

## List of Figures Presented

- 2.1 Salmon River Watershed
- 2.2 Salmon River Watershed Elevation
- 2.3 Salmon River Watershed Geology
- 2.4 Salmon River Watershed Rainfall
- 2.5 Salmon River Watershed Vegetation
- 2.6 Salmon River Riparian Corridor Vegetation Height
- 2.7 Salmon River Watershed 1997 Flood Damage
- 2.8 Salmon River Watershed Landslides
- 2.9 Salmon River Watershed Historic Fire Delineation 1911-2002
- 2.10 Salmon River Watershed Timber Harvest Delineation
- 2.11 Salmon River Watershed Roads
- 2.12 Salmon River Watershed Mining Claims
  
- 3.1 Salmon River Watershed Temperature Monitoring 1997 through 2002\*
- 3.2 Maximum Weekly Average Temperature (MWAT) Values for Salmon River Watershed Stream Temperature Monitoring: 1990-2003\*
  
- 4.1 Stream Shade Schematic\*
- 4.2 Salmon River Watershed SSTEMP Study Segments
- 4.3 Comparisons of Rates of Stream Temperature Change for Current vs. Potential Shade Conditions\*
- 4.4 Temperature Change from Current Conditions Predicted for Increased Shade, Flow, and Channel Widths Scenarios\*
  
- 5.1 Salmon River Watershed Wilderness and Late Successional Reserve Areas

(\*Figures marked with asterisk appear in main body of report. All others appear after the report in a separate document.)
