

Request for Alternate Enforceable Methods of Compliance

The State Water Board recognizes that some commercial and industrial customers, while accounting for a significant portion of total use in a service area, have already taken steps to significantly reduce their water consumption and cannot further reduce their use without substantial impacts. However, the Board also recognizes that in many areas there are significant opportunities for reductions in water use by industries and commercial enterprises that have yet to take action, especially those with large areas of non-functional turf.

Pursuant to paragraph 16 of the resolved section of the resolution adopted by the Board on May 5, 2015, a supplier can request alternate enforceable methods of compliance if the supplier believes that the conservation standard is unachievable due to firm commercial and industrial water use and residential reductions that would affect public health and safety.

This request must be made by the water supplier's General Manager or authorized designee through the [DRINC portal](#). The form to request an **Alternate Compliance Consultation** is located within the **Applications Tab** under **Public Water Systems**. Follow this link to access the form directly:
