ATTENTION; Harold Singer, Executive Officer, California Regional
Water Quality Control Board, Lahontan Region,
2501 Lake Tahoe Blvd. South Lake Tahoe, CA 96150

To Harold Singer and all members of the CRWQC Lahontan
Region Board.

Regarding: Comment and Request by Mark Orr regarding:
Amended Cleanup and Abatement Order No. R6V-2011--
0005A1 WDID NO. 6B369107001 Requiring Pacific
Gas and Electric Company to clean up and abate waste
discharges of total and hexavalent chromium to the
groundwaters of the Mojave Hydrologic Unit

The following is a request for future and present residents
or property owners of Hinkley, California.

One of the primary reasons for people to acquire and maintain
rural or county properties in San Bernardino County, California
is the use and/or ownership of individual water wells. Because
of this fact I insist that people and properties in Hinkley
California contaminated with Chromium 6 or any other substance or
chemical product or by-product of the PG&E (Pacific Gas and
Electric) business or clean-up be provided large pressurized
tanks (1000, 5000, 10,000 gallon etc. according to needs) and
clean water. Water could be provided weekly or bi-monthly,
or provided when residents and/or property owners summon. PG&E
themselves could establish a schedule and system of checking
tank levels and providing clean water. Usage of water would be

Draft clean-up and Abatement
order, PG&E Hinkley Ca
San Bernardino, County

restricted to use on that property provided for unless given permission by PG&E and/or the Lahontan Region water Board, or because of usage by emergency services. I request this option of clean water provision by PG&E to Hinkley property owners and residents be required so as to maintain and preserve the quality of life of the people.

Water provided must meet the existing or maximum potential use of the property owners and/or residents. Thus, if a property or residents require water for a family large or small and/or water for a crop or garden and/or water for basic recreational needs and/or water for domestic animals including dogs, cats, horses, cows etc. and/or water for assisting a business and/or water for numerous trees or shrubs etc. , then the necessary clean water should be provided as to maintain and preserve the quality of life of the residents and property owners whose land is contaminated as result of PG&E business or clean-up activities.

Residents and property owners of Hinkley, California must be informed as to where and when clean replacement water comes. The exact sources must be identified. This water must be tested on a regular basis, and must be tested immediately if the source changes. This water must come from outside contaminated Hinkley area and must come further than 20 miles from contaminated Hinkley lands.

Draft clean-up and Abatement
order, PG&E Hinkley Ca
San Bernardino, County

I request that the provision of clean water to residents and properties in Hinkley by PG&E be an option available to the residents or property owners. In no way should such a provision of clean water stop property owners in Hinkley from pursuing having properties purchased by PG&E so as to assist in relocation and monetary compensation, if this is their preference.

MARK ORR

HINKLEY, CALIF.
