Subject: Comments can be e-mailed to Letter – 2016 Bay-Delta Plan Amendment
Date: Wednesday, November 30, 2016 5:10:07 PM

I am contacting you as a member of several organizations that support the findings of scientific nature re: the Bay Delta Plan Amendment.

I implore you; the people who "control" the destiny of water in California to heed the findings of our scientific community which has concluded that decreases of water diverted from the rivers are needed to prevent the continued decline of the Delta/S.F. Bay and increase their future viability. This requires increases of water that continues through the Sacramento/San Joaquin Delta to San Francisco Bay and decreases in water diverted south through the pumps/canals.

Stand up and do the right thing to preserve the Delta.
