Hello my name is Griselda Manzo and I live in the Airport Community (Modesto) where I have lived for 10 years. Over the past three years, I have noticed a drastic change in the water of the river (Tuolumne River). We have participated in canoeing activities before, and now we cannot participate there is mostly sand and not enough water to canoe. Every summer we are travel near the river, but the water in the river is hotter than the stuff around it.

I would like to see an agreement (Bay Delta Plan) of 50 % water flows (half and half) to have activities for the youth because if not the gangs are going increase, and there will be more of our children in jail instead graduating from high school.
