Notice of Proposed ReInjection
Under Waste Discharge Requirements Order No. R1-2009-0001

Former Remco Hydraulics Facility
934 South Main Street
Willits, California

Mendocino County

Public Comment Period Starts: April 16, 2013

Public Comment Period Ends: May 16, 2013

The Willits Environmental Remediation Trust (WERT) is proposing to inject reducing agents in accordance with Waste Discharge Requirements Order No. R1-2009-0001 for In-Situ Groundwater Treatment at the former Remco Hydraulics Facility located at 934 South Main Street in Willits, California.

The WERT is proposing to inject treatment solutions to reduce hexavalent chromium. A description of the reinjection and groundwater monitoring program is contained in a work plan titled: "Work Plan for In-Situ Remediation of Hexavalent Chromium in B-Zone Groundwater, Former Remco Hydraulics Facility, Willits, California, March 27, 2013". The workplan detailing the injection proposal and groundwater monitoring plan is available upon request or on Geotracker at the following link:
