Regarding: Pacific Gas and Electric Company
Cleanup in Hinkley CA

Dear Mr. Singer,

I have lived in Hinkley for 33 Years and I still have concerns about the clean up.

1. The water table in Hinkley. PG&E said they have clean water injection wells. I have driven all around where they said they are but I don't see any water being injected. Where is the water coming from and how are they injecting it into the ground? Someone said they are taking it from one well and pumping it into another well. How is that replacing the water?
2. The Mojave Water Agency. Are they involved in the amount of water that is being pumped and did they ok all of the wells that are being drilled? Do they know how much water they pulling out of the ground?

Thank You
