**INITIAL STATEMENT OF WATER DIVERSION AND USE**

**NOTE: A Statement is not a Water Right**

This Statement should be typewritten or legibly written in ink and submitted to the address above.  
A separate statement must be filed for each point of diversion.

DIV OF WATER RIGHTS

An (\*) indicates a required section. Required sections must be completed for the Statement to be accepted.

\*A. Claimant/Agent Information

Claimant/Owner: Jerry J Rava II & Natalie Rava	Agent:
Mailing Address	Mailing Address
404 So. 1st St. King City, Ca 93930	same
Phone No. (831) 385-3285	Phone No.
Fax No.	Fax No.
E-mail Address: jerry@ravaranch.com	E-mail Address:

\*B. Water is diverted and used under the claim of: Riparian claim  Pre 1914 claim  Court Decree No \_\_\_\_\_  
Note, if you have an application on file for a water right or have an existing license, please provide your application number \_\_\_\_\_  
Other (explain): see Attachment 'A'

\*C. Name of the body of water at the point of diversion  
San Lorenzo Creek  
Tributary to Salinas River

\*D. Point of diversion is located within Monterey County on Assessor's Parcel No. 235-011-004; 235-021-010,011,015  
being within the SW 1/4 of NW 1/4 of Section 9, of Township 20S, Range 8E, MD B&M.  
Provide the location of the point of diversion using the California Coordinate System (NAD 1983) or Latitude / Longitude measurements.  
approximately 36°12'34.15"N /121° 6'58.80"W

**Identify the point of diversion and outline the place of use on a United States Geological Survey (USGS) topographic map and submit the map with the Statement.**

Name of the diversion works is Rainbow Related Water Right(s) \_\_\_\_\_

E. Do you own the land at the point of diversion? Yes  No  If No, please provide the name and address of the land owner at the point of diversion: \_\_\_\_\_

\*F. Capacity of diversion works 7.2 cfs (cfs, gpm, or gpd) Capacity of storage tanks or reservoir \_\_\_\_\_ (gallons or acre-feet)  
Type of diversion facility: Gravity  Creek Pump  Well Pump   
Method of measurement: Weir  Flume  In line flow meter  Electric Meter  Estimate

**NOTE: #Monthly report below is optional until January 1, 2012, at which time the information becomes mandatory.**

\*Provide the maximum rate of diversion achieved in each month in the table below as measured in: cfs  gpm  or gpd

Year	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec

Additional copies of this form and water right information can be obtained at www.waterboards.ca.gov/waterrights.

\*G. Provide the quantity of water diverted each month in the table below as measured in: Gallons  Million gallons  Acre-feet

Year	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec	Total Annual
2009	20.758	13.668	84.946	122.073	419.377	152.783	260.704	230.761	82.641	52.956	26.062	33.506	1500.24

H. Annual water use in recent years: Maximum 1800 acre feet (gallons or acre-feet) Minimum 1100 acre feet (gallons or acre-feet)

State the year of first use at diversion site or storage facility researching

\*I. Beneficial water use is for: (example, number of acres and type of crop irrigated, average number of persons served, number of stock watered, etc.) This well is part of a system conjunctively managed to irrigate acres of row crop and vineyard

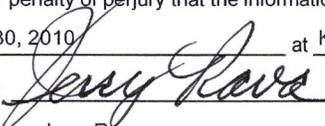

\*J. General description and location of the place of use shall be identified using a USGS topographic map, or if assigned, may be provided using the public land description to the nearest 40 acre parcel accompanied by the County Assessor's parcel map.  
agriculture

K. Please answer only those questions below that are applicable to your project.

1. Conservation of water
  - a. Describe any water conservation efforts you have in place \_\_\_\_\_
2. Water quality and wastewater reclamation
  - a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree that unreasonably affects such water for other beneficial uses? YES  NO
3. Conjunctive use of surface water and groundwater
  - a. Are you using groundwater in lieu of surface water? YES  NO

I declare under penalty of perjury that the information in this report is true to the best of my knowledge and belief.

\*DATE: June 30, 2010 at King City, California

\*SIGNATURE: 

\*PRINTED NAME: Jerry Rava  
(first name) (middle initial) (last name)

COMPANY NAME: \_\_\_\_\_

### GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to 1) store water for later use 2) divert water which originates in a different watershed 3) divert water released from storage, or 4) divert return flows from groundwater use.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission in December 1914, new appropriators have been required to obtain a permit or license from the State.

Statements of Water Diversion and Use must be filed by a riparian and/or pre-1914 appropriative water user. The filing of a statement 1) provides a record of water use, 2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and 3) assists the State in determining if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please visit the website [http://www.waterboards.ca.gov/waterrights/water\\_issues/programs/diversion\\_use/](http://www.waterboards.ca.gov/waterrights/water_issues/programs/diversion_use/), or write to this office.

## Attachment 'A'

Jerry J Rava II & Natalie Rava believes that the water that is pumped by the well described in this statement is percolating groundwater. By filing this statement, Jerry J Rava II & Natalie Rava is not waiving any of its arguments regarding the legal classification of the water that is pumped by this well. Jerry J Rava II & Natalie Rava is filing this statement in case it is ultimately determined that the water pumped by this well is water in a "subterranean stream flowing through a known and definite channel," as that term is used in Water Code section 5100, subdivision (c),
