Subject: RE: Sediment Work Plan Extension

Thanks for your reply. Actually, our request of the board is for them to extend the comment period for a few months so that a more detailed analysis can occur.

Subject: Sediment Work Plan Extension

Lex,

If you need a few more days to compile and submit comments on the Sediment Work Plan, please take them. I will do my best to review and incorporate your comments into the documents that will be considered by the Board Members. We look forward to seeing your comments.

Sincerely,

Rebecca

Rebecca, the Work Plan to Control Excess Sediment-Impaired Watersheds is a very important document which could have a dramatic impact on the agricultural industry and our abilities to produce food. On behalf of the Sonoma County Farm Bureau, we would respectfully request an extended extension of the comment period from the regional board so that we and

others can more fully evaluate the plan. There is just too much information and details that deserves and should receive review.

Lex M. McCorvey
