Subject: Comment Letter – 2016 Bay-Delta Plan Amendment

Follow Up Flag: Follow up
Flag Status: Flagged

To Those Who Are Responsible,

I am on the side of science and data. Therefore, I would like to go on record as vigorously opposing this effort to waste the water that those, who came before us, have carefully and with much fore site provided to us with our current reservoir system:

Also, the timing of the decision to increase water flows reveals an ignorance and arrogance from the members of the water board. If no reservoirs existed, how much water would be available for the fish then? Maybe this cycle is critical for the ecosystem.

Either way, I am somewhat glad that the board overstepped the boundaries of common good and rational thought as this is probably the most effective way to defeat such elitist attitudes in our state government.

Thank you for "allowing" my voice to be a part of the public comment.
