

**CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
LAHONTAN REGION**

**MEETING OF JUNE 19 AND 20, 2013
LEE VINING**

ITEM: 18

SUBJECT: **PROPOSED RESOLUTION FOR THE TRUCKEE RIVER
LEGACY TRAIL PHASE 3B PROJECT, TOWN OF TRUCKEE -
EXEMPTION TO A WASTE DISCHARGE PROHIBITION
CONTAINED IN THE WATER QUALITY CONTROL PLAN FOR
THE LAHONTAN REGION**

CHRONOLOGY: This is a new item.

ISSUE: Does the Town of Truckee's Truckee River Legacy Trail Phase 3B Project (Project) meet the criteria for Basin Plan prohibition exemptions to allow waste discharges within the 100-year floodplain of the Truckee River?

DISCUSSION: The Town proposes to construct a continuation of the Truckee River Legacy Trail, identified as a high priority trail in the Truckee Trails and Bikeways Master Plan, adopted by the Town Council in April, 2002. The Project is an essential transportation facility project and recreation project. Phase 3B includes an approximately 11,155 foot long section of paved Class I bike and pedestrian trail. The trail alignment will include a span bridge crossing at Martis Creek, upstream from the confluence with the Truckee River. Compensatory mitigation will include restoration of 0.095 acres as mitigation for temporary and permanent impacts to wetlands.

Pursuant to Resolution No. R6T-2008-0031, the Water Board must approve public recreation projects involving more than 2000 square feet of soil disturbance after consideration at a public meeting.

The Water Board may grant an exemption to the prohibition if the Water Board finds the Project meets specific exemption criteria in the Basin Plan. The required exemption criteria is met by the Project.

Prior to construction, the Town must receive Water Quality Certification pursuant to Clean Water Act Section 401. This action will be taken by Water Board Executive Officer if the Water Board adopts the proposed Resolution. A draft Section 401 Order is provided in Enclosure 2.

Required mitigation measures and detailed requirements regarding the allowable discharge to 100-year floodplains are identified in the proposed Resolution and will be enforced through the 401 Water Quality Certification Order.

The Water Board has notified the Applicant and interested agencies and persons of its intent to adopt this Resolution by posting to a list server and on the Water Board's internet website.

**RECOMMEN-
DATION:**

Adoption of the Resolution as proposed.

**CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
LAHONTAN REGION**

RESOLUTION R6T-2013-(PROPOSED)

**TRUCKEE RIVER LEGACY TRAIL PHASE 3B PROJECT, TOWN OF TRUCKEE -
EXEMPTION TO WASTE DISCHARGE PROHIBITION CONTAINED IN THE WATER
QUALITY CONTROL PLAN FOR THE LAHONTAN REGION**

_____ Nevada County _____

WHEREAS, the California Regional Water Quality Control Board, Lahontan Region (Water Board) finds:

1. The Town of Truckee (Applicant) submitted information to the Water Board to complete a Report of Waste Discharge (ROWD) and an Application for Clean Water Act Section 401 Water Quality Certification (WQC) for the Truckee River Legacy Trail Phase 3B Project (Project). The primary purpose of the Project is to construct a continuation of the Truckee River Legacy Trail, identified as a high priority trail in the Truckee Trails and Bikeways Master Plan, adopted by the Town of Truckee Town Council in April, 2002. The Project is an essential transportation facility and recreation Project.
2. The Project site is located at the eastern edge of the Town of Truckee, along the south bank of the Truckee River. The Truckee River and Martis Creek are located at the Project site, within the Truckee River Hydrologic Unit No. 635.00.
3. The Project involves the construction of approximately 11,155 linear feet of paved Class I bike and pedestrian trail. The trail alignment will include a span bridge crossing at Martis Creek, upstream from the confluence with the Truckee River.
4. The Applicant evaluated several alternatives during the planning phase of the Project and chose the current trail alignment. Due to the existing location of a historic site and the desire to avoid impacts to this cultural resource, the alignment of the trail will be within the 100-year floodplain of the Truckee River. The Project as proposed will create permanent and temporary disturbance to wetlands.
5. The Water Board adopted the *Water Quality Control Plan for the Lahontan Region* (Basin Plan). Chapter 4 specifies the following discharge prohibition:

The discharge or threatened discharge, attributable to human activities, of solid or liquid waste materials including soil, silt, clay, sand, and other organic and earthen materials to lands within the 100-year floodplain of the Truckee River or any tributary of the Truckee River is prohibited.

6. The proposed Project would violate the above-cited prohibition as it involves land disturbance and discharge of earthen and fill material within 100-year floodplain of the Truckee River. The disturbance includes (a) grading and paving for a new bike path, (b) installation of a span bridge over Martis Creek above the confluence with the Truckee River, and (c) restoring disturbed wetlands. The Project will cause 3,990 square feet (0.092 acre) of temporary impacts, and 150 square feet (0.003 acre) of permanent impacts, to wetlands within the 100-year floodplain.
7. The Project is essential for transportation and public recreation. The trail is in accordance with the Truckee Trails and Bikeways Master Plan, adopted by the Town of Truckee Town Council in April, 2002.
8. The Project exceeds the allocated size limits for recreation projects sited in the 100-year floodplain of the Truckee River as indicated in Resolution No. R6T-2008-0031, which delegates the authority to the Executive Officer to grant exemptions to the 100-year floodplain discharge prohibitions if recreation projects meet these specific conditions: (1) less than 2000 square feet of new ground disturbance, and (2) less than 100 cubic yards of fill or excavation will occur. The Project proposes to permanently disturb 3,360 square feet and add 9.7 cubic yards of fill in the 100-year floodplain of the Truckee River. Since the Project exceeds the area size limit in Resolution No. R6T-2008-0031, the Project must be considered at a public meeting of the Water Board.
9. The Basin Plan allows exemptions to the above-cited discharge prohibition (in number 5 above) for public recreation projects that meet the following exemption criteria:
 - a. *There is no reasonable alternative to locating the Project or portions of the Project within the 100-year floodplain.*

Numerous alternatives were considered in the development of the Project. The preferred trail alignment follows the south bank of the Truckee River, minimizes impacts to the 100-year floodplain, and avoids impacts to significant cultural and historical resources. There is no reasonable alternative location for the Project.

- b. *The Project, by its very nature, must be located within the 100-year floodplain.*

The Truckee River Legacy Trail system was envisioned to parallel the Truckee River. Because alternative alignments that avoid the 100-year floodplain would not achieve the Project vision, and would impact a significant cultural and historical site. The Project by its very nature must be located within the 100-year floodplain of the Truckee River, and Martis Creek, a tributary to the Truckee River.

- c. *The Project incorporates measures which will ensure that any erosion and surface water runoff problems caused by the Project are mitigated to levels of insignificance.*

The Project will incorporate Best Management Practices to stabilize and minimize impacts to water quality. A Storm Water Pollution Prevention Plan, required as a component of the Statewide Stormwater Construction General Permit (DWQ-2009-0009), will provide site specific stormwater BMPs. All work will be restricted to May 1 through October 15 of a given year. All proposed work will avoid disturbance within the ordinary high water mark of Martis Creek and the Truckee River. The Project incorporates measures that mitigate all possible erosion or surface water runoff problems to levels of insignificance.

- d. *The Project will not individually or cumulatively with other projects, directly or indirectly, degrade water quality or impair beneficial uses of water.*

The Project involves construction operations that will require the Town of Truckee to obtain a Statewide Stormwater Construction General Permit (DWQ-2009-0009) that describes stormwater runoff treatment and erosion control measures consistent with the Water Board's guidelines. As a component of this permit, a SWPPP will be prepared and followed to protect surface water quality through the implementation of BMPs and various other means. The Project must also comply with the Town of Truckee's drainage/stormwater runoff regulations as specified in Section 18.30.050 of the Development Code. The Project will not degrade water quality or impair beneficial uses of water.

- e. *The Project will not reduce the flood flow attenuation capacity, the surface flow treatment capacity, or the groundwater flow treatment capacity from existing conditions. All 100-year floodplain areas and volumes lost as a result of the Project must be completely mitigated by restoration of previously-disturbed floodplain within or as close as practical to the Project site. The restored, new, or enlarged floodplain shall be sufficient area and volume to more than compensate for the flood flow attenuation capacity, surface flow treatment capacity, and groundwater flow treatment capacity which are lost as a result of the Project.*

The Project will result in no net loss of the 100-year floodplain attributes. The trail will be installed at ground elevation and will not impede or reduce surface flows of water in the event of a flood; therefore, attenuation capacity will be unaffected. Neither the flood flow attenuation capacity, the surface flow treatment capacity, nor the groundwater flow capacity will be reduced from existing conditions.

10. Compliance with California Environmental Quality Act (CEQA, Public Resources Code 21000, et seq.) – The Applicant certified a Mitigated Negative Declaration (MND, State Clearinghouse No. 2012111094) on November 30, 2012, and filed a Notice of Determination on December 31, 2012 for the Truckee River Legacy Trail Phase 3B Project, pursuant to the CEQA. The Water Board, acting as a CEQA Responsible Agency in compliance with California Code of Regulations, title 14,

section 15096, has considered the Applicant's MND for the Project and mitigation measures incorporated into the MND to reduce potentially significant water quality impacts to less than significant. As a result of the analysis, the Water Board finds the mitigation measures in the MND are adequate to reduce potentially significant water quality impacts to less than significant levels.

11. The Water Board has notified the Applicant and interested agencies and persons of its intent to adopt this Resolution by mail posting to a list server, and posting on the Water Board's internet site.

12. The Water Board, in a public meeting, heard and considered all comments and determined that the Project satisfies the exemption criteria stated above.

THEREFORE, BE IT RESOLVED THAT:

1. Pursuant to Finding Nos. 8 and 9, above, the criteria established for exemption to the Basin Plan prohibition stated in Finding No. 5 is satisfied for the Truckee River Legacy Trail Phase 3B Project.
2. The Water Board hereby grants an exemption to the Basin Plan prohibition stated in Finding No. 5 for the Truckee River Legacy Trail Phase 3B Project, on the condition that:

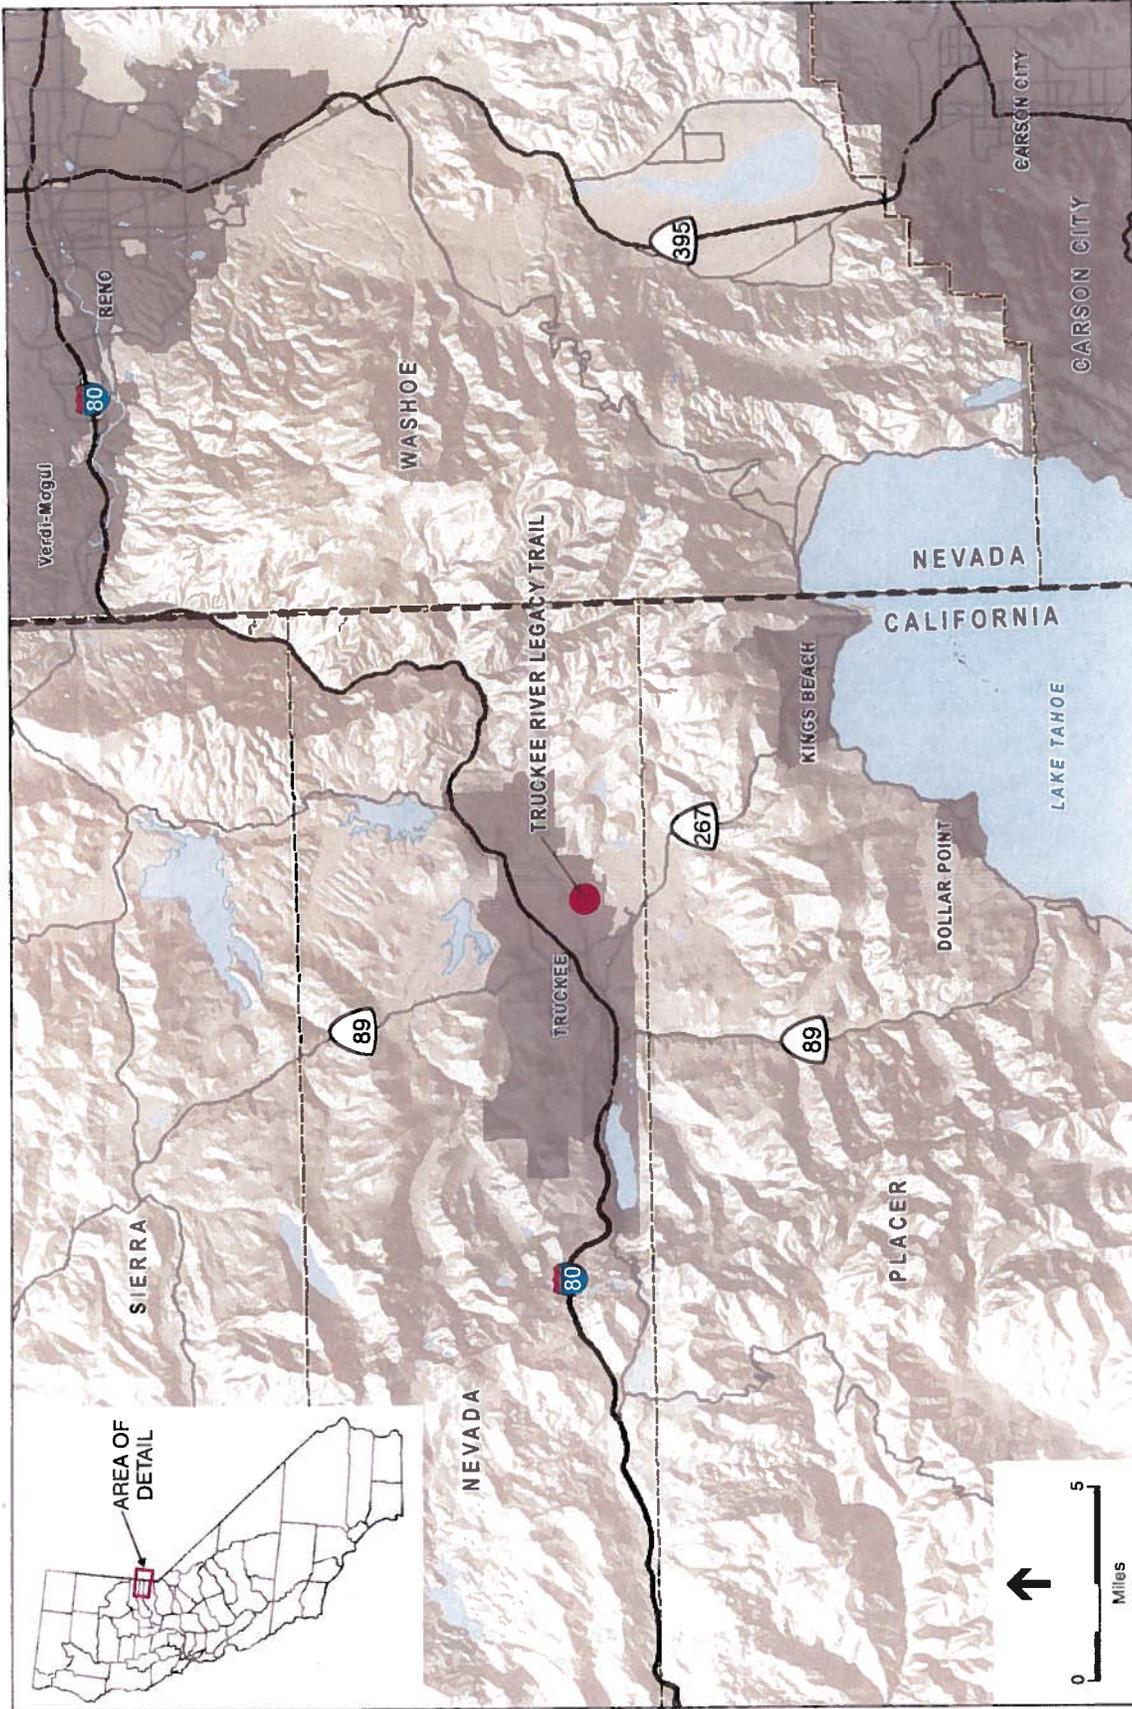

Prior to initiating any construction activity or disturbance in waters of the U.S. (WOUS) or other waters subject to state regulation, the Applicant must obtain for the Project a WQC Order from the Water Board.

I, Patty Z. Kouyoumdjian, Executive Officer, do hereby certify that the foregoing is a full, true, and correct copy of a Resolution adopted by the California Regional Water Quality Control Board, Lahontan Region, on **June 19, 2013**.

Lahontan Regional Water Quality Control Board

Becky Bucar
Town of Truckee
10183 Truckee Airport Road
Truckee, CA 96161

R6T-2013-XXXX, ORDER FOR CLEAN WATER ACT SECTION 401 WATER QUALITY CERTIFICATION AND 100-YEAR FLOODPLAIN PROHIBITION EXEMPTION FOR TRUCKEE RIVER LEGACY TRAIL PHASE 3B PROJECT, NEVADA COUNTY, WDID 6A291303001

The California Regional Water Quality Control Board, Lahontan Region (Water Board) has received a complete Clean Water Act Section 401 Water Quality Certification (WQC) application and application filing fee for the Truckee River Legacy Trail Phase 3B Project (Project) in Nevada County. This Order for WQC hereby assigns this Project the following reference number: Waste Discharger Identification (WDID) No. 6A291303001. Please use this reference number in all future communications regarding this Project.

Any person aggrieved by this action of the Water Board may petition the State Water Resources Control Board (State Water Board) to review the action in accordance with Water Code section 13320 and California Code of Regulations, title 23, sections 2050 and following. The State Water Board must receive the petition by 5:00 p.m., 30 days after the date of this Order, except that if the thirtieth day following the date of this Order falls on a Saturday, Sunday, or state holiday, the petition must be received by the State Water Board by 5:00 p.m. on the next business day. Copies of the law and regulations applicable to filing petitions may be found on the Internet at: http://www.waterboards.ca.gov/public_notices/petitions/water_quality or will be provided upon request.

PROJECT DESCRIPTION

Table of Project Information:

WDID Number	6A291303001
Applicant	Becky Bucar, Town of Truckee, 10183 Truckee Airport Road, Truckee, CA 96161
Agent	Joshua Boldt, ESA Biological Resources, 2600 Capitol Ave., Suite 200, Sacramento, CA 95816
Project Name	Truckee River Legacy Trail Phase 3B Project

Table of Project Information continued:

Project Purpose and Description	Continuation of Truckee River Legacy Trail, identified as a high priority trail in the Truckee Trails and Bikeways Master Plan, adopted by the Town of Truckee Town Council in April 2002. An essential transportation facility and recreation project, Phase 3B includes an approximately 11,155 foot long section of paved Class I bike and pedestrian trail. Trail alignment will include a span bridge crossing at Martis Creek, upstream from the confluence with the Truckee River.						
Project Type	Essential Transportation Facility and Recreation Project						
Project County	Nevada						
Project Location	Eastern edge of Town of Truckee, along south bank of the Truckee River, east of the Riverview Sports Park to Glenshire Drive.						
Location Latitude/Longitude	Latitude: 39.337842, Longitude: -120.129395						
Hydrologic Unit(s)	Truckee River Hydrologic Unit, 635.00						
Overall Project Area	42.9 acres						
Receiving Water(s) Name	Truckee River, Martis Creek						
Water Body Type(s)	River, Stream						
Designated Beneficial Uses	MUN, AGR, IND, GWR, FRSH, POW, REC-1, REC-2, COMM, COLD, WILD, RARE, MIGR, SPWN						
Potential Water Quality Impacts	Discharge of earthen materials, aggregate base, asphalt concrete, and rock						
Area of Water(s) within the Overall Project Area	2.0 acres						
Project Impacts (Fill) to Waters of the State, including Waters of the U.S. (WOUS)	Waterbody Type	Permanent			Temporary		
		Acres	Linear Feet	Cubic Yards	Acres	Linear Feet	Cubic Yard
	<i>Lake</i>						
	<i>Riparian</i>						
	<i>Stream</i>						
	<i>Wetland</i>	0.003	33.7	9.7	0.092	0	170
Project Impacts (Excavation) to Waters of the State, including WOUS.	Waterbody Type	Permanent			Temporary		
		Acres / Sq. Ft.	Linear Feet	Cubic Yards	Acres / Sq. Ft.	Linear Feet	Cubic Yard
	<i>Lake</i>						
	<i>Riparian</i>						
	<i>Stream</i>						
	<i>Wetland</i>						
	Total	0	0	0	0	0	0
Federal Permit(s)	The Applicant has applied for U.S. Army Corps of Engineers (USACOE) authorization to proceed under a Nationwide Permit Number 42, pursuant to Clean Water Act section 404.						
Non-Compensatory Mitigation	Temporary and permanent Best Management Practices (BMPs) including site-specific BMPs to be used during construction and for winterization purposes.						
Compensatory Mitigation	0.095 acres of wetland restoration						
Applicable Fees	\$944						
Fees Received	\$944						

CEQA COMPLIANCE

Compliance with California Environmental Quality Act (CEQA, Public Resources Code 21000, et seq.) – The Applicant certified a Mitigated Negative Declaration (MND, State Clearinghouse No. 2012111094) on November 30, 2012, and filed a Notice of Determination on December 31, 2012 for the Truckee River Legacy Trail Phase 3B Project, pursuant to the CEQA. The Water Board, acting as a CEQA Responsible Agency in compliance with California Code of Regulations, title 14, section 15096, has considered the Applicant's MND for the Project and mitigation measures incorporated into the MND to reduce potentially significant water quality impacts to less than significant. As a result of the analysis, the Water Board finds the mitigation measures in the MND are adequate to reduce potentially significant water quality impacts to less than significant levels.

WATER QUALITY CONTROL PLAN WASTE DISCHARGE PROHIBITION

The Water Board specifies the following discharge prohibition in the Water Quality Control Plan for the Lahontan Region (Basin Plan):

"4(c) The discharge or threatened discharge, attributable to human activities, of solid or liquid waste materials including soil, silt, clay, sand, and other organic or earthen materials to lands within the 100-year floodplain of the Truckee River or any tributary to the Truckee River is prohibited."

The proposed Project threatens discharges that would violate the prohibition as it involves alterations within the 100-year floodplain the Truckee River and Martis Creek, a tributary to the Truckee River. The Water Board may grant an exemption to the above-cited prohibition under certain conditions.

EXEMPTION GRANTED

An exemption to the Basin Plan 100-year floodplain prohibition within the Truckee River Hydrologic Unit was granted for the Project by the Water Board at the June 19, 2013 Water Board meeting, pursuant to Resolution No. R6T-2013-00XX.

SECTION 401 WATER QUALITY CERTIFICATION

Authority

Section 401 of the CWA (33 U.S.C., paragraph 1341) requires that any Applicant for a CWA Section 404 permit, who plans to conduct any activity that may result in discharge of dredged or fill materials to WOUS, must provide to the permitting agency a certification that the discharge will be in compliance with applicable water quality standards of the state in which the discharge will originate. No Section 404 permit may be granted (or valid) until such certification is obtained. The Town of Truckee (Applicant) submitted a complete application and the fees required for WQC under Section 401 for the Project. The Applicant has applied for USACOE authorization to proceed under Nationwide Permit No. 42 pursuant to CWA section 404.

California Code of Regulations (CCR) title 23, section 3831(e) grants the Water Board Executive Officer the authority to grant or deny WQC for projects in accordance with CWA section 401. The Project qualifies for such WQC.

Standard Conditions

Pursuant to CCR title 23, section 3860, the following standard conditions are requirements of this certification:

1. This certification action is subject to modification or revocation upon administrative or judicial review, including review and amendment pursuant to California Water Code section 13330 and CCR title 23, section 3867.
2. This certification action is not intended and must not be construed to apply to any discharge from any activity involving a hydroelectric facility requiring a Federal Energy Regulatory Commission (FERC) license unless the pertinent certification application was filed pursuant to CCR title 23, section 3855(b) and the application specifically identified that a FERC license or amendment to a FERC license for a hydroelectric facility was being sought.
3. The validity of any non-denial certification action must be conditioned upon total payment of the full fee required under CCR title 23, section 3833, unless otherwise stated in writing by the certifying agency.
4. Neither Project construction activities nor operation of the Project may cause a violation of the Basin Plan, may cause a condition or threatened condition of pollution or nuisance, or cause any other violation of the California Water Code.
5. The Project must be constructed and operated in accordance with the Project described in the application for WQC that was submitted to the Water Board. Deviation from the Project description constitutes a violation of the conditions upon which the certification was granted. Any significant changes to this Project that would have a significant or material effect on the findings, conclusions, or conditions of this certification, including Project operation, must be submitted to the Executive Officer for prior review and written approval.
6. This WQC is subject to the acquisition of all local, regional, state, and federal permits and approvals as required by law. Failure to meet any conditions contained herein or any conditions contained in any other permit or approval issued by the State of California or any subdivision thereof may result in the revocation of this certification and civil or criminal liability.
7. The Water Board may add to or modify the conditions of this certification as appropriate to implement any new or revised water quality standards and implementation plans adopted or approved pursuant to the Porter-Cologne Water Quality Control Act or Section 303 of the Clean Water Act, or as appropriate to coordinate the operations of this Project with other projects where coordination of

operations is reasonably necessary to achieve water quality standards or protect the beneficial uses of water. Notwithstanding any more specific conditions in this certification, the Project must be constructed and operated in a manner consistent with all water quality standards and implementation plans adopted or approved pursuant to the Porter-Cologne Water Quality Control Act or Section 303 of the Clean Water Act.

8. This certification does not authorize any act which results in the taking of a threatened or endangered species or any act which is now prohibited, or becomes prohibited in the future, under the California Endangered Species Act (Fish and Game Code section 2050 et seq.) or the federal Endangered Species Act (16 U.S.C. sections 1531 et seq.). If a "take" will result from any act authorized under this certification, the Applicant must obtain authorization for the take prior to construction or operation of the Project. The Applicant is responsible for meeting all applicable requirements of the Endangered Species Act for the Project authorized under this certification.

Additional Conditions

Pursuant to CCR title 23, section 3859(a), the following additional conditions are requirements of this certification:

1. All temporary best management practices must be inspected (a) daily during Project construction and (b) weekly during the October 15 to May 1 period(s), when not snow-covered, to ensure they are functioning properly. The Applicant must maintain and keep daily inspection logs onsite during Project construction and provide a copy of inspection logs and records of any corrective actions to Water Board staff. The Applicant must provide an annual report of the construction season inspections and corrective actions implemented to the Water Board by **October 15** of each year in which construction occurs.
2. The Applicant must stabilize from erosion all areas of temporary impacts to waters of the state and all other areas of temporary upland disturbance that could result in a discharge or a threatened discharge to waters of the state for the Project to be considered complete.
3. The Applicant must temporarily stabilize the site from erosion (winterize) prior to October 15 in a manner that will remain effective until May 1 of the following year.
4. Wetland areas that will be avoided near Project and/or staging areas must be protected by colored construction fencing or equivalent barriers.
5. The Applicant must prevent the introduction or spread of noxious/invasive weeds within the Project and staging area. Control measures may include removing existing invasive vegetation, cleaning all equipment and gear prior to use on the site, using weed-free erosion control materials (including straw), and using weed-free seeds and plant material for revegetation of disturbed areas.

6. Water Board staff must be notified 48 hours prior to commencement of ground disturbance.
7. The Applicant must permit Water Board staff or its authorized representative upon presentation of credentials:
 - a) Entry onto Project premises, including all areas on which wetland fill or wetland mitigation is located or in which records are kept.
 - b) Access to copy any record required to be kept under the terms and conditions of this Order.
 - c) Inspection of any treatment equipment, monitoring equipment, or monitoring method required by this Order.
 - d) Sampling of any discharge or surface water covered by this Order.
8. No debris, cement, concrete (or wash water therefrom), oil or petroleum products must enter into or be placed where it may be washed from the Project site by rainfall or runoff into waters of the state. When operations are completed, any excess material must be removed from the Project work area, and from any areas adjacent to the work area where such material may be transported into waters of the state.
9. A copy of this Order must be maintained at the Project site so as to be available at all reasonable times to site operating personnel and Water Board staff.
10. Construction equipment must be monitored for leaks, and removed from service if necessary to protect water quality.
11. An emergency spill kit must be at the Project site at all times.

Enforcement

1. In the event of any violation or threatened violation of the conditions of this certification, the violation or threatened violation must be subject to any remedies, penalties, process or sanctions as provided for under state law. For purposes of Clean Water Act section 401(d), the applicability of any state law authorizing remedies, penalties, process or sanctions for the violation or threatened violation constitutes a limitation necessary to assure compliance with the water quality standards and other pertinent requirements incorporated into this certification.
2. In response to a suspected violation of any condition of this certification, the State Water Board or the Water Board may require the holder of any permit or license subject to this certification to furnish, under penalty of perjury, any technical or monitoring report the State Water Board or Water Board deems appropriate, provided that the burden, including costs, of the reports must be a reasonable relationship to the need for the reports and the benefits to be obtained from the reports.

3. In response to any violation of the conditions of this certification, the Water Board may add to or modify the conditions of this certification as appropriate to ensure compliance.

Section 401 Water Quality Certification Requirements Granted

I hereby issue an Order certifying that any discharge from the referenced Project will comply with the applicable provisions of Clean Water Act sections 301 (Effluent Limitations), 302 (Water Quality Related Effluent Limitations), 303 (Water Quality Standards and Implementation Plans), 306 (National Standards of Performance), and 307 (Toxic and Pretreatment Effluent Standards), and with other applicable requirements of State law. This discharge is also regulated under State Water Resources Control Board Order No. 2003-0017-DWQ, "General Waste Discharge Requirements for Dredge and Fill Discharges That Have Received State WQC" which requires compliance with all conditions of this WQC.

Except insofar as may be modified by any preceding conditions, all WQC certification actions are contingent on (a) the discharge being limited and all proposed mitigation being completed in strict compliance with the Applicant's Project description and the terms specified in this WQC order, and (b) compliance with all applicable requirements of the Basin Plan.

We look forward to working with you in your efforts to protect water quality. If you have questions, please contact Dale Payne, Environmental Scientist, at (530) 542-5464 or Alan Miller, Chief, North Basin Regulatory Unit, at (530) 542-5430.
