DIVISION OF WATER RIGHTS

CHANGE OF NAME/ADDRESS OR OWNERSHIP

Regulations require the owner of a water right to directly notify the State Water Resources Control Board (State Water Board) with information regarding either a change in the name and/or address of the current water right holder or a change in ownership of the water right (Cal. Code Regs., Title 23, §830-831). All correspondence pertaining to a water right, including the bill for fees, is mailed to the owner (or agent) of record at the most recent address supplied to the State Water Board. Until such time as the State Water Board is notified of a change in ownership, the owner of record is liable for all fees and related charges assessed to the billing account.

To inform the State Water Board of any updates to the name or address of the current water right holder, please complete Box 1 and return this form to the Division of Water Rights at the address above. To inform the State Water Board of a change in ownership of a water right, please complete Boxes 1 and 2. If there are joint owners of this water right, you must provide the names and addresses of all joint owners and designate one person to receive all correspondence from the State Water Board regarding the joint application (Water Code, § 1290; Cal. Code Regs., Title 23, § 691.) For multiple owners, please attach additional sheets as necessary.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA
There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

ATTACHMENT A TO STATEMENT OF WATER DIVERSION AND USE FOR S-15980 CITY AND COUNTY OF SAN FRANCISCO, SAN MATEO CREEK MUD DAM #2, SAN MATEO COUNTY, CALIFORNIA

Question C and D. San Mateo Creek water diversions at Mud dam #2 are not separately measured and are included in the diversion amounts filed for San Andreas Reservoir (S-15861).

Questions G. 1. a. The City and County of San Francisco and thirteen of its 28 customers (the thirteen represent 70% of its wholesale demand) are signatories to the California Urban Water Conservation Council MOU, which requires implementation of fourteen best management practices. The remaining customers implement varying degrees of conservation. The City intends to create a system for documenting wholesale conservation savings in the future, although it may not be able to tie savings to specific watersheds. Refer to the 2005 Urban Water management Plan for more information.

Re: Statements of Water Diversion and Use for City and County of San Francisco,
Points of Diversion: Stone Dam, Davis Tunnel, San Mateo Creek Mud Dam #1
and San Mateo Creek Mud Dam #2

Dear Sir or Madam:

Enclosed please find Statements of Water Diversion and Use for the referenced points of diversion, which we are filing on behalf of the City and County of San Francisco. In October, 2005, the City filed SWDUs for its local system (Alameda Creek watershed and San Francisco peninsula) diversions. The Board subsequently requested statements for the separate points of diversion described in those SWDUs. The enclosed are intended to comply with that request. These SWDUs are in filed in addition to, and not in place of, the SWDUs filed in October, 2005. Because the City has no measuring devices at the points of diversion described in the enclosed statements, quantities diverted are reflected in the SWDUs filed in October, 2005, which cover the facilities at which total diversions are measured.

Please contact me if you have any questions.

Very truly yours,

Margaret G. Leavitt

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA
There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Question C and D. San Mateo Creek water diversions at Mud dam #2 are not separately measured and are included in the diversion amounts filed for San Andreas Reservoir (S-15861).

Questions G. 1. a. The City and County of San Francisco and thirteen of its 28 customers (the thirteen represent 70% of its wholesale demand) are signatories to the California Urban Water Conservation Council MOU, which requires implementation of fourteen best management practices. The remaining customers implement varying degrees of conservation. The City intends to create a system for documenting wholesale conservation savings in the future, although it may not be able to tie savings to specific watersheds. CHANGE OF NAME/ADDRESS OR OWNERSHIP

DIVISION OF WATER RIGHTS
SACRAMENTO

Regulations require the owner of a water right to directly notify the State Water Resources Control Board (State Water Board) with information regarding either a change in the name and/or address of the current water right holder or a change in ownership of the water right (Cal. Code Regs., Title 23, §830-831). All correspondence pertaining to a water right, including the bill for fees, is mailed to the owner (or agent) of record at the most recent address supplied to the State Water Board. Until such time as the State Water Board is notified of a change in ownership, the owner of record is liable for all fees and related charges assessed to the billing account.

To inform the State Water Board of any updates to the name or address of the current water right holder, please complete Box 1 and return this form to the Division of Water Rights at the address above. To inform the State Water Board of a change in ownership of a water right, please complete Boxes 1 and 2. If there are joint owners of this water right, you must provide the names and addresses of all joint owners and designate one person to receive all correspondence from the State Water Board regarding the joint application (Water Code, § 1290; Cal. Code Regs., Title 23, § 691.) For multiple owners, please attach additional sheets as necessary.

Re: Statements of Water Diversion and Use for City and County of San Francisco,
Points of Diversion: Stone Dam, Davis Tunnel, San Mateo Creek Mud Dam #1
and San Mateo Creek Mud Dam #2

Dear Sir or Madam:

Enclosed please find Statements of Water Diversion and Use for the referenced points of diversion, which we are filing on behalf of the City and County of San Francisco. In October, 2005, the City filed SWDUs for its local system (Alameda Creek watershed and San Francisco peninsula) diversions. The Board subsequently requested statements for the separate points of diversion described in those SWDUs. The enclosed are intended to comply with that request. These SWDUs are in filed in addition to, and not in place of, the SWDUs filed in October, 2005. Because the City has no measuring devices at the points of diversion described in the enclosed statements, quantities diverted are reflected in the SWDUs filed in October, 2005, which cover the facilities at which total diversions are measured.

Please contact me if you have any questions.

Very truly yours,

Margaret G. Leavitt
