

CIWQS WorkBook 0

Preface

The CIWQS Water Board staff user can use this workbook series in three ways. First, by using fictitious information in the sandbox environment staff can use the workbook to train themselves on the entire functionality of CIWQS. The staff will need to modify various placeholders in the workbook as needed to match functionality in a later lesson.

Second, the workbook may be used for quick reference for staff to perform various data entry tasks, as needed. The table of contents should be used to reference examples of the workflows in CIWQS.

Third, the workbook is used to test existing functionality during application upgrades to ensure that no existing functionality is lost during the upgrade.

Frequently Asked Questions

What are the URLs for CIWQS?

CIWQS Production Login Page: <http://ciwqs.waterboards.ca.gov>
CIWQS Test Login Page: http://water24.waterboards.ca.gov/ciwqs_test/index.jsp
