Jeanine Townsend, Clerk to the Board
State Water Resources Control Board

My email is to oppose the State Water Resources Control Board to send 350,000 acre-feet of water out to sea. This is enough domestic water for 2 million people each year and 100,000 acre-feet of water for farmland.

We need a comprehensive solution with other agencies, and local stakeholders to fix California's water storage/release, habitat, domestic use, and farmland. Science has proven we can fix the struggling fish populations by control predators, restore habitat, and utilize functional flows.

Yes this year 2016/17 we have too much water, but letting the water out when we don't I oppose.

Thank You- Betty J Kenney
