pacific No. 5 Claim of the Walker Mining Company on its east side line. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district.

The entire surface of the claim is covered either with outcrops of the mineralized Robinson Schist or with float of the same material and quartz.

No ore has been extracted from this claim.

There are no springs or water courses on this claim.

There is considerable underbrush on this claim and some scattering fir and pine.

PACIFIC NO. 7: This claim is located on a belt of mineralized Robinson Schist paralleling the Walker Mine Vein System on the west. It adjoins the Valley View Claim, a patented claim of the Walker Mining Company, Survey No. 4865, on its east side line. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district.

The entire surface of this claim is covered either with outcrops of the mineralized Robinson Schist or with float of the same material and some quartz.

No ore has been extracted from this claim.

There are no springs or water courses on this claim.

There is considerable underbrush on this claim and some scattering fir and pine.

PACIFIC NO. 8: This claim is located on a belt of mineralized Robinson Schist paralleling the Walker Mine Vein System on the west. It adjoins the Pacific No. 7 Claim of the Walker Mining Company on its east side line. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district.

The entire surface of this claim is covered either with outcrops of the mineralized Robinson Schist, or with float of the same material, and some quartz.

No ore has been extracted from this claim.

There are no springs or water courses on this claim.

There is considerable underbrush on this claim and some scattering fir and pine.

PANAMA NO. 1: This claim is located on the Walker Mine Vein System and adjoins the Rob Extension, a patented claim of the Walker Mining Company, Survey No. 4865, on its west side line. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district and this schist is exposed over the greater portion of this claim.

The workings on the 10th level of the Walker Mine in Panama No. 2 Claim have penetrated to within 200 feet of the south end line of this claim and are in valuable veins carrying commercial values in copper, gold and silver. These veins are trending directly into this claim and will cross its south end line about 1400 feet beneath the surface and 200 feet east of the downward projection of its southwest corner. Also diamond drill holes Nos. 11 and 12, flat holes from the 6th level of the Walker Mine workings, the one 400 feet north of its south end line and nearly parallel with it, and the other 700 feet north of its south end line and nearly parallel with it, have penetrated this claim for a distance of 450 feet and 270 feet respectively, exposing the Robinson Schist with quartz and mineralization.

No ore has been extracted from this claim.

There are no springs or water courses on this claim.

Most of this claim is covered with a fair stand of a poor grade of fir.

PANAMA NO. 2: This claim is located on the Walker Mine

Vein System and adjoins the Rob, a patented claim of the Walker Mining Company, Survey No. 4865, on its west side line. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district. This schist is exposed on the northwestern portion of the claim, the remainder of the claim being covered by a recent lava flow.

The workings of the Walker Mine on the 9th and 10th levels have penetrated within the boundaries of this claim and have opened up wide veins of quartz in the Robinson Schist carrying commercial values in copper, gold and silver. Several thousand tons of ore from these workings has been extracted and milled.

There are no springs or water courses on this claim.

The timber on this claim is sparse. There is a little Tamarack pine and fir on each end of the claim, the central portion being open, flat, country.

PANAMA NO. 3: This claim is located on the Walker Mine Vein System and adjoins the Sioux Claim of the Walker Mining Company on its west side line. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district, and though the surface of this claim is covered with a recent lava flow, there is very good evidence that the Robinson Schist is the formation beneath the lava, for the following reasons. The schist is exposed on the northern portion of the Panama No. 2 Claim where it is not covered with lava, and this claim adjoins the Panama No. 3 on the north; though the Sioux Claim is entirely covered with lava, the underground workings of the mine have proved the schist to extend the full length of the Sioux Claim, which adjoins the Panama No. 3 on its west side line; also a diamond drill hole "D", starting from the face of 646 sublevel crosscut east, at a depth of 800 feet below the surface, extends N. 72° 30' E. horizontally, entirely across Panama No. 4 and Panama No. 5 Claims and exposes the mineralized schist below the lava, which covers the surface of

both of these claims. This drill hole crosses the center line of Panama No. 4 Claim approximately 150 feet south of the center of the south end line of the Sioux Claim, exposing mineralized schist, and crosses the center line of Panama No. 5 Claim approximately 335 feet south of the center of the south end line of Panama No. 3 Claim, exposing mineralized schist; so that with mineralized Robinson Schist exposed on three sides of Panama No. 3 Claim, it is evident that the mineralized Robinson Schist extends beneath the lava that covers this claim. It is possible the lava is but 100 to 200 feet deep, varying, however, with the contour of the old land surface on which it was outpoured.

No ore has been extracted from this claim.

There are no springs or water courses on this claim.

This claim is poor timber land and has been cut over but contains some standing timber, mostly fir of poor quality.

PANAMA NO. 4: This claim is located on the Walker Mine Vein System and adjoins the Standard Claim on its west side line and the Sioux Claim on its north end line, both Walker Mine claims. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district, and though the entire surface of the claim is covered by a recent lava flow, the mineralized Robinson Schist has been exposed for the entire width of the claim by diamond drill hole "D", except for certain dykes of granite.

Diamond drill hole "D" starts from the face of 646 sublevel crosscut east, at a vertical depth of 800 feet below the surface, extends N. 72° 30' E. horizontally across Panama No. 4 Claim and intersects the downward projection of its center line at a point approximately 150 feet south of the center of its north end line and about 800 feet deep. The schist carries quartz and values in copper, gold and silver.

No ore has been extracted from this claim.

There are no springs or water courses on this claim.

This claim is poor timber land and has been cut over but contains some standing timber, mostly fir of poor quality.

PANAMA NO. 5: This claim is located on the Walker Mine Vein System and adjoins the Panama No. 4 on its west side line and the Panama No. 3 on its north end line, both Walker Mine Claims. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district, and though the entire surface of the claim is covered by a recent lava flow, the mineralized Robinson Schist has been proved for the entire width of the claim by diamond drill hole "D".

Diamond drill hole "D" starts from the face of 646 sub-level crosscut east, at a depth of 800 feet below the surface, and extends N. 72° 30' E. horizontally across Panama No. 4 Claim and entirely across Panama No. 5 Claim, and pierces the downward projection of the center line of this claim approximately 335 feet south of its north center end and about 900 feet below the surface. The schist carries quartz and values in copper, gold and silver.

No ore has been extracted from this claim.

There are no springs or water courses on this claim.

This claim is poor timber land and has been cut over but contains some standing timber, mostly fir of poor quality.

DIGGER: This claim is located on the Walker Mine Vein System and adjoins the Rob Extension on its south end line and the Walker Extention on its west side line, both patented claims of the Walker Mining Company, Survey No. 4365. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district, and this schist is exposed over the entire surface of this claim, in which veins of quartz carrying values in copper, gold andsilver occur.

The workings of the Walker Mine have penetrated beneath

the boundaries of this claim and near its center ore to the extent of many thousand tons has been extracted and milled. The ore so far mined occurs from 400 feet to 800 feet vertically below the surface.

There are no springs or water courses on this claim.

A poor grade of fir timber covers most of the claim.

PIUTE NO. 1: This claim is located to the north on the Walker Mine vein system and adjoins the Digger, a Walker Mine claim, on its north end line. The Robinson Schist, in which this vein system is located, is the mineral bearing rock of the district.

The workings of the Walker Mine have penetrated beneath the boundaries of this claim, and a shaft, starting near the center of the claim, has connected with these workings. The 5th level from this shaft has been developed for a length of 1100 feet within the boundaries of this claim, showing a wide mineralized zone within the mineralized Robinson Schist, carrying commercial values in copper, gold and silver.

Commercial ore, to the extent of many thousand tons, has been extracted and milled.

On the surface the extreme north end of the claim is covered with a recent lava flow under which the veins extend. On the remainder of the claim the mineralized Robinson Schist is exposed.

There are several small springs on this claim near Piute Creek which crosses this claim. Both creek and springs go dry during the late summer and fall.

This claim is covered with a scattering growth of pine and fir.

PIUTE NO. 2: This claim is located to the north on the Walker Mine vein system and adjoins the Piute No. 1 Claim on its east side line and the Walker Extention Claim on its south end line, both Walker Mine claims, the latter a patented claim, Survey

No. 4865. The Robinson Schist, in which this vein system is located, is the mineral bearing rock of the district. The Walker Mining Company has blocked out many thousand tons of valuable ore in Piute No. 1 claim.

On the surface the Robinson Schist is exposed over the entire surface of the claim.

From the face of 601 sublevel crosscut west, 30 feet above the main seventh or adit level of the mine and at a point about 600 feet nearly vertically beneath Corner No. 4, Piute No. 1 Claim, drill hole No. 19 was driven west for a distance of 909 feet on a dip of plus 0° 31'. This hole penetrated to the center of Piute No. 2 Claim, exposing Robinson Schist the entire distance in which were zones carrying values in copper, gold and silver.

No ore has been extracted from this claim.

Piute Creek crosses this claim and there are several springs adjacent to the creek. Both creek and springs go dry during the late summer and fall.

This claim is covered with underbrush and a considerable growth of timber - a little pine but mostly fir of small dimensions.

PIUTE NO. 3: This claim is located to the north on the Walker Mine vein system, 900 feet westerly from an area on which the Walker Mining Company has developed a valuable deposit of commercial ore in the Robinson Schist. It adjoins the Valley View Claim, a patented claim of the Walker Mining Company, Survey No. 4865, on its south end line.

The mineralized Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district, and this schist is exposed over the entire surface of this claim, either as outcrops or as float with some quartz.

No ore has been extracted from this claim.

There are no springs or water courses on this claim.

This claim is covered with a thick growth of underbrush and considerable fir of small dimensions on its northern portion and with a scattering growth of pine and fir on its southern and higher portion. The ground slopes steeply to the north.

SIOUX: This claim is located on the Walker Mine Vein System and adjoins the Rob on its north end line and the Bullion on its west side line, both patented claims of the Walker Mining Company, Survey No. 4865. The Robinson Schist, in which this vein system occurs, is the mineral bearing rock of the district, and though the surface of the claim is covered with a recent flow of lava, the Robinson Schist is exposed for the whole length of the claim by the underground workings of the Walker Mine.

These underground workings down to the 10th level have opened up wide veins of quartz in the Robinson Schist from which ore to the extent of many thousands of tons has been extracted and milled.

There are no springs or water courses on this claim.

This claim is poor timber land and has been cut over but contains some standing timber, mostly fir of poor quality.

GENERAL LAND OFFICE

MINERAL SURVEY No. 6137

Sacramento Land District.

FIELD NOTES

Of The Survey Of The Mining Claim Of

Walker Mining Company

Known As The

TWO POUNDER, THREE POUNDER, RED BIRD No.1, RED BIRD No.3 and PAPAA No.6 LODES

No organized Mining District,

Plumas County, California

Sections 29, 30 and 32 Township 25 North, Range 12 East, M.D.M.

Surveyed under instructions dated September 22, 1932.

by James A. Ingols
U. S. Mineral Surveyor.

Claim located (See back of this sheet) 19--

Survey commenced October 10, 1932.

Survey completed October 26, 1932.

Address of claimant's attorneys: Van Cott, Ritter & Farnsworth,
Walker Bank Building,
Salt Lake City, Utah.

DATES OF AMENDED LOCATIONS.

September 14, 1932.

NOTICE OF QUARTZ MINING LOCATION

(AMENDED)

##########

NOTICE IS HEREBY GIVEN that the undersigned corporation of the United States, by its duly authorized representative, having complied with the requirements of Chapter Six of Title Thirty-Two of the Revised Statutes of the United States and Regulations thereunder, and with the local customs laws and regulations, has located and hereby claims under the name of

TWO POUNDER LODE

fifteen hundred linear feet of this ledge, commencing at this notice, posted at the Point of Discovery and running

11.9 feet in a southerly direction and
1486.15 feet in a northerly direction

together with 300 feet of surface ground on each side of said lode line.

THIS SAID LOCATION is situated in no organized Mining District, Indian Township, Plumas County, State of California on surveyed land of the United States and is particularly described as follows, to-wit:-

Beginning at the Discovery Monument:-
Thence Southerly 11.9 feet to the South End Center stake
Thence Southwesterly 315.73 feet to the S.W.Corner, Identical with Cor. Nos.4-2 Sur. No.5582A Plute No.1 and and Digger lodes
Thence Northerly 1498.05 feet to the N.W. Corner Identical with Cor. No.1 Sur. No.5582A Plute No.1 lode
Thence Northeasterly 315.73 feet to the North End Center Stake
Thence Northeasterly 315.48 feet to the N.W.Corner, An iron pipe, 1.25 inches in diam., painted red, set in the ground in cement.
Thence Southerly 1498.05 feet to the S.E. Corner An iron pipe, 1.25 inches in diam., painted red, set in the ground in cement.
Thence Southwesterly 315.48 feet to the South End Center Stake, the place of olosure.

This being the same lode located July 1st, 1928 and recorded July 25th 1928 in Volume 17, Page 303 (Quartz) in the office of the County Recorder of Plumas County, State of California.

This additional and amended certificate of location is made without waiver of any previously acquired rights, but for the purpose of more correctly defining the boundaries of the location.

DATED AND POSTED on the lode at the Point of Discovery this 14th day of September A.D. 1932.

Walker Mining Company
by H. A. Geisendorfer, Agent.

NOTICE OF QUARTZ MINING LOCATION

AMENDED

NOTICE IS HEREBY GIVEN that the undersigned, a corporation of the United States, by its duly authorized representative, having complied with the requirements of Chapter Six of Title Thirty-Two of the Revised Statutes of the United States and Regulations thereunder, and with the local customs laws and regulations, has located and hereby claims under the name of

THREE POUNDER LODE

fifteen hundred linear feet of this ledge, commencing at this notice, posted at the Point of Discovery and running

10.32 feet in a Southerly direction and
1487.73 feet in a Northerly direction

together with 300 feet of surface ground on each side of said lode line.

THE SAID LOCATION is situated in no organized Mining District, Indian Township, Plumas County, State of California on surveyed land of the United States and is particularly described as follows, To-wit:-

Beginning at the Discovery Monument:-
Thence Southerly 10.32 feet to the South End Center Stake
Thence Southwesterly 315.73 feet to the S.W.Corner, Identical with S.E. Cor. Two Pounder Lode
An iron pipe 1.25 inches in diam., painted red, set in the ground in cement.
Thence Northerly 1498.05 feet to the N.W.Corner, Identical with N.E.Cor. Two Pounder Lode
An iron pipe 1.25 inches in diam., painted red, set in the ground in cement.
Thence Northeasterly 315.73 feet to the North End Center Stake
Thence Northeasterly 315.73 feet to the N.E.Corner, An iron pipe 1.25 inches in diam., painted red, set in the ground in cement.
Thence Southerly 1498.05 feet to the S.E.Corner, An iron pipe 1.25 inches in diam., painted red, set in the ground in cement.
Thence Southwesterly 315.73 feet to the South End Center Stake, the place of closure.

This being the same lode located July 1st. 1928 and recorded July 25th. 1928 in Volume 17, Page 303 (Quartz) in the Office of the County Recorder of Plumas County, State of California.

This additional and amended certificate of location is made without waiver of any previously acquired rights but for the purpose of more correctly defining the boundaries of the location.

DATED AND POSTED on the lode at the Point of Discovery this 14th day of September A.D. 1932.

SURVEY No. 6137.

Feet

Mineral Survey No.6137 was made with a Buff and Berger Transit No.2369, with horizontal limb 5.00 ins. diam., having two double opposite verniers, and full vertical circle 5.00 ins. diam., having one double vernier; the verniers read to one minute of arc. The instrument was in good condition at the time of the survey and all adjustments were in good order. A.M. and p.m. altitude observations of the sun for azimuth were made each day, when conditions permitted, the details of two of which observations are shown in the calculation sheets herewith submitted for examination. All azimuths in this record are referred to the true meridians thus determined, by the method of deflection angles and calculated courses.

The lines were measured with a steel tape 500 feet in length, graduated every foot, with the first and last foot graduated to tenths and hundredths; a steel tape 100 feet in length and a steel tape 50 feet in length, each graduated to feet, tenths and hundredths; all tapes have been checked, and found correct.

All lines and connections of this survey were run by traverse methods, to avoid cutting valuable timber, as shown by the calculation sheets herewith submitted.

The magnetic variation is given at each corner of the survey.

RED BIRD No.1 LODE

Beginning at Cor. No.1 of the Red Bird No.1 lode, which is identical with Cor. No.1 of Sur. No.4865 Rob Extension lode, claimant Herein, and with Cor. Nos.1-1 of Sur. No.5582 A, Digger and Panama No.1 lodes, claimant Herein.

	A fir, 32 ins. diam., bears S.28°59'E., 41.86 ft. dist., mkd. 3-FWI-5582A-BT. and which I mkd. 4-6137-P6.
	Thence N.14°21'42"W. Var.17°51'E.
290	Road, bears northwesterly and southeasterly.
1,469.43	Cor. No. 1, and place of beginning.

LODE LINES.

The presumed course of the vein of each of the several locations embraced in this survey, counted from the respective points of discovery, is as follows:

Red Bird No. 1 lode, N.14°18'15"W., 10.8 ft., and S.14°18'15"E., 1488.79 ft.

Two Pounder lode, S.14°54'E., 11.9 ft., and, N.14°54'W., 1486.15 ft.

Three Pounder lode, S.14°54'E., 10.32 ft., and, N.14°54'W., 1487.73 ft.

Anaconda Geological Documents Collection, American

SURVEY No. 6137

Red Bird No. 13 lode, N.14°18'15"W., 13.93 ft., and S.14°18'15"E., 1485.66 ft.

Panama No. 6 lode, S.14°11'42"E., 17.7 ft.; and, N.14° 11'42"W., 1451.73 ft.

AREAS.

Total area, Three Pounder lode.....	20.634
Total area, Red Bird No. 13 lode.....	20.584
Total area, Panama No. 6 lode.....	20.157

LOCATION.

This survey is located in the NW¼ and SW¼ sec. 29, NE¼ and SE¼ sec. 30, and NW¼ sec. 32, T.25 N., R.12 E., M. D. M.

The survey of the several lodes as stated herein is identical with the respective amended location as marked on the ground.

EXPENDITURE OF $500.

I certify that the value of the labor and improvements made upon or for the benefit of each of the locations embraced in said mining claim by the claimant or its grantors is not less than $500, and that said improvements consist of:

No. 1. The discovery point of the Red Bird No. 1 lode, which is on the lode line 10.8 ft. from a point on line 2-3, 315.73 ft. from Cor. No. 2.
No value.

No. 1. The discovery point of the Two Pounder lode, which is on the lode line 11.9 ft. from a point on line 1-2, 315.48 ft. from Cor. No. 1.
No value.

No. 1. The discovery point of the Three Pounder lode, which is on the lode line 10.32 ft. from the middle of line 1-2.
No value.

No. 1. The discovery point of the Red Bird No. 13 lode, which is on the lode line 13.93 ft. from the middle of line 2-3.
No value.

No. 1. The discovery point of the Panama No. 6 lode, which is on the lode line 17.7 ft. from a point on line 3-4, 315.73 ft. from Cor. No. 3.
No value.

An interest in a common improvement described as follows:

A tunnel 4x6 ft. in size, the portal of which bears N.39°33'W., 639.1 ft. from Cor. No. 2 Two Pounder lode running S.88°48'E., 98.6 ft. to pt. A; thence N.88°21' E., 44.9 ft. to pt. B at face. At pt. B is a two compartment timbered incline shaft 7x11 ft. in size, running on a dip of 45° N.88°15'E., 100.7 ft. to pt. C; thence N.89°36'E., 175.7 ft. to pt. D; thence N.89° 37'E., 202.8 ft. to point E on the 7th level. At pt. E, a drift 8x10 ft. in size, runs N.1°14'W., 95.2 ft. to pt. F; thence S.11°25'W., 68 ft. to pt. G; thence S.12°38'W., 20 ft. to pt. H; thence S.0°54'W., 50.06 ft. to pt. I.
Value of incline shaft and drift, $19,365.

The incline shaft and drift in this improvement were constructed for the development of the five lodes of this survey, all of which being within range of benefit of said improvement.

The surface rises rapidly to the east, and more gradually to the southeast, from the portal of the tunnel which, with the incline shaft, drift and laterals, form an integral part of the main operating and ventilating system of the claimant's contiguous property, and through, and by means of, that system is afforded the most practical and economical means of developing each of said lodes at depth. The geological structure is that of schist, cut by fissures running northerly and southerly, and dipping easterly. The ore bodies throughout the mine are in this schist and, except where outcrops occur, the schist is covered with a lava flow.

From the foot of the incline shaft, a winze extends from the 7th level to the 10th level, approximately 500 ft. lower, with many feet of lateral drifts and crosscuts. The mine assay and development maps, and the monthly progress reports, show that these drifts and crosscuts extend nearly to the east side line of the Red Bird No. 13 lode of this survey, thence southerly several hundred feet, into said lode; the assay values being such as to warrant the claimant in continuing that method of developing the locations embraced in this survey. At the time of this survey, owing to the temporary closure of the mine, this winze and its laterals were filled with water to the 7th level.

Five hundred dollars or over has been expended in the incline shaft and drift in such a manner as tends to the development of each lode of this survey subsequent to its location and to the time since which common ownership and contiguity have prevailed.

The tunnel, valued at $1500, was credited to Sur. No. 5582A Piute lode, and therefore is not included in the valuation of the common improvement.

The incline shaft was driven as a raise from the 7th level, or main haulage level of the claimant's contiguous property, which latter is partially described hereinafter under "Other Improvements".

The first, or lower, 130.5 ft. of the raise, valued at $4567.50, were driven in May and June, 1928, for the purpose of developing the Red Bird No. 1 lode of this survey, to which its value is credited.

The remaining 348.7 ft. of said raise, valued at $12,197.50, were driven between July 1 and December 1, 1928, for the purpose of developing the Red Bird No. 1, Two Pounder and Three Pounder lodes of this survey, and an undivided one-third interest is therefore credited to each.

The last 130 ft. of the drift, valued at $2600, were driven during July and August, 1930, for the benefit of

Anaconda Geological Documents Collection, American

SURVEY No. 6137.

the Two Pounder, Three Pounder, Red Bird No. 1, Red Bird No.13, and Panama No.6 lodes of this survey, and therefore an undivided one-fifth interest is credited to each.

Except as above stated, no portion of or interest in this improvement has been credited heretofore as patent expenditure to any lode claim.

OTHER IMPROVEMENTS.

A drift which runs from pt. I of the above described common improvement, S.4°01'W., 82.13 ft., thence S.10° E., 25.95 ft., thence South 108.5 ft., thence S.24°49'W. 22.50 ft., thence South 310.9 ft., thence southerly on the 7th or main haulage level to portal.

Claimant herein.

A drift which runs from pt. E of the above described common improvement, N.83°45'E., 27.0 ft. to Sta. 1, thence N.0°42'E., 80.96 ft., thence N.0°24'E., 99.18 ft., thence N.31°59'W., 34 ft., thence N.2°15'W., 77.82 ft., thence N.7°15'E., 52.99 ft., thence N.22°50'E., 56.22 ft., thence N.15°E., 43.2 ft. to face.

Claimant herein.

A drift which runs from Sta. 1 in the preceding improvement, S.15°36'E., 63.4 ft., thence S.2°34'E., 102.6 ft., thence S.25°42'E., 24.16 ft., thence S.13°10'E., 48.37 ft., thence S.23°12'W., 31.11 ft., thence S.28°19' E.,48.43 ft., thence S.14°W., 78.83 ft., thence S.8°09'W, 64.24 ft., thence S.43°15'E., 55.07 ft., thence S.35°41' E., 19.19 ft., thence S.22°03'E., 34.61 ft. to face.

Claimant herein.

OTHER CORNER DESCRIPTIONS.

Sur. No. 5582A Panama No.1 lode: Cor. No.2 is a spruce post 4x5 ins., 24 ins. above ground, mkd. 2-PM1-5582A, badly rotted at the ground line and very unstable, I replaced it with the iron pipe previously described, with the original post alongside. Line 1-2 was found to be N.56°56'E., 631.21 ft., instead of N.57°23'E., 632.57 ft. as approved. Line 2-3 was found to be S.14°11'42"E., 1469.43 ft., instead of S.14°09'E.,1467.9 ft. as approved.

Sur. No. 5582A Digger lode: Line 1-2 was found to be N.14°18'15"W.,1499.59 ft., instead of N.14°12'W.,1499.6 ft. as approved.

Sur. No. 5582A Piute No.1 lode: Line 4-1 was found to be N.14°54'W.,1498.05 ft., instead of N.14°09'W., 1500 ft. as approved.

Sur. No. 5948 September Morn No.1 lode: Cor. No.1 is a galvanized iron pipe, 1¼ ins. diam., 18 ins. above ground and in a mound of stone, with brass cap mkd. SM1-1-5948. Cor. No.2 is a galvanized iron pipe, 1¼ ins. diam., 18 ins. above ground, and in a mound of stone, with brass cap mkd. SM1-2-5948. Cor. No.4 is a galvanized iron pipe 1¼ ins. diam., 18 ins. above ground, and in a mound of stone, with brass cap mkd. SM1-4-5948. I find line 1-2 to be N.7°26'E.,1506.96 ft., instead of N.7°E.,1500 ft. as approved. I find line 4-1 to be N.56°56'E.,775.76 ft. instead of N.57°E. 783.2 ft. as approved.

The section line between the SW¼ sec.29 and SE¼ sec.30 T.25 N.,R.12 E., M.D.M., was found to be N.0°05'30"E., 2653.64 ft., instead of North 2640 ft. as approved.

Note: The disagreements between these field notes and the amended location certificates are due to errors in the latter.

REPORT

The boundaries of Lot 6, Sec.5 and the S½ SW¼ SW¼ SW¼ Sec.32, were computed through the official returns of U. S. Mineral Surveyor William Watson for the several boundaries of said Secs.5 and 32 given in the original field notes of Sur. No. 5582 A and B; the lengths of the east and west bounderies of said Lot 6, Sec.5 being derived by a proportion with said east and west boundaries as shown on the supplemental plat of Secs. 5 and 6, T.24 N., R.12 E., M.D.M. accepted August 27, 1928.

Notice ~~to be~~ published.

UNITED STATES LAND OFFICE, SACRAMENTO, CALIFORNIA.

NOTICE is hereby given that Walker Mining Company, a corporation, whose post office address is Walkermine, Plumas County, California, by H. A. Heinsdorfer, its agent and attorney-in-fact, whose post office address is Care Walker Mining Company, Walkermine, Plumas County, California, has filed in the office of the Register of the United States Land Office at Sacramento, California, an application for United States patent for the Reliable Extension, Standard, Pacific No. 1, Pacific No. 2, Pacific No. 4, Pacific No. 5, Pacific No. 6, Pacific No. 7, Pacific No. 8, Panama No. 1, Panama No. 2, Panama No. 3, Panama No. 4, Panama No. 5, Digger, Piute No. 1, Piute No. 2 and Piute No. 3 lode mining claims, Mineral Survey No. 5582A; and Sioux lode mining claim, Mineral Survey No. 5953; consolidated, situated in no organized mining district, Plumas County, California, and designated by the field notes and official plat on file in the United States Public Survey Office at Glendale, California, as Mineral Surveys Nos. 5582A and 5953 as aforesaid, situated in Sec. 5, T. 24 N., R. 12 E. and Secs. 29, 30, 31 and 32, T. 25 N., R. 12 E., M.D.M., Plumas County, California.

Said nineteen above named lode mining claims are described in four groups (designated (a), (b), (c), and (d)) by the exterior boundaries of the respective groups as follows:

(a) Pacific No. 1, Pacific No. 2, Pacific No. 4, Pacific No. 5, Pacific No. 6, Pacific No. 7 and Pacific No. 8 lode mining claims, Survey No. 5582A.

Beginning at corner No. 2, Pacific No. 2 lode, identical with corner No. 1, Reliable Extension lode, whence the section corner common to Secs. 31 and 32, T. 25 N., R. 12 E., and Secs. 5 and 6, T. 24 N., R. 12 E., M.D.M., bears S. 6° 42' W. 796.8 feet; thence S. 70° 34' W. 616.2 feet to corner No. 1 of said Pacific No. 2 lode; thence N. 32° 37' W. 1500.0 feet to corner No. 4 of said Pacific No. 2 lode; thence S. 70° 34' W. 714.9 feet to corner No. 1, Pacific No. 4 lode; thence N. 41° 52' W. 1500.0 feet to corner No. 4 of said Pacific No. 4 lode; thence N. 70° 34' E. 142.3 feet to corner No. 3 Pacific No. 6 lode; thence N. 14° 07' W. 1467.9 feet to corner No. 2 of said Pacific No. 6 lode, identical with corner No. 3, Pacific No. 8 lode; thence N. 14° 45' W. 1494.0 feet to corner No. 2 of said Pacific No. 8 lode;

Anaconda Geological Documents Collection, American Heritage Center, University of Wyoming. This material may be protected by copyright law (Title 17, U.S. Code). For our full copyright policy, please contact the AHC by mail or email.

thence E. 70° 34' E. 1204.0 feet to corner No. 4, Pacific No. 7 lode, identical with corner No. 1, Piute No. 3 lode; thence S. 14° 45' E. 1494.0 feet to corner No. 3 of said Pacific No. 7 lode, identical with corner No. 2, Pacific No. 6 lode; thence S. 14° 09' E. 1467.0 feet to corner No. 3 of said Pacific No. 6 lode; thence S. 70° 34' W. 49.1 feet to corner No. 2, Pacific No. 1 lode; thence S. 41° 22' E. 1530.0 feet to corner No. 1 of said Pacific No. 1 lode; thence N. 70° 34' E. 32.9 feet to corner No. 3 of said Pacific No. 2 lode; thence S. 32° 37' E. 1500.0 feet to corner No. 2 of said Pacific No. 2 lode, the place of beginning; containing a net area claimed and applied for in this group of 143.577 acres, more or less.

There are no conflicting claims.

(b) Digger, Piute No. 1, Piute No. 2, and Piute No. 3 lode mining claims, Survey No. 5582A.

Beginning at corner No. 1, Digger lode, identical with corner No. 1, Panama No. 1 lode, whence the section corner common to Secs. 28, 29, 31 and 32, T. 25 N., R. 18 E., M.D.M., bears S. 61° 47' E. 456.8 feet; thence S. 57° 23' E. 632.57 feet to corner No. 4 of said Digger lode; thence N. 14° 12' W. 1460.8 feet to corner No. 5 of said Digger lode, identical with corners Nos. 3 and 2, Piute No. 1 and Piute No. 2 lodes, respectively; thence S. 57° 23' E. 651.4 feet to corner No. 1 of said Piute No. 2 lode, identical with corner No. 2, Piute No. 3 lode; thence S. 70° 34' W. 600.0 feet to corner No. 1 of said Piute No. 3 lode, identical with corner No. 4, Pacific No. 7 lode; thence N. 14° 09' W. 1500.0 feet to corner No. 4 of said Piute No. 3 lode; thence N. 70° 34' E. 600.0 feet to corner No. 3 of said Piute No. 3 lode, identical with corner No. 4 of said Piute No. 2 lode; thence N. 57° 23' E. 1303.07 feet to corner No. 1 of said Piute No. 1 lode; thence S. 14° 09' E. 1500.0 feet to corner No. 4 of said Piute No. 1 lode, identical with corner No. 2 of said Digger lode; thence S. 14° 12' E. 1499.6 feet to corner No. 1 of said Digger lode, the place of beginning; containing a net area claimed and applied for in this group of 62.517 acres, more or less. Combined with September Mores Nos 1-4

~~There are no conflicting claims to be excluded.~~ M.S. 5948 but these combinets are not to be excluded

(c) Panama No. 1, Panama No. 2, Panama No. 3, Panama No. 4, Panama No. 5, Standard and Reliable Extension lode mining claims, Survey No. 5582A.

Beginning at corner No. 1, Reliable Extension lode, identical with corner No. 2, Pacific No. 2 lode, whence the section corner common to Secs. 31 and 32, T. 25 N., R. 18 E., and Secs. 5 and 6, T. 24 N., R. 18 E., M.D.M., bears S. 5° 20' W. 705.0 feet; thence S. 32° 37' E. 1500.0 feet to corner No. 4 of said Reliable Extension lode; thence N. 70° 34' E. 616.2 feet to corner No. 3 of said Reliable Extension lode, identical with corner No. 4, Standard lode; thence N. 57° 23' E. 1900.0 feet to corner No. 2, Panama No. 5 lode; thence N. 32° 37' W. 3000.0 feet to corner No. 3, Panama No. 3 lode; thence E. 57° 23' E. 15.2 feet to corner No. 4, Panama No. 2 lode;

Anaconda Geological Documents Collection-American Heritage Center, University of Wyoming. This material may be protected by copyright law (Title 17, U.S. Code). For fair use/copyright policy, please contact the AHC by mail or email.

thence N. 41° 43' W. 1499.4 feet to corner No. 1 of said Panama No. 2 lode; thence N. 57° 23' E. 62.34 feet to corner No. 3, Panama No. 1 lode; thence N. 14° 09' W. 1467.9 feet to corner No. 2 of said Panama No. 1 lode; thence S. 57° 23' W. 632.57 feet to corner No. 1 of said Panama No. 1 lode, identical with corner No. 1, Digger lode; thence S. 14° 09' E. 1467.9 feet to corner No. 4 of said Panama No. 1 lode; thence S. 57° 23' W. 37.57 feet to corner No. 2 of said Panama No. 2 lode; thence S. 41° 43' E. 1499.4 feet to corner No. 3 of said Panama No. 2 lode; thence S. 57° 23' W. 7.6 feet to corner No. 4 of said Panama No. 3 lode, identical with corner No. 2, Sioux lode, Survey No. 6953; thence S. 32° 37' E. 1500.0 feet to corner No. 1 of said Panama No. 3 lode, identical with corners Nos. 2 and 4 of said Panama No. 4 and Panama No. 5 lodes, respectively, and with corner No. 1 of said Sioux lode; thence S. 57° 23' W. 1200.0 feet to corner No. 3 of said Standard lode, identical with corner No. 2 of said Reliable Extension lode; thence S. 79° 34' W. 616.2 feet to corner No. 1 of said Reliable Extension lode, the place of beginning.

Expressly excepting and excluding, however, from the above description allareas in conflict with the S. ½ of the S.W.¼ of the S.W.¼ of the S.W.¼ of Sec. 32, T. 25 N., R. 12 E., and Lot 6 of Sec. 5, T. 24 N., R. 12E., M.D.M.; leaving a net area claimed and applied for in this group of 142.669 acres, more or less.

(d) Sioux lode mining claim, Survey No. 6953.

Beginning at corner No. 1, identical with corners Nos. 1, 2 and 4, Panama No. 3, Panama No. 4 and Panama No. 5 lodes, respectively, whence the quarter section corner on the south boundary of Sec. 32, T. 25 N., R. 12 E., M.D.M., bears S. 32° 21 E. 1575.47 feet; thence S. 57° 23' W. 600.0 feet to corner No. 4; thence N. 32° 37' W. 1500.0 feet to corner No. 3; thence N. 57° 23' E. 600.0 feet to corner No. 2; thence S. 32° 37' E. 1500.0 feet to corner No. 1, the place of beginning; containing a net area claimed and applied for in this group of 20.661 acres, more or less.

There are no conflicting claims.

The total net area applied for is 369.424 acres.

The location notices of said nineteen lode mining claims are recorded in the office of the County Recorder of Plumas County, California, as follows:

Pacific No. 1, Vol. 11, page 85;
Pacific No. 2, Vol. 11, page 85;

Of. Receipt No.
3133695

IN THE UNITED STATES LAND OFFICE, SACRAMENTO, CALIFORNIA.

SERIAL NO. 028405

IN THE MATTER OF THE APPLICATION FOR PATENT OF THE RELIABLE EXTENSION, STANDARD, PACIFIC NO. 1, PACIFIC NO. 2, PACIFIC NO. 4, PACIFIC NO. 5, PACIFIC NO. 6, PACIFIC NO. 7, PACIFIC NO. 8, PANAMA NO. 1, PANAMA NO. 2, PANAMA NO. 3, PANAMA NO. 4, PANAMA NO. 5, DIGGER, PIUTE NO. 1, PIUTE NO. 2 AND PIUTE NO. 3 LODE MINING CLAIMS, MINERAL SURVEY NO. 5582A; AND SIOUX LODE MINING CLAIM, MINERAL SURVEY NO. 5953; CONSOLIDATED.	APPLICATION FOR PATENT

To the Register and Receiver of the United States Land Office at Sacramento, California:

H. A. Geisendorfer, being first duly sworn, according to law, deposes and says:

That his post office address is Care Walker Mining Company, Walker Mine, Plumas County, California.

That he is the duly appointed and acting agent and attorney in fact for Walker Mining Company, a corporation, the applicant for patent herein.

That by virtue of compliance with the provisions of the laws of the United States and the rules and regulations thereunder prescribed by the Land Department of the United States and with the laws of the State of California and the miners' customs and regulations of no organized mining district, said corporation is the owner of and in the exclusive and undisputed possession and entitled to the possession of the Reliable Extension, Standard, Pacific No. 1, Pacific No. 2, Pacific No. 4, Pacific No. 5, Pacific No. 6, Pacific No. 7, Pacific No. 8, Panama No. 1, Panama No. 2, Panama No. 3, Panama No. 4, Panama No. 5, Digger, Piute No. 1, Piute No. 2 and Piute No. 3 lode mining claims, Mineral Survey No. 5582A; and Sioux lode mining claim, Mineral Survey No. 5953, consolidated, bearing gold, silver, copper, lead and other precious

Anaconda Geologist Documents Collection. American Heritage Center, University of Wyoming. This material may be protected by copyright law (Title 17, U.S. Code). For our full copyright policy, please contact the AHC by mail or email.

and valuable metals, all situated in no organized mining district, County of Plumas, State of California, as is more fully shown by the abstract of title, plat and field notes of survey and other papers filed herewith and made a part hereof.

Expressly excepting and excluding, however, herefrom all areas in said mining claims in conflict with the S. ½ of the S.W. ¼ of the S.W. ¼ of the S.W.¼ of Sec. 32, T. 25 N., R. 12 E., and Lot 6 of Sec. 5, T. 24 N., R. 12 E., M.D.M., leaving a net area claimed and applied for of 389.424 acres.

Applicant is the owner of Rob Extension, Rob, Walker Extention, Walker, Bullion Extention, Bullion, Copper Center Extention, Copper Center, Valley View Extention and Valley View patented lode mining claims, all Mineral Survey No. 4865, which ten last named patented lode mining claims are completely surrounded on all sides by the nineteen lode mining claims patent to which is applied for herein. Applicant is also the owner of the September Morn No. 1, September Morn No. 2, September Morn No. 3, September Morn No. 4 and September Morn No. 5 patented lode mining claims, all Mineral Survey No. 5948, which adjoin said Piute No. 1, Piute No. 2 and Piute No. 3 lode mining claims Survey No. 5582A on the north and east.

That a certified copy of the articles of incorporation of the applicant has been filed in this Land Office with application for patent of said September Morn group, Mineral Survey No. 5948, Serial 022813.

Ward Creek crosses said Pacific No. 2 but is often dry in late summer and fall.

Piute Creek crosses Piute No. 1 and Piute No. 2, and there are several small springs on each of these claims. Both creek and springs go dry during the late summer and fall.

With the above exceptions there are no water courses or springs on any of the claims herein applied for.

The purpose of this application is to secure the mineral

rights to the claims applied for and not to secure or control water, water rights, water courses or springs or timber.

There are no water holes or hot or medicinal springs on said claims.

That by such compliance with said laws, customs and regulations said Walker Mining Company, this applicant, is entitled to patent from the United States for the said lode mining claims aforesaid and it hereby makes application for such patent.

WALKER MINING COMPANY,

M.A. 028405

UNITED STATES LAND OFFICE, SACRAMENTO, CALIFORNIA.

NOTICE is hereby given that Walker Mining Company, a corporation, whose post office address is Walkermine, Plumas County, California, by H. A. Geisendorfer, its agent and attorney-in-fact, whose post office address is Care Walker Mining Company, Walkermine, Plumas County, California, has filed in the office of the Register of the United States Land Office at Sacramento, California, an application for United States patent for the Reliable Extension, Standard, Pacific No. 1, Pacific No. 2, Pacific No. 4, Pacific No. 5, Pacific No. 6, Pacific No. 7, Pacific No. 8, Panama No. 1, Panama No. 2, Panama No. 3, Panama No. 4, Panama No. 5, Digger, Piute No. 1, Piute No. 2 and Piute No. 3 lode mining claims, Mineral Survey No. 5582A; and Sioux lode mining claim, Mineral Survey No. 5953; consolidated, situated in no organized mining district, Plumas County, California, and designated by the field notes and official plat on file in the United States Public Survey Office at Sacramento, California, as Mineral Surveys Nos. 5582A and 5953 as aforesaid, situated in Sec. 5, T. 24 N., R. 12 E. and Secs. 29, 30, 31 and 32, T. 25 N., R. 12 E., M.D.M., Plumas County, California.

Said nineteen above named lode mining claims are described in four groups (designated (a), (b), (c), and (d)) by the exterior boundaries of the respective groups as follows:

(a) Pacific No. 1, Pacific No. 2, Pacific No. 4, Pacific No. 5, Pacific No. 6, Pacific No. 7 and Pacific No. 8 lode mining claims, Survey No. 5582A.

Beginning at corner No. 2, Pacific No. 2 lode, identical with corner No. 1, Reliable Extension lode, whence the section corner common to Secs. 31 and 32, T. 25 N., R. 12 E., and Secs. 5 and 6, T. 24 N., R. 12 E., M.D.M., bears S. 6° 42' W. 796.2 feet; thence S. 70° 34' W. 616.2 feet to corner No. 1 of said Pacific No. 2 lode; thence N. 32° 37' W. 1500.0 feet to corner No. 4 of said Pacific No. 2 lode; thence S. 70° 34' W. 714.9 feet to corner No. 1, Pacific No. 4 lode; thence N. 41° 52' W. 1500.0 feet to corner No. 4 of said Pacific No. 4 lode; thence N. 70° 34' E. 142.3 feet to corner No. 3 Pacific No. 6 lode; thence N. 14° 07' W. 1467.9 feet to corner No. 2 of said Pacific No. 6 lode, identical with corner No. 3, Pacific No. 8 lode; thence N. 14° 45' W. 1494.9 feet to corner No. 2 of said Pacific No. 8 lode;

Anaconda Geologic Documents Collection, American Heritage Center, University of Wyoming. This material may be protected by copyright law (Title 17, U.S. Code). For our full copyright policy, please contact the AHC by mail or email.

thence N. 70° 34' E. 1204.0 feet to corner No. 4, Pacific No. 7 lode, identical with corner No. 1, Piute No. 3 lode; thence S. 14° 45' E. 1494.9 feet to corner No. 3 of said Pacific No. 7 lode, identical with corner No. 2, Pacific No. 5 lode; thence S. 14° 09' E. 1467.9 feet to corner No. 3 of said Pacific No. 5 lode; thence S. 70° 34' W. 49.1 feet to corner No. 2, Pacific No. 1 lode; thence S. 41° 52' E. 1500.0 feet to corner No. 1 of said Pacific No. 1 lode; thence N. 70° 34' E. 32.9 feet to corner No. 3 of said Pacific No. 2 lode; thence S. 32° 37' E. 1500.0 feet to corner No. 2 of said Pacific No. 2 lode, the place of beginning; containing a net area claimed and applied for in this group of 143.577 acres, more or less.

There are no conflicting claims.

(b) Digger, Piute No. 1, Piute No. 2, and Piute No. 3 lode mining claims, Survey No. 5582A.

Beginning at corner No. 1, Digger lode, identical with corner No. 1, Panama No. 1 lode, whence the section corner common to Secs. 29, 30, 31 and 32, T. 25 N., R. 12 E., M.D.M., bears S. 61° 47' E. 466.8 feet; thence S. 57° 23' W. 632.57 feet to corner No. 4 of said Digger lode; thence N. 14° 12' W. 1499.6 feet to corner No. 3 of said Digger lode, identical with corners Nos. 3 and 2, Piute No. 1 and Piute No. 2 lodes, respectively; thence S. 57° 23' W. 631.4 feet to corner No. 1 of said Piute No. 2 lode, identical with corner No. 2, Piute No. 3 lode; thence S. 70° 34' W. 600.0 feet to corner No. 1 of said Piute No. 3 lode, identical with corner No. 4, Pacific No. 7 lode; thence N. 14° 09' W. 1500.0 feet to corner No. 4 of said Piute No. 3 lode; thence N. 70° 34' E. 800.0 feet to corner No. 3 of said Piute No. 3 lode, identical with corner No. 4 of said Piute No. 2 lode; thence N. 57° 23' E. 1263.97 feet to corner No. 1 of said Piute No. 1 lode; thence S. 14° 09' E. 1500.0 feet to corner No. 4 of said Piute No. 1 lode, identical with corner No. 2 of said Digger lode; thence S. 14° 12' E. 1499.6 feet to corner No. 1 of said Digger lode, the place of beginning; containing a net area claimed and applied for in this group of 82.517 acres, more or less.

There are no conflicting claims to be excluded.

(c) Panama No. 1, Panama No. 2, Panama No. 3, Panama No. 4, Panama No. 5, Standard and Reliable Extension lode mining claims, Survey No. 5582A.

Beginning at corner No. 1, Reliable Extension lode, identical with corner No. 2, Pacific No. 2 lode, whence the section corner common to Secs. 31 and 32, T. 25 N., R. 12 E., and Secs. 5 and 6, T. 24 N., R. 12 E., M.D.M., bears S. 6° 42' W. 796.2 feet; thence S. 32° 37' E. 1500.0 feet to corner No. 4 of said Reliable Extension lode; thence N. 70° 34' E. 616.2 feet to corner No. 3 of said Reliable Extension lode, identical with corner No. 4, Standard lode; thence N. 57° 23' E. 1800.0 feet to corner No. 2, Panama No. 5 lode; thence N. 32° 37' W. 3000.0 feet to corner No. 3, Panama No. 3 lode; thence N. 57° 23' E. 15.2 feet to corner No. 4, Panama No. 2 lode;

Anaconda Geologist Documents Collection, American Heritage Center, University of Wyoming. This material may be protected by copyright law (Title 17, U.S. Code). For out of copyright policy, please contact the AHC by mail or email.

thence N. 41° 43' W. 1499.4 feet to corner No. 1 of said Panama No. 2 lode; thence N. 57° 23' E. 62.34 feet to corner No. 3, Panama No. 1 lode; thence N. 14° 09' W. 1467.9 feet to corner No. 2 of said Panama No. 1 lode; thence S. 57° 23' W. 632.57 feet to corner No. 1 of said Panama No. 1 lode, identical with corner No. 1, Digger lode; thence S. 14° 09' E. 1467.9 feet to corner No. 4 of said Panama No. 1 lode; thence S. 57° 23' W. 37.37 feet to corner No. 2 of said Panama No. 2 lode; thence S. 41° 43' E. 1499.4 feet to corner No. 3 of said Panama No. 2 lode; thence S. 57° 23' W. 7.6 feet to corner No. 4 of said Panama No. 3 lode, identical with corner No. 2, Sioux lode, Survey No. 5953; thence S. 32° 37' E. 1500.0 to corner No. 1 of said Panama No. 3 lode, identical with corners Nos. 2 and 4 of said Panama No. 4 and Panama No. 5 lodes, respectively, and with corner No. 1 of said Sioux lode; thence S. 57° 23' W. 1200.0 feet to corner No. 3 of said Standard lode, identical with corner No. 2 of said Reliable Extension lode; thence S. 70° 34' W. 616.2 feet to corner No. 1 of said Reliable Extension lode, the place of beginning.

Expressly excepting and excluding, however, from the above description all areas in conflict with the S. ½ of the S.W.¼ of the S.W.¼ of the S.W.¼ of Sec. 32, T. 25 N., R. 12 E., and Lot 6 of Sec. 5, T. 24 N., R. 12E., M.D.M.; leaving a net area claimed and applied for in this group of 142.669 acres, more or less.

(d) Sioux lode mining claim, Survey No. 5953.

Beginning at corner No. 1, identical with corners Nos. 1, 2 and 4, Panama No. 3, Panama No. 4 and Panama No. 5 lodes, respectively, whence the quarter section corner on the south boundary of Sec. 32, T. 25 N., R. 12 E., M.D.M., bears S. 32° 21 E. 1873.47 feet; thence S. 57° 23' W. 600.0 feet to corner No. 4; thence N. 32° 37' W. 1500.0 feet to corner No. 3; thence N. 57° 23' E. 600.0 feet to corner No. 2; thence S. 32° 37' E. 1500.0 feet to corner No. 1, the place of beginning; containing a net area claimed and applied for in this group of 20.661 acres, more or less.

There are no conflicting claims.

The total net area applied for is 389.424 acres.

The location notices of said nineteen lode mining claims are recorded in the office of the County Recorder of Plumas County, California, as follows:

Pacific No. 1, Vol. 11, page 85;
Pacific No. 2, Vol. 11, page 85;

IN THE MATTER OF THE APPLICATION FOR PATENT OF THE RELIABLE EXTENSION, STANDARD, PACIFIC NO. 1, PACIFIC NO. 2, PACIFIC NO. 4, PACIFIC NO. 5, PACIFIC NO. 6, PACIFIC NO. 7, PACIFIC NO. 8, PANAMA NO. 1, PANAMA NO. 2, PANAMA NO. 3, PANAMA NO. 4, PANAMA NO. 5, DIGGER, PIUTE NO. 1, PIUTE NO. 2, AND PIUTE NO. 3 LODE MINING CLAIMS, MINERAL SURVEY NO. 5582A; AND SIOUX LODE MINING CLAIM NO. 5593; CONSOLIDATED.	ADDITIONAL AFFIDAVIT OF MINERAL CHARACTER AND OF IMPROVEMENTS

STATE OF CALIFORNIA,)
SS.
COUNTY OF PLUMAS,)

JOHN WALLBLOM and HARRY HENDERSON, each for himself and not one for the other, being first duly sworn deposes and says:

That he is a citizen of the United States, over 21 years of age, and is competent to be a witness in the above entitled patent proceedings; and that he is now and for many years has been, by occupation, a practical miner;

That he is well acquainted with all the mining claims composing the consolidated group of nineteen claims above described which are owned by Walker Mining Company, the Applicant herein, has been upon the ground thereof many times, and has performed mining work therein and thereon;

That the land embraced within said mining claims is chiefly valuable for its mineral deposits in veins or lodes in place in the Robinson Schist formation bearing values in copper, gold and silver;

That said Applicant is also the owner of the Rob, Rob Extension, Walker, Walker Extention, Bullion, Bullion Extention, Copper Center, Copper Center Extention, Valley View, and Valley View Extention patented mining claims, all of Mineral Survey No. 4865, which claims are completely surrounded on all sides by the nineteen

mining claims above described; is also the owner of the September Morn No. 1, September Morn No. 2, September Morn No. 3, September Morn No. 4, September Morn No. 5, all Mineral Survey 5948, which survey adjoins the Piute No. 1, Piute No. 2, and Piute No. 3 claims of said Mineral Survey No. 5582A on the north; and is also the owner of Applicant's Camp Site Exchange Lands Entry, Serial No. 022990, Patent No. 1025718, embracing 107.5 acres.

That five large ore chutes have been developed by mining operations on a large scale by the present owners upon the group of mining claims above mentioned over a period of seventeen years.

That more than 1,000,000 tons of commercial ore have been extracted from said group of mining claims and milled, producing copper, gold and silver, and that several million tons of ore are yet exposed for mining;

That the surface improvements on said group of claims consist of a 1500 ton per day flotation mill, machine shop, steel sharpening shop, framing sheds, and a compressor plant of 3000 cubic feet of free air per minute capacity, all electrically driven, with transformers and other necessary electrical equipment; a camp for 450 men, including three large bunk houses and two staff houses, 120 dwellings for families, school house, office, store, boarding house, social hall, garages, stable, and saw mill of 20,000 board feet per day capacity, all located at the portal of the main adit tunnel on said Camp Site Land Exchange; and on said Piute No. 1 claim, near the north end of the workings, and connected with them by a tunnel 140 feet long, is another power house housing a 1500 foot compressor, a 75 h.p. motor generator set, a 50 h.p. hoist, and a 50 h.p. ventilating fan, all electrically driven, together with necessary transformers and other electrical equipment; also that an aerial tram line nine miles long, capacity 20 tons per hour connects the mill with the Western Pacific railroad at Spring Garden, California;

That the mine improvements consist of a main adit tunnal 7x9

Anaconda Geologic Documents Collection. American Heritage Center. University of Wyoming. This material may be protected by copyright law (Title 17, U.S. Code). For our full copyright policy, please contact the AHC by mail or email.

feet in cross section, two miles long, developing the mine 1000 feet and more below the surface and known as the 7th level. This tunnel enters cover on, and extends approximately N. 17° E., about 2200 feet across Camp Site Exchange Land, 690 feet across Reliable Extension Claim, 740 feet across Bullion Claim, where it turns approximately N. 25° W. and for 450 feet more in the Bullion Claim, 550 feet in Sioux, 1500 feet across Rob Claim, 1450 feet across Rob Extension Claim and 1450 feet across the Digger Claim where it enters unpatented ground. Besides the adit on the 7th level, there are levels at approximately 150 feet intervals above the 7th level, i.e., the 6th, 5th, 4th and 3rd levels, and below the 7th level are the 8th, 9th and 10th levels. The 10th level is also a 7x9 main haulage level 3300 feet long extending beneath the Standard Claim, the Bullion Claim, the Sioux Claim and the Panama #2 Claim. On the Piute No. 1 Claim there is 140 feet of surface crosscut to the vein, and more than 1000 feet of drifts and crosscuts on the 5th level within the boundaries of the claim. Also there are two 3-compartment working winzes with a vertical depth of 500 feet each below the main adit level located on the Standard Claim; and on the Rob Claim there are three 2-compartment working raises connecting with the upper levels, two on the Rob and Bullion Extention claims and one on the Digger. These winzes and raises are equipped with 50 and 100 h.p. electric hoists and skips. All haulage levels are equipped with 24 inch gauge track, 30 lb. and 40 lb. rails. Ore is hauled over these tracks in 3 ton and 5 ton cars drawn by 4 ton trolley electric locomotives;

That there are more than ten miles of underground workings made up of drifts, crosscuts, raises and winzes;

That the value of all the above improvements is far in ex-

feet in cross section, two miles long, developing the mine 1000 feet and more below the surface and known as the 7th level. This tunnel enters cover on, and extends approximately N. 17° E., about 2200 feet across Camp Site Exchange Land, 690 feet across Reliable Extension Claim, 740 feet across Bullion Claim, where it turns approximately N. 25° W. and for 450 feet more in the Bullion Claim, 550 feet in Sioux, 1500 feet across Rob Claim, 1450 feet across Rob Extension Claim and 1450 feet across the Digger Claim where it enters unpatented ground. Besides the adit on the 7th level, there are levels at approximately 150 feet intervals above the 7th level, i.e., the 6th, 5th, 4th and 3rd levels, and below the 7th level are the 8th, 9th and 10th levels. The 10th level is also a 7x9 main haulage level 3500 feet long extending beneath the Standard Claim, the Bullion Claim, the Sioux Claim and the Panama #2 Claim. On the Pluto No. 1 Claim there is 140 feet of surface crosscut to the vein, and more than 1000 feet of drifts and crosscuts on the 8th level within the boundaries of the claim. Also there are two 3-compartment working winzes with a vertical depth of 500 feet each below the main adit level located on the Standard Claim; and on the Rob Claim there are three 2-compartment working raises connecting with the upper levels, two on the Rob and Bullion Extention claims and one on the Digger. These winzes and raises are equipped with 50 and 100 h.p. electric hoists and skips. All haulage levels are equipped with 24 inch gauge track, 30 lb. and 40 lb. rails. Ore is hauled over these tracks in 3 ton and 5 ton cars drawn by 4 ton trolley electric locomotives;

That there are more than ten miles of underground workings made up of drifts, crosscuts, raises and winzes;

That the value of all the above improvements is far in ex-

REGISTER'S FINAL CERTIFICATE OF MINERAL ENTRY.

DEPARTMENT OF THE INTERIOR.
UNITED STATES LAND OFFICE.

Fees, $_____ at Sacramento, California.

Receipt No. _____ August 23, 19

Purchase money, $_____ Serial No. 010,406

Receipt No. _____

IT IS HEREBY CERTIFIED That in pursuance of the provisions of the Revised Statutes of the United States, Chapter VI, Title XXXII, and legislation supplemental thereto, Walker Mining Company, a corporation,

whose post-office address is Walkerville, Plumas County, California on this day purchased the MINING CLAIMS known as the Reliable Extension, Standard, Pacific No. 1, Pacific No. 2, Pacific No. 4, Pacific No. 5, Pacific No. 6, Pacific No. 7, Pacific No. 8, Panama No. 1, Panama No. 2, Panama No. 3, Panama No. 4, Panama No. 5, Digger, Piute No. 1, Piute No. 2 and Piute No. 3 Lode mining claims, Mineral Survey No. 5582A, Reliable Extension and Sioux Lode mining claim, Mineral Survey No. 5953, Plumas County, situated in Section 5, T. 24 N., R. 12 E., and Sections 29, 30, 31 and 32, T. 25 N., R. 12 E., Mt. Diablo Meridian, designated as Surveys Nos. 5582A and 5953; said Survey No. 5582A extending 1500.0 feet in length along said Reliable Extension; 1500.0 feet in length along said Standard; 1500.0 feet in length along said Pacific No. 1; 1500.0 feet in length along said Pacific No. 2; 1500.0 feet in length along said Pacific No. 4; 1467.9 feet in length along said Pacific No. 5; 1467.9 feet in length along said Pacific No. 6; 1494.9 feet in length along said Pacific No. 7; 1494.9 feet in length along said Pacific No. 8; 1467.9 feet in length along said Panama No. 1; 1499.4 feet in length along said Panama No. 2; 1500.0 feet in length along said Panama No. 3; 1500.0 feet in length along said Panama No. 4; 1500.0 feet in length along said Panama No. 5; 1499.6 feet in length along said Digger; 1500.0 feet in length along said Piute No. 1; 1500.0 feet in length along said Piute No. 2; and 1500.0 feet in length along said Piute No. 3 veins or lodes; and said Survey No. 5953 extending 1500.0 feet in length along said Sioux Mining claim as entered, embracing 20.660 acres, and said mill site claim acres, in the no organized Mining District, in the County of Plumas, State of California and _____ of _____, as shown by the plat and field notes of survey thereof, for which the said part first above named this day made payment to the Receiver in full, amounting to the sum of nineteen hundred fifty (1950.00) dollars.

NOW, THEREFORE, Be it known that upon the presentation of this Certificate to the COMMISSIONER OF THE GENERAL LAND OFFICE, together with the plat and field notes of survey of said claims and the proofs required by law, a PATENT shall issue thereupon to the said Walker Mining Company

if all then be found regular.

_____
Register.

NOTE.—Final certificate should issue in the full and proper names of claimants and every effort should be used to obtain the same.

A duplicate of this Certificate is issued to the claimant as notice of the acceptance of the proof and payment, and of the allowance of the entry by the Register and Receiver subject to approval by the Commissioner of the General Land Office.

The entry papers, together with the original final certificate, are forwarded to the General Land Office at Washington, D. C., for examination and issuance of patent, if all be found regular.

The duplicate copy forwarded to the claimant should be held until notice of issuance of patent is received.

In all correspondence concerning the entry in connection with which this Certificate issued, refer to the NAME OF THE LAND OFFICE and the SERIAL NUMBER noted hereon.

UNITED STATES LAND OFFICE, SACRAMENTO, CALIFORNIA.

M.A. No. 028,405

STATE OF CALIFORNIA,)
SS.
COUNTY OF PLUMAS)

H. A. Geisendorfer, being first duly sworn, according to law, deposes and says:

That he is the duly appointed and acting Agent and Attorney-in-Fact of Walker Mining Company, a corporation, applicant for United States patent for the Reliable Extension, Standard, Pacific No. 1, Pacific No. 2, Pacific No. 4, Pacific No. 5, Pacific No. 6, Pacific No. 7, Pacific No. 8, Panama No. 1, Panama No, 2, Panama No. 3, Panama No. 4, Panama No. 5, Digger, Piute No. 1, Piute No. 2 and Piute No. 3 lode mining claims, Mineral Survey No. 5582A; and Sioux lode mining claim, Mineral Survey No. 5953, Consolidated, situated in no organized mining district, Plumas County, State of California, the official plats of which premises, together with a notice of intention to apply for a patent therefor was posted thereon on the 31st day of May, 1933, as fully set forth and described in the affidavit of John Wallblom and H. J. Henderson dated May 31, 1933, which affidavit has been duly filed in the office of the Register of the United States Land Office at Sacramento, California, in the matter of this application, Serial No. 028405, and that the plats and notice so mentioned and described remained continuously and conspicuously posted upon said mining claims from said May 31, 1933, until and including the 17th day of August, 1933, including the sixty day period during which notice of said application for patent was published in The Plumas Independent of Quincy, California, pursuant to the order of said Register heretofore made herein.

H. A. GEISENDORFER

Subscribed and sworn to before me this 19th day of August, 1933.

My commission expires Feb. 5th. 1935

NOTICE OF APPLICATION of WALKER MINING COMPANY, A Corporation, by V. A. HAIT, its Attorney in Fact for a United States Patent to the DOLLY GULCH PLACER MINE, BULLION MILLSITE, RELIABLE LODE and thirty eight (38) other mining claims.

Notice is hereby given that in pursuance of Chapter 6 of Title 32, of the Revised Statutes of the United States, and regulations thereunder, that the undersigned V. A. HAIT, whose post office address is Walker Mine, Plumas County, California, as attorney in fact for WALKER MINING COMPANY, A Corporation, whose post office address is Walker Mine, Plumas County, California, claiming to own the DOLLY GULCH PLACER MINE, the BULLION MILLSITE, the RELIABLE LODE and thirty eight (38) other mining claims hereinafter set forth, situate in no organized mining district, Plumas County, California, is about to make application to the United States Government for a patent for said mining claims which are more fully described as to meets and bounds by the official plat thereof herewith posted, and by the field notes of survey thereof now filed in the office of the Register of the District of Lands at Susanville, California, which field notes of survey describe the boundaries and extent of said claims on the surface with varying magnetic variation from 18 deg. E. to 20 deg. E. as follows:

DOLLY GULCH PLACER MINE described as commencing at the corner common to Sec. 5, 6, 7, and 8 T. 24 N. R. 12 E. and running thence S. 88 deg. 25' W. 1320 feet; thence S. variation 18 deg. 47' E. 2640 feet; thence N. 89 deg. 44' E. variation 18 deg. 45' E. 1319.25 feet; thence N. 88 deg. .06' E. variation 19 deg. E. 1347.4 feet; thence N. variation 18 deg. 45' E. 2640 feet; thence S. 89 deg. 23' W. variation 18 deg. 23' E. 1346.93 feet to the place of beginning.

BULLION MILLSITE described as beginning at a point from which the NE corner of Sec. 8 T. 24 N. R. 12 E. bears N. 36 deg. 55' E. 905.29 feet; thence S. 52 deg. .08' E. variation 19 deg. E. 423.4 feet; thence S. 33 deg. .07' W. variation 19 deg. E. 496.72 feet; thence N. 53 deg. 36' W. variation 19 deg. E. 440 feet; thence N. 35 deg. .05' E. variation 19 deg. E. 506.87 feet to the place of beginning.

WALKER MINING COMPANY

WALKERMINE
PLUMAS COUNTY, CALIFORNIA

H. A. GEISENDORFER, MANAGER

September 29, 1935.

Miss Jean M. Hurst,
c/o International Smelting & Refining Co.,
Kearns Building,
Salt Lake City, Utah.

Dear Miss Hurst:

Your photostatic copies of patent ~~to~~ Surveys Nos. 5582 A and 5953, Reliable Extension, and eighteen other claims, have been received for which we thank you.

The patent covering Survey No. 4865, Bullion et. al. lodes is not in our files nor have I ever seen it in this office. These claims were patented long before my time and I had always supposed patents reposed in Salt Lake.

Thanking you, I remain

Very truly yours,

WALKER MINING COMPANY

H. A. Geisendorfer
Manager

HAG/m

September 24, 1955

Mr. H. A. Geisendorfer, Superintendent
Walker Mine
Walkerwine, California

Dear Mr. Geisendorfer:

I am enclosing herewith photo copy of patent to Surveys Nos. 5582 A and 5953, Reliable Extension et. al. lodes for your mine files.

Mr. Hunter's office has original patent covering "Land Grant" and "September Morn" group, but has not patent covering Survey No. 4965, Bullion et. al. lodes. Will you please see if this patent is not in files at mine and if so let us have it to photo. If you haven't copies of other patents we can send for a photo copy if you wish.

With best wishes,

Very truly yours,

JMH:P
Encl.

Mr. Ron Warburton,
Care Walker Mining Company,
Kearns Building,
Salt Lake City, Utah.

Dear Mr. Warburton:

We hand you herewith U. S. patent to the Walker Mining Company for the Reliable Extension, Standard, Pacific No. 1, Pacific No. 3, Pacific No. 4, Pacific No. 5, Pacific No. 6, Pacific No. 7, Pacific No. 8, Panama No. 1, Panama No. 2, Panama No. 3, Panama No. 4, Panama No. 5, Digger, Piute No. 1, Piute No. 2, Piute No. 3 and Sioux lode mining claims, dated April 26, 1934, the same having been recorded in the office of the County Recorder of Plumas County, California, on July 22, 1935, in Vol. 9, page 432, of Patents.

Will you please be kind enough to receipt for same on the copy of this letter attached hereto and return same to us.

Yours very truly,

Van Cott, Riter & Farnsworth

June 5, 1934

Commissioner of the U.S. General Land Office,

Washington, D.C.

Sir: WALKER MINING COMPANY - MINERAL PATENT - SACRAMENTO 028405

We hand you herewith, by registered mail, U. S. Mineral Patent to the Reliable Extension and eighteen other lode mining claims designated as Surveys No. 5582A and 5953, located in Sec 5, T24N, and Sections 29, 30, 31 and 32, T. 25 N., all R. 12 E., M.D.M., Plumas County, California. We are attorneys for the Walker Mining Company and did the work in the Land Office pertaining to this patent. We desire to call your attention to the following matters relating to the description of said mining claims in the patent and to ask that it be corrected in certain particulars.

1. In the fifth line from the bottom of page 1 of the patent we would like to have the word "common" inserted after the word "corner". It is true that the only section corner that could be the section corner to Sections 31 and 32 in T. 25 N. and Sections 5 and 6 in T. 24 N., all R. 12 E., M.D.M., would be the section corner common to the named sections. The word "common", however, is not expressed in the description as written but must be inferred. If an inference must be drawn as to the meaning of a part of a description, the description cannot be altogether clear. A United States patent is an instrument of such dignity as a muniment of title that every word should be clear and nothing should be left to inference. It is therefore respectfully requested that the word "common" be inserted as suggested.

Anaconda Geological Documents Collection, American Heritage Center, University of Wyoming. This material may be protected by copyright law (Title 17, U.S. Code). For our full copyright policy, please contact the AHC by mail or email.

2. In line 14 on page 4 and in line 12 on page 5 the words "said section corner" evidently refer to the words "section corner" as used in relation to the Reliable Extension in the fifth line from the bottom of page 1. In line 20, page 3, reference is made to the "south quarter section corner". By the usual rules of construction the words "said section corner" on page 4 refer to the words "section corner" in line 20, page 3, because that is the last section corner before mentioned and the one nearest to the "said section corner" in line 14, page 4; and the words "said section corner" on page 5 refer to the"section corner" last before mentioned, which is the "section corner" in line 14, page 4. It is true that the words "south quarter" precede the words "section corner" and might be held to differentiate it, but it is submitted that "said section corner" mentioned in line 14, page 4, and line 12, page 5, would be clearer if in each case the words "first mentioned" were inserted after the word "said."

3. On page 17, line 1, the words "the quarter section corner" are used. There being four quarter corners to every section, it is submitted that the word "south" must be inserted before the word "quarter" (the south quarter corner being shown by the plat to be the one meant) to make the tie clear and intelligible.

4. On page 17, last line "B Ex.4 5865" should be "B Ex.4 4865". This is plainly a typographical error. 4865 refers to a mineral survey.

You will note that the patent has not been recorded. We shall appreciate it if you will make the changes suggested and requested and return the patent.

Yours very truly,

8-6

June 1- 1934.

Mr. Howell—

I have checked descriptions in patent just received by the Walker Mining Co., covering patent to the Reliable Extension, Et al lodes, and find the following discrepancies—

p. 4 line 14 and p. 5 line 12

"from which said section corner bears - - - "

The "said" actually refers to the section corner described in the Reliable Extension lode claim description, on p. 1 lines 19 to 22, but anyone reading or plotting this patent would naturally first plot it from the 1/4 section corner first given in the Standard lode claims description p. 3 lines 20 which immediately precedes and would seem to be the section corner referred to in the Pacific No. 1 and No. 2 lode claims descriptions. Of course, however the one is a section corner and the other a quarter section corner and the Govt. could claim "said section corner" refers therefor only to the first section corner described, but in a patent description there should never be a doubt as to which corner "said" refers to.

p. 17 lines 1 and 2—

"from which the quarter section section corner

to said section thirty bears ——"

As section thirty has four quarter sections corners, the description showed definitely state which quarter section corner is tied to; the south one, in this case.

p. 17 line 28.
Typographical error, "5865" showed be 4865.

Mr. Wooley, of our land office, thinks this patent should be returned directly to Washington for corrections, as he feels the govt. would want to have patents issued by them absolutely clear and free from errors. Miss Nelson, of our Public Survey office, does it not necessary to return the patent for corrections, as the errors did not seriously effect either the description or title.

ATTENTION MR. A. D. HUNTER

Walker Mining Company,
Kearns Building,
Salt Lake City, Utah.

Gentlemen:

We hand you herewith letter dated May 2, 1934, from Mr. H. A. Geisendorfer to Mr. Howell, enclosing postcard from the Register of the United States Land Office at Sacramento, California, stating in substance that patent for Mineral Entry No. 028405 is in the Register's office and will be delivered to the Mining Company upon surrender of the "Register's Duplicate Final Certificate of Mineral Entry." This is a blue, partly printed form and was sent to you by us on August 24, 1933.

You can either send in the final certificate yourself and have the patent sent to your office, or if you wish and will send us the certificate, we will send it.

When it comes it will be necessary to have the description checked by Miss Hurst, after which it should be recorded in the office of the County Recorder of Plumas County, California.

Yours very truly,

Van Cott, Riter & Farnsworth

CC Mr. H. A. Geisendorfer,
Miss Jean Hurst.

Apr. 27-1934

Mr. Howell -

I have been unable to obtain very much information in regard to Mr. Ingels work at the Walker mine, either in Mr. Geisendorfers or Mr. Warburtons office - However this information could be obtained at the mine.

Mr. Geisendorfer has a file on Mr. Ingels in his office here and I obtained the following data from same -

July 31, 1932 - Mr. Ingels and Mr. Soole went to "groom" on Paxton Road, to sample for Mr. Geisendorfer

Aug 11, 1932 - letter from Mr. Geisendorfer to Mr. Ingels instructs him to locate "groom" staking out 3 claims wide and 3 claims long - Give an individuals name to be deeded to International later - (This was done but I do not know when)

We have a print here showing contours - etc for a "Proposed location of Tailings Checkmen" - made by Mr. Ingels and dated Oct. 8, 1932

As you know, plat of Patent Survey No. 6137, Iron Blossom, Lode was dated Oct. 10-26-1932

Mr. Warburton says he has given you data concerning Mr. Ingels pay but does not know anything about the various engineering jobs he did -

Leslie M. Hurst

Aug. 14, 1933.

Mr. Howell.

The following statement gives a list of Surv. etc. charged to Mineral Surveys Nos. 5582 A+B and 5953, as given in Mr. Hunter's files of the Walker Mng. Co.

For office work in the U.S. Survey General and Public Survey Offices	$ 455.14	These amounts also include 21 lode mining claims, 1 placer, and 1 mill site of Surv. No. 5582 A+B not being patented herewith.
For survey made by William Watson U.S. Mineral Surveyor	868.25	
For filing applications for pat. with Sacramento Land Office	10.00	
For publishing notice of application for patent in the "Alta" Placer Independent	150.00	
Purchase Price of Land - U.S. Land Office	1950.00	
Total	$ 3433.39	

If you wish the first 2 amounts segregated as to Survey, they are as follows -

Surv. No. 5582 A+B — $ 455.14 to Surv. Gen. and 820.00 to Wm. Watson (Surv. 24-1922 - 300; 12-1923 - 520)

Surv. No. 5953 — 35.00 to Pub. Surv. Office and 48.25 to Wm. Watson (Surv. 21-1927; Oct. 19-1927)

On Aug 23, 1921 voucher was issued to U.S. Surv. Gen. for $ 1025.00 but on Sept 11, 1923 a refund of $ 604.86 was received on this account.
