

Executive Officer's Summary Report
8:30 a.m., June 12, 2008
North Coast Regional Water Board
Hearing Room
5550 Skylane Blvd., Suite A
Santa Rosa, California

ITEM: 2

SUBJECT: Public hearing to Consider Revisions to General Waste Discharge Requirements Order No. R1-2006-0107 for Addition of Chemical Oxidants to Soils and/or Groundwater

DISCUSSION

The Regional Water Quality Control Board (Regional Water Board) adopted General Waste Discharge Requirements Order No. R1-2006-0107 (Order No. 0107) on November 29, 2006. Several typographical errors have been identified that require correction and one change to Order No. 0107 is proposed. The item today is to consider adoption of the revised general waste discharge requirements for the addition of a chemical oxidant to the vadose zone and/or groundwater.

Type of Revisions: Provision A.1. d is changing the word "oc" to "of" in the seventh line. In addition, the words "or engineering geologist" are being deleted. Only a California licensed professional engineer may design the treatment system.

Provision A.2. is being changed to more clearly describe the required elements of the narrative description required by the monitoring plan.

**PRELIMINARY STAFF
RECOMMENDATION:**

Adopt Revised General Waste Discharge Requirements Order No. R1-2006-0107 as proposed.
