

Dear Board Members (and hopefully Champions of the Great Amazing California Delta),

I want to ask each and every one of you to picture yourself sitting in a grove of trees at night with **John Muir** and **President Roosevelt**, as they did back in 1903. Sitting around the camp fire in Yosemite, talking about the **wonders of nature**, and the preservation of nature for **future generations**.

Envision yourself talking with both John Muir and President Roosevelt. Imagine the conversation being about the amazing waterways of the great Sacramento-San Joaquin Delta Ecosystem. Then imagine how the future will be for both the future of all of the wildlife and of humans.

What legacy will you leave behind? What voice will you represent?

As a member of the EcoGreen Group of Silicon Valley, my hope is that all of you will:

Leave a legacy of hope and wellbeing by
Protecting our Sacramento-San Joaquin Delta Ecosystem
By ensuring enough water flow within the Delta

Please be the voice for the wildlife and all of us people who want to see the Delta saved by
ensuring enough water flow

Please step up and **be defenders** and super heros **for the delta** and for:

- The fish, birds, wildlife, plants, and our children
- For the people who:
 - Need the delta for their jobs
 - Need the delta for their water
 - Need the delta for their souls

Please ensure that the delta has the water flow needed!!!

Enough water for:

- Fish to live **SAVE OUR FISH**
- For birds to live **SAVE OUR BIRDS**
- For the plants needed by all wildlife to thrive **SAVE OUR WILDLIFE**

- The Bay Delta has been suffering from:
 - Greed – **Board Members, battle this awful disease on our planet**
 - Short sightedness
 - Bad business – **Board Members, let's do business that protects what is left of the Delta**
 - Inadequate flows resulting in unfavorable conditions for salmon.
 - No salmon = no jobs, revenue, and
 - No nutrients from the ocean to inland rivers,
 - and endangering salmon puts more than 100 species in harms way.

Board Members, please join the voices of John Muir and President Roosevelt, as well as **millions of Californians** who want to see enough water flow continue in one of California's most precious resources, that of the great Sacramento-San Joaquin Delta Ecosystem.

Sincerely,

Debra A. Kiefel
Lifetime California Resident
