

Jeanine Townsend, Clerk of the Board 1/9/17
State Water Resources Control Board
1001 - I Street - 24th Floor
Sacramento, Ca.

re: 2016 Bay Delta Plan Amendment + SED

Dear Ms. Townsend + the Water Board,
I am writing to encourage the Water Board to set the instream water flows for the Sacramento - San Joaquin River Delta at 60 percent of unimpaired flow. It is not since 1995 that the water quality standards have been updated, + the native fish have decreased in population along with the water quality.

Our environment + the health of the ecosystem is more important than corporations + big agriculture. The water + all the creatures in it cannot protect themselves. We need to do it.

Please raise the instream flows to 60 percent, as fisheries scientists recommend.

Thank you for your attention.

Sincerely,

Antonia Clark
