Re: Adoption of the NPDES Permit for the City of Willits Municipal Wastewater
Treatment Plant

Dear Ms. Bernard,

The City of Willits would like to thank the Board for their consideration of the adoption of the revised NPDES Permit, No. #CA0023060. At the Board meeting on June 10, 2010, adoption of the permit was delayed pending further negotiation regarding reclamation regulation issues affecting the City of Healdsburg. Since the City's permit contains reclamation regulations, the adoption of our permit was delayed as well. The City has struggled to obtain compliance status for many years; therefore, we are eagerly awaiting the adoption this permit. We have reviewed the revisions and find them to be adequate for our planned disposal needs. The City urges the Board to adopt the revised permit at the July 12th meeting to ensure the City's compliance by the August 1st deadline.

Sincerely,

Thomas Mannatt
City Engineer
City of Willits
