

State Water Resources Control Board

May 25, 2023

Subject: Order WR 2021-0082-DWR, Addendum 13: Extension of Conditional Temporary Suspension of Curtailments in Shasta River Watershed

To: Scott River Watershed and Shasta River Watershed Water Right Holders (sent to water right holders for which the Board has email addresses) and Interested Parties on Scott-Shasta Drought E-mail List

As further described below, this Addendum amends [Order WR 2021-0082-DWR](#)¹ to continue the temporary and conditional suspension of all curtailments of water rights under Order WR-0082-DWR in the Shasta River watershed, so long as flows are at or above the emergency minimum flows at the [Yreka United States Geological Survey \(USGS\) gage](#).

On September 10, 2021, the State Water Resources Control Board (State Water Board) issued a curtailment order (Order WR 2021-0082-DWR) to the most junior water right holders in the Shasta River watershed, including all post-Adjudication appropriative surface water and appropriative groundwater rights described in section 875.5, subdivision (b)(1)(A) of the Drought Emergency Regulation², as well as more senior appropriative rights with priority dates in or later than November 1912, as described in section 875.5, subdivision (b)(1)(B). Based on forecasted precipitation, flows, demand projections, and other factors, the State Water Board issued addenda to Order WR 2021-0082-DWR, partially suspending and reinstating curtailment of water rights in order of priority contingent on the required minimum flow at the Yreka USGS gage being met and sustained. On December 27, 2022, the State Water Board suspended all curtailments issued in Order WR 2021-0082-DWR contingent on the required minimum flow being met and sustained at the Yreka USGS gage ([Addendum 10](#))³. On March 22 and April 27, 2023, the State Water Board extended the suspension of curtailment through April 30 ([Addendum 11](#)), and May 31, 2023 ([Addendum 12](#)), respectively .

¹ References to Order WR 2021-0082-DWR include [Order WR 2021-0085-DWR](#), [Order WR 2022-0142-DWR](#), and [Order WR 2022-0161-DWR](#) [issued for water diversions that did not receive the original curtailment order because of incorrect addresses and other reasons].

² Establishment of Minimum Instream Flow Requirements, Curtailment Authority, and Information Order Authority in the Klamath River Watershed (Cal. Code Regs., tit. 23, §§ 875-875.9). All subsequent section references in this order are to California Code of Regulations, title 23 unless otherwise noted.

³ On December 27, 2022, the State Water Board also issued addenda suspending two additional curtailment orders ([Order WR 2022-0162-DWR](#) and [Order WR 2022-0167-DWR](#)) that conditionally curtailed water rights to a priority date of April 1, 1885 and March 1, 1850, respectively.

Since December 27, 2022, flows at the Yreka USGS gage have remained mostly above the minimum flow requirements (125 cubic feet per second [cfs] through March 25, 105 cfs from March 26 through March 31, 70 cfs through April 30, and 50 cfs in May) with an average daily flow of 159 cfs between December 27, 2022, and May 24, 2023. However, for a few days in late April and the third week of May 2023, flows dropped below the minimum flow requirements when the Shasta River watershed experienced significantly above average air temperatures. It took one to two days for flows to return to the minimum flow requirement.

Flows at Yreka USGS gage were 61.3 cfs at 11:00 am on May 25, 2023. The current hydrology in the Shasta River watershed indicates a high probability of continuing to exceed the minimum flow requirement (50 cfs in May and June) through the end of June 2023 if the most junior water right holders coordinate with the Scott Valley and Shasta Valley Watermaster District (Watermaster) and State Water Board, as appropriate, to manage flows.

Accordingly, the State Water Board is continuing the **temporary suspension of all curtailments in the Shasta River watershed, contingent on: (1) 50 cfs in May and June being sustained at the Yreka USGS gage; and (2) parties with suspended curtailments working with the Watermaster and State Water Board as appropriate to manage flows.** The curtailments of water rights listed in Attachment A are suspended so long as the minimum flow requirement is met and sustained at the Yreka USGS gage (i.e., 50 cfs in May and June). The temporary suspension will expire on June 30, 2023, unless otherwise extended or curtailments are reimposed.

If flows drop below the minimum flow requirement (i.e., 50 cfs) at the Yreka USGS gage during this time period, conditionally curtailed water rights, as noted on the curtailment list and map that is posted on the [Scott River and Shasta River Watersheds Drought Response website](https://www.waterboards.ca.gov/drought/scott_shasta_rivers/) (https://www.waterboards.ca.gov/drought/scott_shasta_rivers/), must immediately work with the Watermaster and the State Water Board to reduce their water use.

The State Water Board will be monitoring weather forecasts and stream gages to determine if suspensions should be extended in the future, or if additional curtailments are needed. To stay informed on future updates related to curtailments and the ongoing Drought Emergency Regulation effort in the Scott River and Shasta River watersheds, please:

1. Monitor your email if you have subscribed to the **Scott-Shasta Drought** email list (you can subscribe to the Scott-Shasta Drought email list at [GovDelivery](#) under "Water Rights"); and/or
2. Visit our [Scott River and Shasta River Watersheds Drought Response website](https://www.waterboards.ca.gov/drought/scott_shasta_rivers/) (https://www.waterboards.ca.gov/drought/scott_shasta_rivers/). If an email list notice is issued on the weekend, the website will not be updated until the following business day due to limitations on implementing such updates.

If you have questions regarding this email, please contact staff by email at: ScottShastaDrought@waterboards.ca.gov or leave a message at our dedicated Scott River and Shasta River Drought phone line at: (916) 327-3113.

May 25, 2023

Sincerely,

A handwritten signature in black ink, appearing to read "Erik Ekdahl", with a long, sweeping horizontal stroke extending to the right.

Erik Ekdahl
Deputy Director
Division of Water Rights

Enclosure:

¹ You exercise an appropriative groundwater right when you: (1) do not own (or rent or lease) land overlying the basin that you use the water on; (2) own overlying land but use the water on non-overlying land; or (3) sell or distribute the water to someone else. Groundwater appropriators have a priority date from when the groundwater well was constructed, and water first used for non-overlying use. You may exercise an overlying groundwater right, which is not curtailed by this order.

² Conditionally curtailed means the water rights are curtailed conditioned on the minimum instream flow being met at the Yreka United States Geological Survey (USGS) gage. These water rights holders are directed to work with the Scott Valley and Shasta Valley Watermaster District (Watermaster) and State Water Board, as appropriate, and if necessary, curtail in the order of priority to ensure that the required minimum flows are met at the Yreka USGS gage.
