

Entry Process – Rescission Through Rescission Order

Summary:

For rescinding orders, be sure that both the rescinding order and the original order have a status of Historic and the two records are related with the relationship of “Rescinding.”

Steps:

The Board adopts an order that rescinds an existing order.

1. Create a new regulatory measure with the regulatory measure type to “Rescission Order.”
2. The title should follow the format: “Rescission Order [order number] for [Discharger].” If multiple orders are being rescinded, use “Rescission Order [order number] for multiple orders.”
3. Complete the order number field with the order number of the rescission order.
4. Select “Individual” from the general/individual drop down menu.
5. Relate the new regulatory measure to the existing regulatory measure with the relationship of “Rescinding.” (If multiple orders are being rescinded, relate them all to the rescission order.)
6. Add Adoption Date to the date section of the rescinding record.
7. Add Termination Date to the date section of the rescinding record.
8. Make the status of the rescission order and the rescinded order(s) “Historic.”
9. Add Termination Date to the date section of the old record(s). This date should be the day before the adoption of the rescission order.

Other Considerations:

Make sure that the orders don’t have multiple statuses on the same day. Check the “View Status History” for status dates. If there are multiple statuses on the same date, change the status to the previous status, enter the status date as the day before the status date that was used prior, and save the record.

Example:

Existing order to be rescinded.
