Subject: Scott River: Temporary Extension of Conditional Suspension of Curtailments
Date: Friday, June 24, 2022 5:26:42 PM
Attachments: [List A1 Scott River Watershed.pdf](#)

This is a message from the State Water Resources Control Board.

To: All Scott River Watershed Water Right Holders, including those on List A1 in the Attachment (sent to water right holders for which the Board has email addresses and to the Scott-Shasta Drought E-mail List)

As conditions continue to dry in the coming weeks, the chance of curtailments going back into effect increases. Water right holders should closely monitor the Scott River and Shasta River Drought Response webpage or their email for curtailment updates. Information on how to access the webpage and sign up to receive emails are provided at the bottom of this email.

Based on the forecast of precipitation in the coming week, current and projected flows at the United States Geological Survey (USGS) [Fort Jones gage](#), and water demand estimates, the **temporary suspension of all curtailments in the Scott River watershed is extended through 11:59 p.m. on Friday, July 1, 2022, as long as the following minimum flows are met at the USGS Fort Jones gage: 90 cfs from June 24 through June 30; and 50 cfs on July 1. If flows are less than these required minimum flows at the USGS Fort Jones gage, diversions under the water rights included in List A1 (attached to this email) must cease immediately.** List A1 represents the most junior water rights in the Scott River watershed. The State Water Board will continue to monitor precipitation forecasts and watershed conditions regularly to determine if further adjustments to curtailments are appropriate.

Flow Modification

On June 3, 2022, the State Water Board received a [memorandum from California Department of Fish and Wildlife](#) (CDFW) assessing the modification in minimum flows from 125 cfs in June to 50 cfs in July. CDFW states that the drop off in the hydrograph of 75 cfs will likely result in a considerable change in stream profile that represents a potential stranding risk to out-migrating juvenile Chinook salmon, and to juvenile coho salmon that are currently distributing to over summering rearing habitat. CDFW recommends a ramp down flow of 90 cfs during the last seven (7) calendar days of June 2022. CDFW consulted with the National Marine Fisheries Service on this proposed change.

Section 875, subdivision (c)(1)(B) provides that CDFW, after coordination with the National Marine Fisheries Service, may notify the Deputy Director of the Division of Water Rights (Deputy Director) that lower alternative flows at the Fort Jones USGS gage, or that alternative flows at a different point or points in the watershed provide equal or better protection for the pertinent species' relevant life stage. Using this information, the Deputy Director may determine not to issue curtailment orders, to issue curtailment orders to a smaller priority grouping described in section 875.5, or to suspend curtailment orders already issued in order of priority as described in section 875.5, as applicable.

This is Addendum 31 to: Order for Reported Water Rights in the Scott River Watershed issued September 9, 2021, Order WR 2021-0083-DWR, and Order WR 2021-0084-DWR (Curtailment Orders). Please note that this and previous addenda also include those who were later sent one of the above orders.

As a reminder, Addenda [11](#) – [30](#) to the Curtailment Orders include a mandatory reporting requirement for all surface water right holders in the Scott River watershed that are actively diverting more than one cubic foot per second (1 cfs), as a daily average. These surface water right holders must report their daily diversions to the State Water Board each week. Reports shall be submitted by e-mail to: ScottShastaDrought@waterboards.ca.gov.

Per Addendum 30, the mandatory report for those diverting more than 1 cfs, on a daily average, is due by 5:00 pm today (June 24, 2022), and covers the period from June 17 through June 23, 2022. If you have not yet reported for previous weeks, please do so immediately.

Reporting for this addendum is due by 5:00 pm on Friday, July 1, 2022 and shall cover the period from June 24 through June 30, 2022.

This reporting is necessary to improve the State Water Board's information on current water demand, and in order to be able to more precisely tailor curtailments in the upcoming weeks, if weather conditions are dry. This reporting requirement is in effect until further notice.

QUESTIONS AND HOW TO STAY INFORMED

Please monitor your email and our [website](#) (https://www.waterboards.ca.gov/drought/scott_shasta_rivers/) for future updates. If an email notice is issued on the weekend, the website will not be updated until the following Monday due to service limitations.

If you have questions regarding this email, please contact staff by email at: ScottShastaDrought@waterboards.ca.gov or leave a message at our dedicated Scott River and Shasta River Drought phone line at: (916) 327-3113.

If you received this notice in a forwarded message and would like to receive future emails related to this and similar efforts, please sign up for the State Water Board's "Scott-Shasta Drought" email subscription list under "Water Rights" at: https://www.waterboards.ca.gov/resources/email_subscriptions/swrcb_subscribe

Erik Ekdahl
Deputy Director
Division of Water Rights
State Water Resources Control Board

**List A1: Group 1 to Group 7 Water Rights in the Scott River Watershed
Associated with Order for
Reported Water Rights in the Scott River Watershed, Issued September 9, 2021 by
the Deputy Director for the Division of Water Rights**

The Curtailment Group number is based on the order of priority outlined in Emergency Regulation section 875.5(a)(1). Group 1 is curtailed first and suspended last (i.e., most junior water right priority), Group 7 is curtailed last and suspended first. Please note that water rights of Group 2 refer to the Surplus Rights only, not the other water rights of the owner, and that they are listed with reference to curtailment number and ownership as listed in the Scott River Decree. This list should be understood to include the successors and assigns of the owners at that time. Group 2 Surplus Rights are generally unavailable in drought years, and are only available when all other rights under the Scott River Decree have been fully satisfied.
