

AGENDA ITEM: 12.f
17/18 FEBRUARY 2022 BOARD MEETING
LATE REVISIONS - 17 February 2022

ITEM 12.f. Eriksson, LLC, Ingleby US Pistachio Plant, Fresno County - Consideration of Tentative Waste Discharge Requirements (new)

Finding 15

Page 4, Edit Finding 15 as follows.

Leaves, twigs, stems, and other debris removed during the pre-cleaning process are transferred to a temporary onsite green ~~waste~~ **material** storage area. The green ~~waste~~ **material** is used to create a mulch, which is applied to the soil as a soil amendment within the surrounding pistachio orchards.

Finding 16

Page 4. Edit Finding 16 as follows.

Residual solids (from hulling operations)... Residual solids may also be mixed with the green ~~waste~~ **material** (from pre-cleaning operations) and other soil amendments and applied to soil as a soil amendment within the surrounding pistachio orchards...

Finding 27

Page 7. Edit Finding 27 as follows.

The LAA consists...As discussed in Finding 2, the remaining acreage on the northern portion of the site consisting primarily of pistachio orchards, will be used for land application of solids including green ~~waste~~ **material** and residual solids from hulling operations.

Information Sheet

Page IS.2. Last paragraph. Edit last paragraph in section on Wastewater Generation and Disposal as follows.

The LAA consists of approximately 3,700 acres... The remaining acreage on the northern portion of the site is used for land application of green ~~waste~~ **material** removed during the pre-cleaning process and residual solids removed from the screens and the storage/settling pond...
