Santa Rosa, California

Item: 12

Subject: County of Sonoma, Department of Transportation and Public Works  
Update on Solid Waste Plans for the Central Landfill

#### DISCUSSION

Staff from the County of Sonoma Department of Transportation and Public Works will present an update on plans for the Central Landfill operations located off Mecham Road in Petaluma.

At the October 2010 meeting, County of Sonoma staff provided an update to the Regional Board on activities of the Sonoma County/City Solid Waste Advisory Group (SWAG), who are continuing to explore options for long range solid waste management in Sonoma County including possible future expansions to the Central Landfill. On April 1, 2011, with the concurrence of the SWAG, the County of Sonoma submitted to the Regional Board, the Local Enforcement Agency, and CalRecycle a Joint Technical Document application for expansion of the Central Disposal Site. The permit application process has been initiated and staff continue to work cooperatively with the project representatives, consultants and coordinating agencies to address a number of complex engineering and permitting concerns associated with the landfill expansion.

County representatives are here today to update the Board on this matter.
