Initial Statement of Water Diversion and Use for Brent Thrans & Andrea Kincaid
14 June 2012

Description of existing related water rights:

A pre-1914 (circa 1865) dam and diversion channel were built to direct water into the west fork of Lower Castle Creek to supply water to an old lumber mill which was located just west of the westerly property line of this parcel. Though the mill no longer operates, the diversion has flowed continuously since then, supplying water to this waterway after snowmelt has ceased to feed it (generally by the end of June), and ensuring that the stream flows into fall in most years. Water from this source is necessary to us for our irrigation and fire suppression use, as our access to (and use of) the property is limited by extreme snowpack to the months of July through October, and is generally not possible until after the snowmelt source has ceased.
