Clerk of the Board

Re: 2016 Bay Delta Plan Amendment

Dear Ms. J. Townsend

Please set the instream water flows at 60% to ensure salmon and the Delta ecosystem survives. The proposed 40% is better than the current situation but the Water Board's 2010 flow criteria used 60% of unimpaired flow as fishery scientists agreed ^{it} was needed for ecosystem health.

As a kayaker I see up close the changes in water quantity.

Respectfully

Barbara Williams
