North Coast Region

MONITORING AND REPORTING PROGRAM NO. R1-2006-0074

For

SONOMA STATE UNIVERSITY
GREEN MUSIC CENTER

Sonoma County

MONITORING

Wastewater

The effluent from dewatering activities shall be monitored for the following:

<u>Parameter</u>	<u>Units</u>	<u>Type of Sample</u>	<u>Sampling Frequency</u> ¹
Flow	gals/day	meter	continuous
Turbidity	ntu	grab or meter	daily
Conductivity	micromhos	meter	daily
pH		meter	daily
Temperature	°C or °F		daily

Receiving Water

The receiving water shall be monitored, at a location downstream within 50 feet of the discharge site, for the following:

<u>Parameter</u>	<u>Units</u>	<u>Type of Sample</u>	<u>Sampling Frequency</u> ¹
Turbidity	ntu	grab or meter	daily
Conductivity	micromhos	meter	daily
pH		meter	daily
Dissolved Oxygen	mg/l	grab or meter	daily
Temperature	°C or °F		daily

Outfall

The outfall shall be monitored including the following:

1. The outfall shall be visually assessed for erosion, scour, turbidity and the general condition of the temporary outfall and Copeland Creek during each monitoring event and shall be summarized monthly in an update report.

¹ During discharge activities. For the first seven (7) days of discharge, the monitoring frequency shall include weekend days. After submitting seven days of monitoring data for Executive Officer approval, the monitoring frequency may be reduced to Monday through Friday, while discharging, upon notification from the Regional Water Board. Flow measurements are exempted from this and shall be monitored continuously.

2. Photographs of the temporary outfall and Copeland Creek at the point of discharge shall be taken prior to the commencement of discharge, during the first day of discharge, during the second day of discharge, and once monthly thereafter until the discharge ceases. The photographs shall be labeled with a date and time and included monthly in an update report.

REPORTING

The Permittee shall keep the Regional Water Board apprised of progress towards assessing the feasibility of long-term alternatives to the discharge to Copeland Creek through submitting update reports. The reports shall include a summary of the alternatives, analyses of feasibility, interim results of the analyses, new information and progress towards implementation of the selected alternative.

Update and monitoring reports shall be submitted according to the following schedule:

<u>Type of Report</u>	<u>Due Date²</u>
Outfall photographs and visual assessment	July 12, 2006
Monitoring report for first 7 days of discharge	July 19, 2006
Update report	July 26, 2006
Update report and monitoring report	August 9, 2006
Update report	August 23, 2006
Update report and monitoring report	September 6, 2006
Update report	September 20, 2006
Update report and monitoring report	October 4, 2006
Update report	October 18, 2006
Update report and monitoring report	November 1, 2006
Update report and monitoring report	November 15, 2006
Notification that the discharge has ceased	November 15, 2006

Monitoring reports shall contain all monitoring results that were obtained during the project duration. In reporting the monitoring data, the Permittee shall arrange the data in tabular form so that the date and monitoring information are readily discernible. The data shall be summarized in such a manner as to illustrate clearly the compliance with Waste Discharge Requirements and the Water Quality Control Plan for the North Coast Basin (Basin Plan). The preferred method of report submittal is electronic.

The monitoring reports shall be submitted with a transmittal page including the following:

1. Identification of facility: Name, address, WDID number;
2. Date of report and monitoring period;
3. Identification of all violations of effluent limitations or other discharge requirements found during the monitoring period;
4. Details of the violations: parameters, magnitude, test results, frequency, and dates;

² The report shall be received in the Regional Water Board office on or before the due date.

5. The cause of the violation;
6. Discussion of corrective actions taken or planned to resolve violations and prevent recurrence, and dates or time schedule of action implementation;
7. Authorized signature; and
8. Certification statement: "I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

Ordered by:

Catherine E. Kuhlman
Executive Officer
