

Upcoming Public Meeting

Staff of the North Coast Regional Water Quality Control Board (Regional Water Board) has scheduled a public workshop to update local stakeholders on the development of the Elk River Sediment Total Maximum Daily Load (TMDL). The meeting will provide an opportunity for staff to describe the TMDL development process, status of the project and tentative time frames for implementation actions. It will also provide an opportunity for discussion and public input regarding staff's preliminary recommendations on technical and policy approaches to the TMDL.

Meeting	Agricultural Services Building, Auditorium
Location:	5630 South Broadway Eureka, CA 95503
Date:	November 10, 2009
Time:	6:30 – 8:30 pm

Available Documents

Available documents pertaining to the Elk River TMDL may be viewed and downloaded from the following website:

http://www.waterboards.ca.gov/northcoast/water_issues/programs/tmdls/elk_river/
