Subject: Work Plan

Rebecca,

I was reviewing the sediment control work plan and I have a few comments. I see that the public comment period is closed, so it may be too late.

In Task 2 you prioritize watersheds for road restoration. Under a cost share project with DFG Gualala Redwoods, Inc. upgraded almost all the roads in the Doty Creek Planning watershed. This includes your "Little North Fork, Dotty Creek, Log Cabin Creek, Tributary #1 to Little North Fork". Although it is not listed, we are also just finishing upgrading all the roads in the Big and Little Pepperwood Creek watersheds. I assume the Pepperwood Creek you list is the one in the Upper Wheatfield.

In Task 3 you recommend a reconnaissance focus in the Little North Fork. I think it is safe to say we can check off the LNF as done.
